UX research plan: Bios Life C app

What we need to learn before building, how we'll learn it, and what the current product page already tells us.

Status: plan, interviews and tests not yet run

Research goals

1. Understand why people choose Bios Life C and what worries them before buying.
2. Find what stops people from finishing a purchase on a phone.
3. Learn what helps customers keep the 3-a-day habit and reorder on time.

Key questions

- What do people check first: price, ingredients, safety or reviews from people they know?
- How do they handle timing with other medication today?
- Which payment and delivery options do they expect?
- Do they buy for themselves, for family, or for others as a member?
- Would reminders feel helpful or annoying?

Who we'll talk to

- 6 to 8 adults in Thailand, aged about 30 to 65, who shop on their phone.
- A mix of three groups: new to Bios Life C, current customers, and members who recommend it to others.
- At least two people who take daily medication.
- Interviews in Thai, in person or by video call, 45 minutes each.

Methods and timeline

Method	What we learn	With whom	When	Output
1. Stakeholder interviews	Business goals, member rules, shipping fees, payment options	Unicity Thailand team, 3 to 4 people	Week 1	Confirmed facts to replace placeholders like [Shipping fee]
2. Heuristic review	Usability problems on the current product page	Design team	Week 1, done	Findings below
3. Analytics review	Where visitors leave the current site, mobile vs desktop share	Site and store data	Weeks 1 to 2	Baseline numbers to compare against
4. Customer interviews	Needs, habits, worries and how people buy today	6 to 8 customers	Week 2	Validated personas and journey map
5. Usability test	Can people find usage rules, buy and set reminders in the 25-screen prototype?	5 to 6 people per round, 2 rounds	Weeks 3 to 4	Task results and a fix list for the next design round

Heuristic review: current product page

From the product page PDF; severity is the design team's rating

High	The ingredient list is cut off mid-word, and supplement facts are an image that can't be zoomed or read aloud.	Screens 11, 12
High	Timing and medication rules (5-10 min before meals, 1 h before or 4 h after other medication) are buried in paragraphs.	Screens 8, 23, 24
Medium	Desktop-first layout: on a phone the key message and price are not visible together.	Screens 5, 21
Medium	Long paragraphs at one text weight, with no quick facts to scan.	Screens 6, 7, 9, 10
Medium	Enroll and register links sit in the header and footer, away from the buying flow.	Screens 1, 3
Low	Help is limited to a phone number and email in the footer.	Screens 4, 19, 20

Usability test: tasks

1. **"Find out how often and when to drink it."** Success: says 3 times a day, 5-10 minutes before a main meal
2. **"Check whether it contains something you avoid."** Success: reaches Key ingredients or Supplement facts
3. **"Buy one box and pay by QR."** Success: reaches Order placed with PromptPay chosen
4. **"Set a reminder before dinner."** Success: saves reminders with a dinner time
5. **"Find out where your order is."** Success: reaches Order tracking

Measures: task success rate, time on task, errors, and a System Usability Scale (SUS) score after each session. Targets: [set with the team in week 1].

Proto-personas

Three fictional customers who stand for the groups in the research plan. Each one maps to the screens built for them.

Built from assumptions; validate in customer interviews

Somchai, 54

Office manager, Bangkok

New customer

"My doctor says my cholesterol is high. I take medicine in the morning. Can I still drink this at breakfast?"

Wants a natural way to support healthy cholesterol alongside his treatment. Careful with anything new and reads labels closely.

Goals
- Keep cholesterol in a healthy range
- Fit a routine around 3 meals
- Know it's safe with his medicine

Frustrations
- Small text on his phone
- Medication rules hidden in paragraphs
- Unsure about paying online

Habits
- Uses LINE every day
- Asks his daughter to help with checkout
- Prefers to call before buying

Needs from the app
- Large, clear text
- Medication timing up front
- A phone number on every key screen

Screens for Somchai

8 Usage · 12 Supplement facts · 24 How to mix · 19 Order tracking

To test: Do older customers trust paying in the app, or do they want to order by phone?

