Customer journey map · Checking progress to the next rank

One member's month, from opening the app to acting on what is missing. Built from the data on these screens; feelings and thoughts are assumptions to test with real members.

PERSONA
MG **Monkey GLuffyX · Manager, Associate**
Member since Jan 2026, 1 active leg, checks the app on the phone between other work.

SCENARIO
It is 9 October. They want to know whether Senior Manager is still possible this month and what to do next.

WHERE THEY START
PV 0 / 100 · TV 180 / 1,000 · Leg 1 240 / 1,000 · no frontline · no commission · 0 trip months

	STAGE 1 Open the app	STAGE 2 Get the overview	STAGE 3 Check rank progress	STAGE 4 Act on the gap	STAGE 5 Grow the team	STAGE 6 Check rewards	STAGE 7 Review orders and account
Goal What the member wants	Know where I stand this month without digging.	See this month's volume next to last month.	Know exactly what is missing for Senior Manager.	Close the gap before the month ends.	See who is in my team and how they are doing.	Know if I qualify for a trip or earned anything.	Make sure orders, returns and my details are right.
Actions What they do	• Opens the app on the phone • Reads name, rank and the Updated time • Glances at the 18% orb	• Reads AL, PV, TV, OV tiles • Compares with Sep badges • Scrolls the May–Oct table	• Taps the Success card • Picks October and Senior Manager • Reads the 4 requirement cards	• Taps Add PV in Shop • or taps Enroll a member • Leaves the dashboard to act	• Taps the Genealogy card • Picks a month • Searches a name or ID	• Opens Seminars, picks a trip • Reads stars and rings per month • Opens Commissions	• Opens Last Order, reads Net PV • Taps an order number • Opens Info, checks email
Touchpoint Screen in this file	• Dashboard (top)	• Dashboard	• Success	• Shop · Enroll	• Genealogy	• Seminars · Commissions	• Last Order · Info
Thinking What goes through their head	*"Is this up to date? It says 9 Oct, 4:14 PM."*	*"PV is 0 this month. Why is September 0 too when I ordered 500?"*	*"18% only. I need 100 PV, 820 TV and 760 on Leg 1. That is a lot."*	*"Which products give me 100 PV the fastest?"*	*"No frontline? Then where is my Leg 1 volume coming from?"*	*"Nothing qualified, nothing to download. Am I doing something wrong?"*	*"An RMA cancelled my order, so my PV is 0. Now it makes sense."*
Feeling How the moment feels	Neutral	Informed	Worried	Motivated	Confused	Let down	Relieved
Pain points What gets in the way	• Data is a few days behind, and the time zone label is easy to miss	• Short codes AL, PV, TV, OV, CPV are not explained • Sep shows 0 PV because an RMA cancels the order, but the Dashboard does not say so	• Rank names alone do not show what each one needs • TV and TV compressed look the same to a new member	• Shop and Enroll leave the dashboard, so progress is out of sight • No hint of how much PV an order adds	• "No frontline" and "Leg 1: 240" appear to contradict each other • No way to see the leg's own downline	• Empty states only say there is nothing • Months qualified 0 of 6 gives no next step	• RMA is jargon • Order detail and order history are not designed yet • Edit email has no screen yet
Opportunities Design response	In design Updated time chip on every screen Idea Pull to refresh and a stale-data warning after 24 h	In design Full names under each code (Personal volume · PV) Idea Info tooltip with a one-line glossary Idea Mark months where an RMA cancelled PV	In design Rank steps with Current and Next marked In design Still needed: 100 PV · 820 TV · 760 on Leg 1 In design Status and "to go" on each requirement	In design Add PV in Shop and Enroll a member buttons beside the gap Idea Show the PV each product adds in Shop Idea Return to Success after checkout with the new %	In design Search by name or ID, empty state with Enroll Idea Explain that leg volume can come from deeper levels Idea Tap a leg to see its own tree	In design Legend for qualified and non-qualified months Idea Say what is needed to qualify for each trip Idea Notify when a commission is ready to download	In design Orders grouped by month with Net PV In design RMA = returned order note Idea Order detail, order history and edit-email screens

