Customer Journey Map · NAVA Mobile Banking

From first hearing about the app, through onboarding and daily use, to getting help when something goes wrong.

PERSONA SUMMARY

Pimchanok "Pim", 29
Marketing exec · Bangkok · 6+ hrs/day on mobile

Goals
Handle all banking from her phone without visiting a branch, and see where her money goes each month.

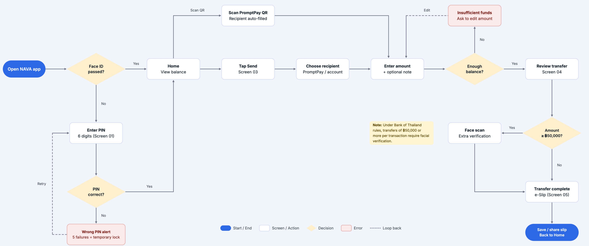

Frustrations
Fear of sending money to the wrong person; long identity checks that fail without explanation.

Expectations
Fast, simple and secure, with instant access to a real person when something goes wrong.

	Stage 1 **Discover** Ads, reviews, word of mouth	Stage 2 **Onboard** Download + e-KYC	Stage 3 **First Use** Set PIN + first transfer	Stage 4 **Everyday Banking** Scan to pay, bills, balance	Stage 5 **Support & Loyalty** Resolve issues, recommend
Actions What she does	Sees a social ad, reads reviews, compares fees with her current bank.	Downloads the app, photographs her ID card, completes a face scan and fills in personal details.	Sets a PIN and Face ID, tops up the account, sends money to a friend via PromptPay.	Scans QR codes at shops, pays electricity and phone bills, sets a savings goal.	Hits a pending or mistaken transfer, contacts in-app or chat or the call center until it's fixed.
Touchpoints Where it happens	Social media · Bank website · Friends	App Store / Play Store · e-KYC flow · SMS OTP	NAVA app · Push notifications · e-Slip	NAVA app · Merchant QR · Home screen widget	In-app chat · Call center · Branch
Thoughts What she's thinking	"Can I really open an account online without going to a branch?"	"The ID photo failed again, and it won't tell me why."	"Easier than I expected, but I'm still scared of sending it to the wrong person."	"Scan-to-pay is so quick. I use it every day."	"I've been on hold forever. Where is my case at?"
Emotions How she feels Today Same after redesign	Curious	Frustrated	Relieved	Delighted	Anxious
Pain Points What goes wrong	Fees and benefits are scattered across three websites.	ID photo and face scan fail with no reason given; leaving mid-way means starting over.	Unsure the recipient is correct; security setup has too many steps.	App slows down at month-end; too many notifications feel like spam.	No way to track a case; has to repeat the story every time she calls.
Opportunities How we improve	A clear fee-comparison page and a refer-a-friend link with rewards.	Live camera guidance ("move closer", "reduce glare") and saved progress to resume later.	Always show the recipient's name before confirming; favourites; 3-step onboarding.	Quick actions on the login screen, monthly spending summary, notification controls.	In-app case tracker, with context passed to agents automatically.

User Flow: Money Transfer in NAVA

The main path from opening the app to receiving an e-Slip, with decision points and error cases.