Nok, 41

Marketing lead, Chiang Mai

Repeat buyer

"I always run out on a weekend, and I keep forgetting the lunch serving at work."

Already drinks Bios Life C and likes it. Busy days break her routine, and reordering takes too many steps.

Goals
- Not miss servings on busy days
- Reorder before the box runs out
- Know when delivery arrives

Frustrations
- Forgets the midday serving
- Reordering means starting over
- No delivery status online

Habits
- Shops on her phone weekly
- Pays by PromptPay QR
- Lives by phone reminders

Needs from the app
- Meal reminders she can set once
- Fast checkout with saved address
- Order tracking at a glance

Screens for Nok

23 Today · 25 Reminders · 14 Cart · 16 Payment · 19 Order tracking

To test: Would a reorder reminder near day 17 (a box lasts about 20 days) feel useful or pushy?

Ploy, 33

Member and small-business owner, Khon Kaen

Member who recommends

"Friends ask me what's inside. I need an answer I can send in a LINE chat."

Shares Bios Life C with friends and family and helps them sign up. Needs accurate facts she can pass on.

Goals
- Explain the product accurately
- Share ingredients and facts
- Help friends create an account

Frustrations
- Information spread across one long page
- Screenshots of the facts image are blurry
- Sign-up steps are hard to explain

Habits
- Posts in LINE groups and Instagram
- Sometimes orders for others
- Keeps product photos on her phone

Needs from the app
- Share buttons on facts and photos
- A clear sign-up with Sponsor ID
- Good product photos

Screens for Ploy

11 Key ingredients · 12 Supplement facts · 22 Photos · 3 Create account

To test: Do members need a separate "order for someone else" flow?

Customer journey map: Bios Life C app

From first contact to a daily habit and the next order, mapped to the 25 mobile screens.

Customer: **Adult in Thailand who wants to keep cholesterol and blood sugar healthy**