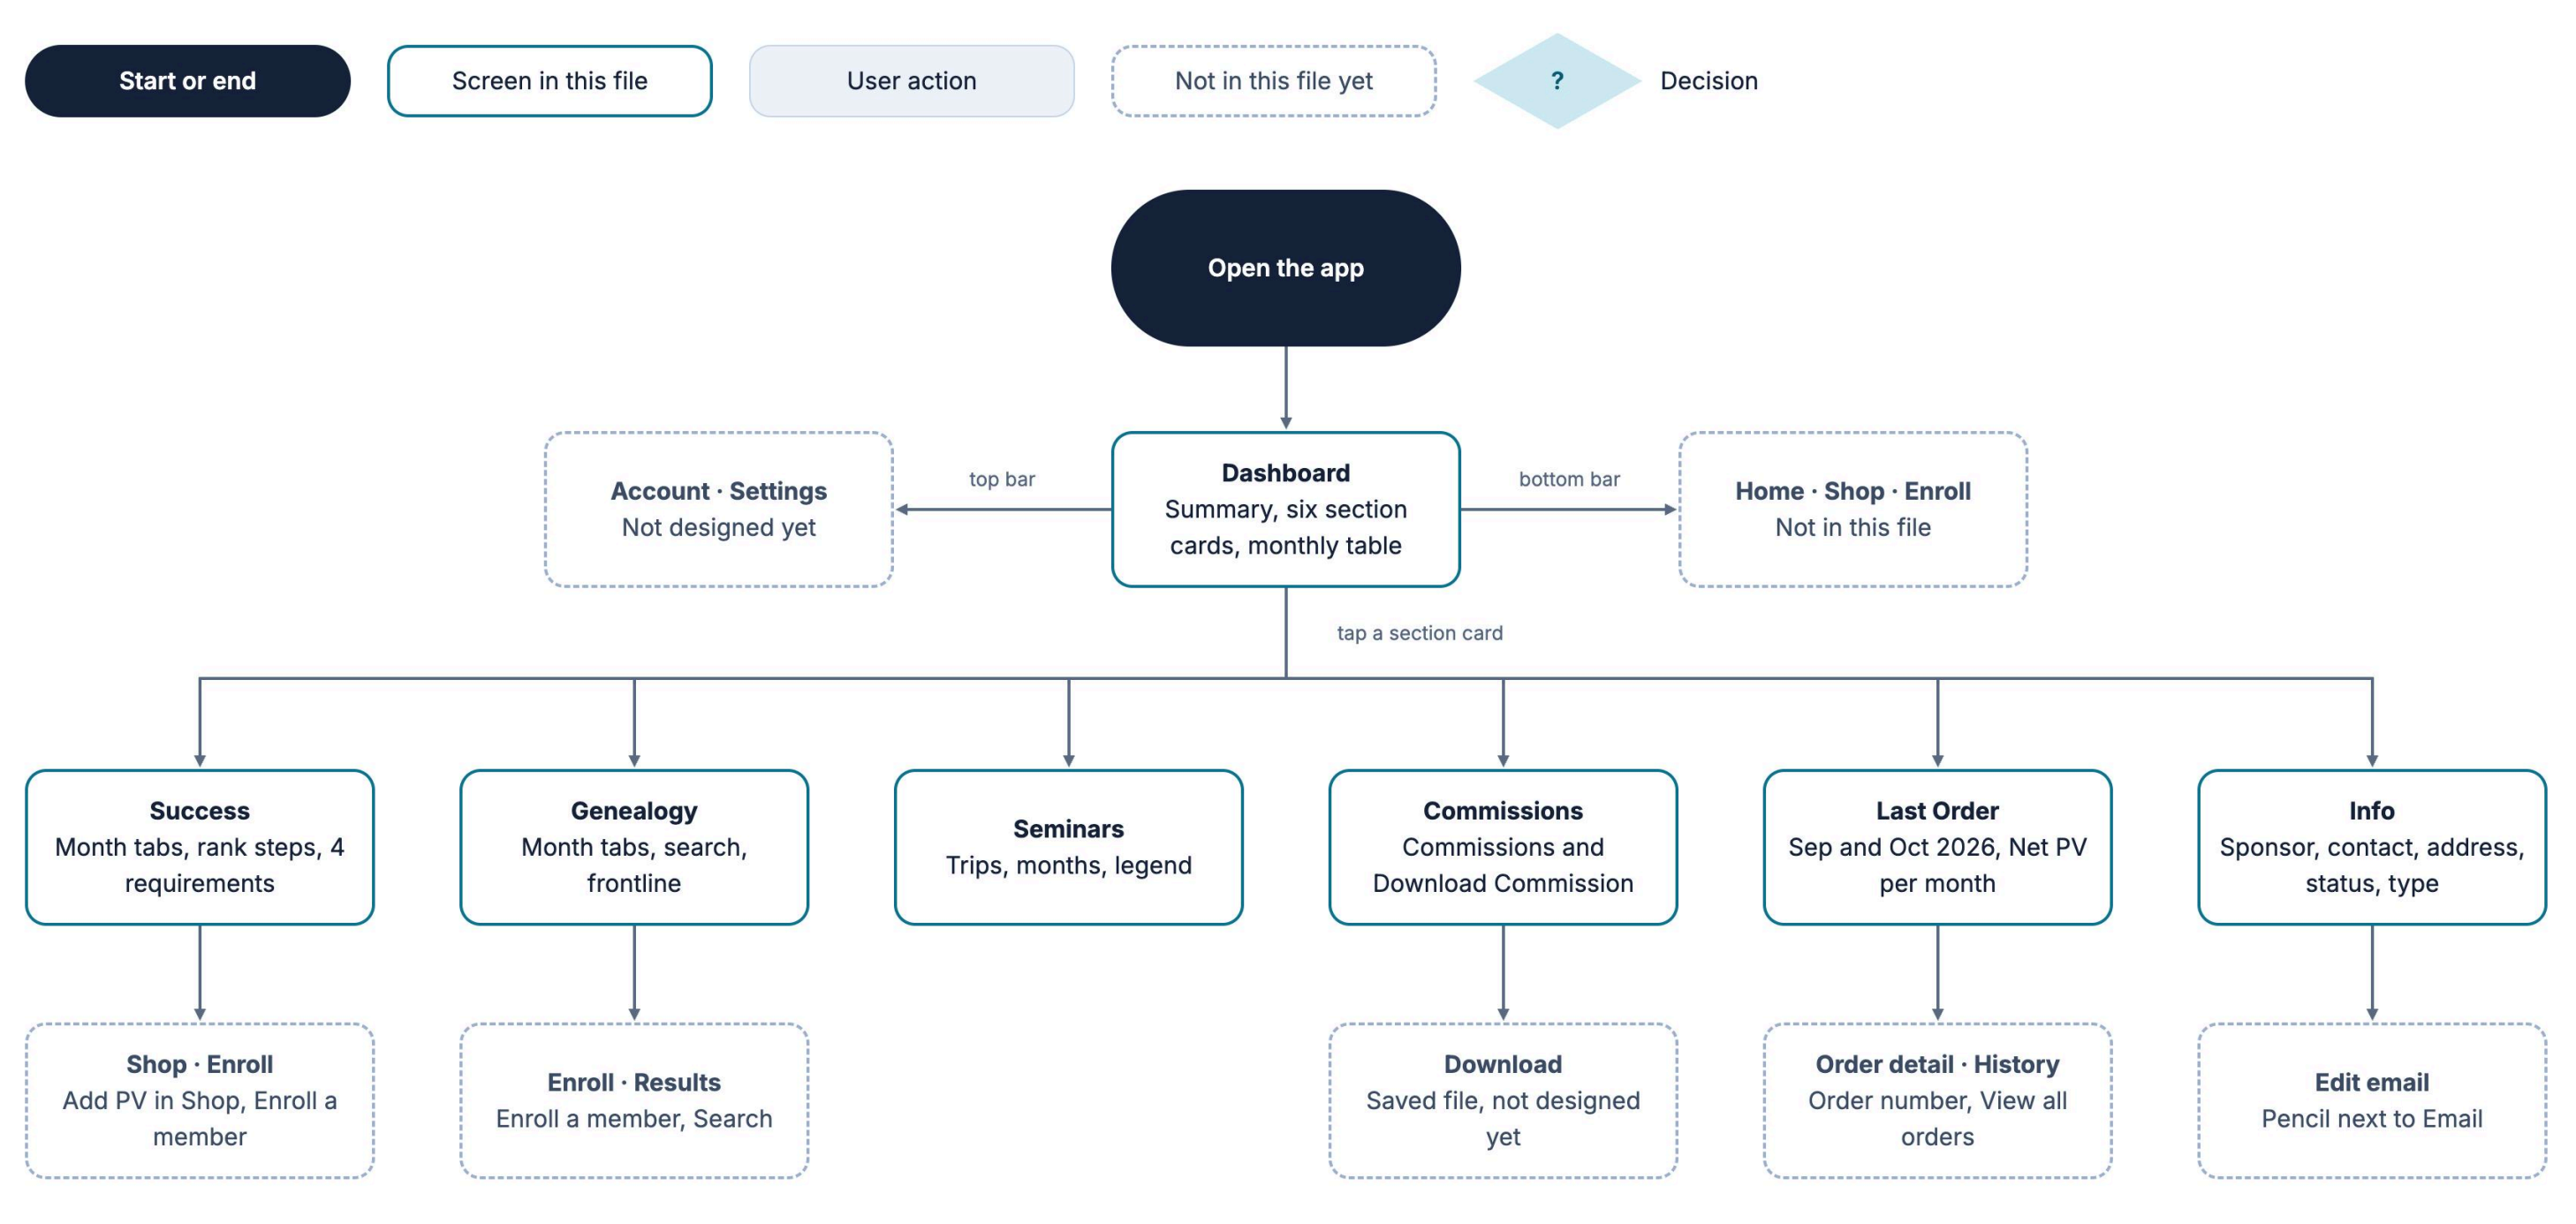
User flow · Screen map (mobile)