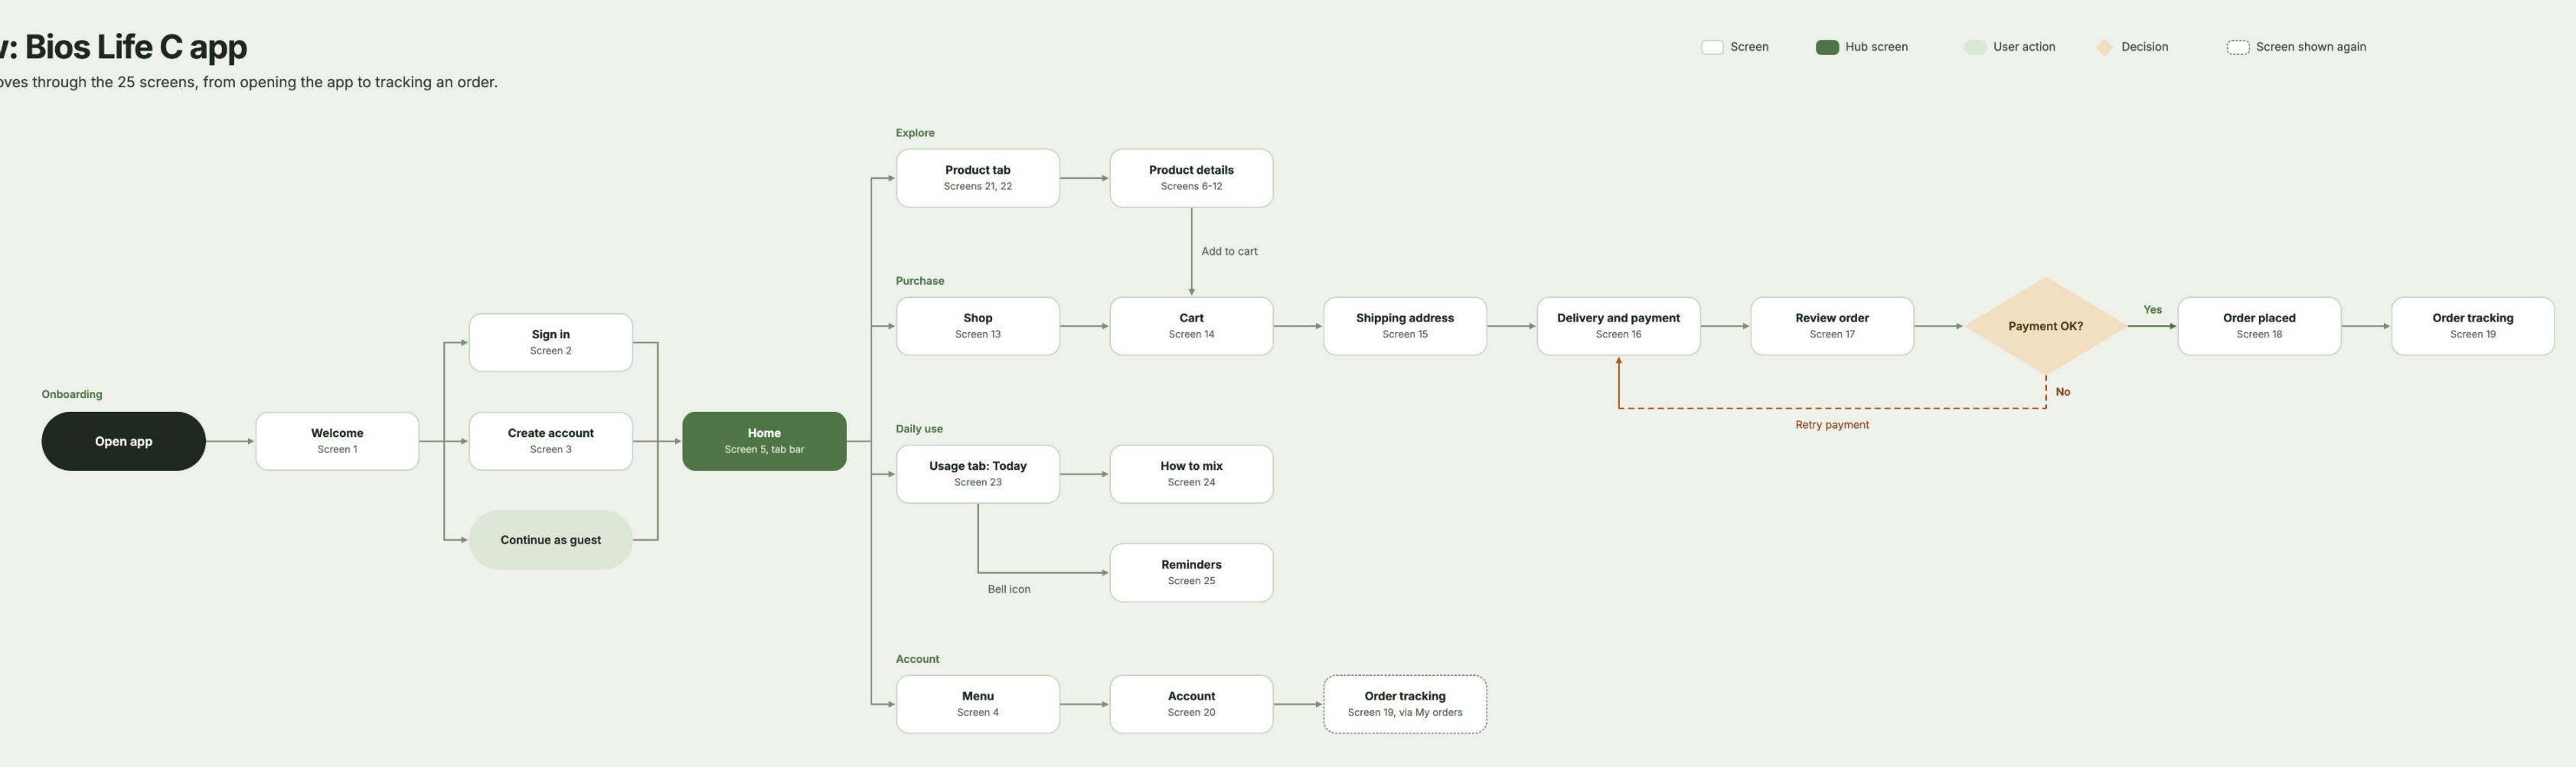
Scenario: **Learns about Bios Life C, buys a box, takes it 3 times a day**