How the seven mobile screens connect. Dashboard is the hub: every section opens from it and returns to it.



Back: every screen returns to Dashboard with the ‹ Dashboard button (top left) or Dashboard in the bottom bar. Dashed boxes are places a tap leads to that are not drawn in this file yet.
Desktop: the same seven sections sit on one page, and the On this page buttons scroll to them instead of opening a screen.

User flow · Task flows (mobile)

What a member does, step by step, on the mobile screens in this file. Each lane is one task, read left to right.

Wireframe User Flow — Unicity Mobile

Low-fidelity wireframes for the member app · 15 screens (M01–M15) at 402 × 874, connected by tap paths: dashboard, sections, details, shop and enroll.
Badges show the screen code used in the UI frames and the Mobile UX/UI design flow on this canvas.

Start / end · Screen · Decision · Tap / next · Loop back

Rules on every screen
- **Bottom bar**: Dashboard · Home · Shop · Enroll (current tab filled).
- **‹ Back** (top left) returns to the parent screen.
- **Avatar** (top right) opens Settings (M15).
- **Add PV in Shop** appears on M01, M02 and M09 → M13. **Enroll a member** on M01, M02, M03 → M14.
- Home quick actions: Shop → M13 · Enroll → M14 · Order history → M10 · Settings → M15 · trips → M04.
- In-page only (no new screen): month tabs (M02, M03), rank steps (M02), trip toggle (M04), filters (M10), chips (M13), switches (M15).
- Not designed yet: checkout and payment, enrollment confirmation, email code entry, change password, sign-in.