Note: **Questions and emotions are hypotheses to test with real customers**

	Stage 1 **Discover** First contact with the product	Stage 2 **Learn** Understand what it does	Stage 3 **Evaluate** Check ingredients and safety	Stage 4 **Join** Create an account	Stage 5 **Buy** From cart to order placed	Stage 6 **Receive** Wait for delivery	Stage 7 **Use daily** Build the 3-a-day habit	Stage 8 **Reorder** Stay supplied and supported
Goal What they want	Find a simple, natural way to support healthy cholesterol.	Know how Bios Life C works and what it does for me.	Be sure it is safe for me and my medication.	Get access to ordering with little effort.	Pay a clear price with a familiar payment method.	Know when my order will arrive.	Take it at the right time, 3 times a day, without forgetting.	Reorder before running out, and get help when needed.
Actions What they do	Hears about it from a member, opens the app and scans the home screen.	Plays the video, reads features, benefits and how it works, browses photos.	Reads key ingredients and supplement facts, checks the warnings.	Signs in, creates an account or continues as a guest.	Adds to cart, enters an address, picks delivery and payment, reviews, places the order.	Opens order tracking, calls support if something looks wrong.	Follows the mix steps, ticks off each serving, logs water, sets reminders.	Opens My orders to buy again, contacts support from Menu or Account.
Screens Touchpoints in the app	1 Welcome 5 Home	6 Description 7 Features 9 Benefits 10 How it works 21 Product 22 Photos	11 Key ingredients 12 Supplement facts	2 Sign in 3 Create account 4 Menu	13 Shop 14 Cart 15 Shipping 16 Payment 17 Review 18 Order placed	19 Order tracking	8 Usage 23 Today 24 How to mix 25 Reminders	20 Account 4 Menu 19 Order tracking
Questions What they may ask	*"What is this, and is it natural?"*	*"How can fiber help my cholesterol?"*	*"Can I take it with my medicine?"*	*"Do I have to be a member to buy?"*	*"How much is shipping, and can I pay by QR?"*	*"Where is my order now?"*	*"When exactly should I drink it?"*	*"When will this box run out?"*
Emotion Expected, to validate	Curious	Interested	Unsure	Friction	Confident	Waiting	In control	Loyal
Pain points Seen on today's product page	The key message sits inside a long desktop page, with small text on a phone.	Long paragraphs at one text weight, and no quick facts to scan.	The ingredient list is cut off mid-word, and the facts table is an image.	Enroll and register links are tucked into the header and footer.	The page offers only a Shop link; checkout steps and costs aren't visible up front.	Help is limited to a phone number and email in the footer.	Timing rules (5-10 min before meals, 1 h or 4 h apart from medication) are buried in text.	Nothing tells customers how long a box lasts or when to reorder.
Design response How the app answers	First screen states "all-natural fiber drink" with price and Shop; guest option on Welcome.	Video first, short cards and accordions, quick facts: 60 packets, 15 calories, 3.2 g fiber.	Ingredients grouped into 4 sets; facts as a readable text table; caution card for medication.	Clear Create account, Sign in and Continue as guest; Sponsor ID optional.	3-step progress bar, running total in the action bar, Edit links on the review screen.	5-step timeline with estimated delivery and the support number on the same screen.	Daily tracker, How to mix steps, and meal reminders 5 or 10 minutes before.	My orders in Account and Menu. Next idea: a reorder reminder, since 60 packets last about 20 days at 3 a day.

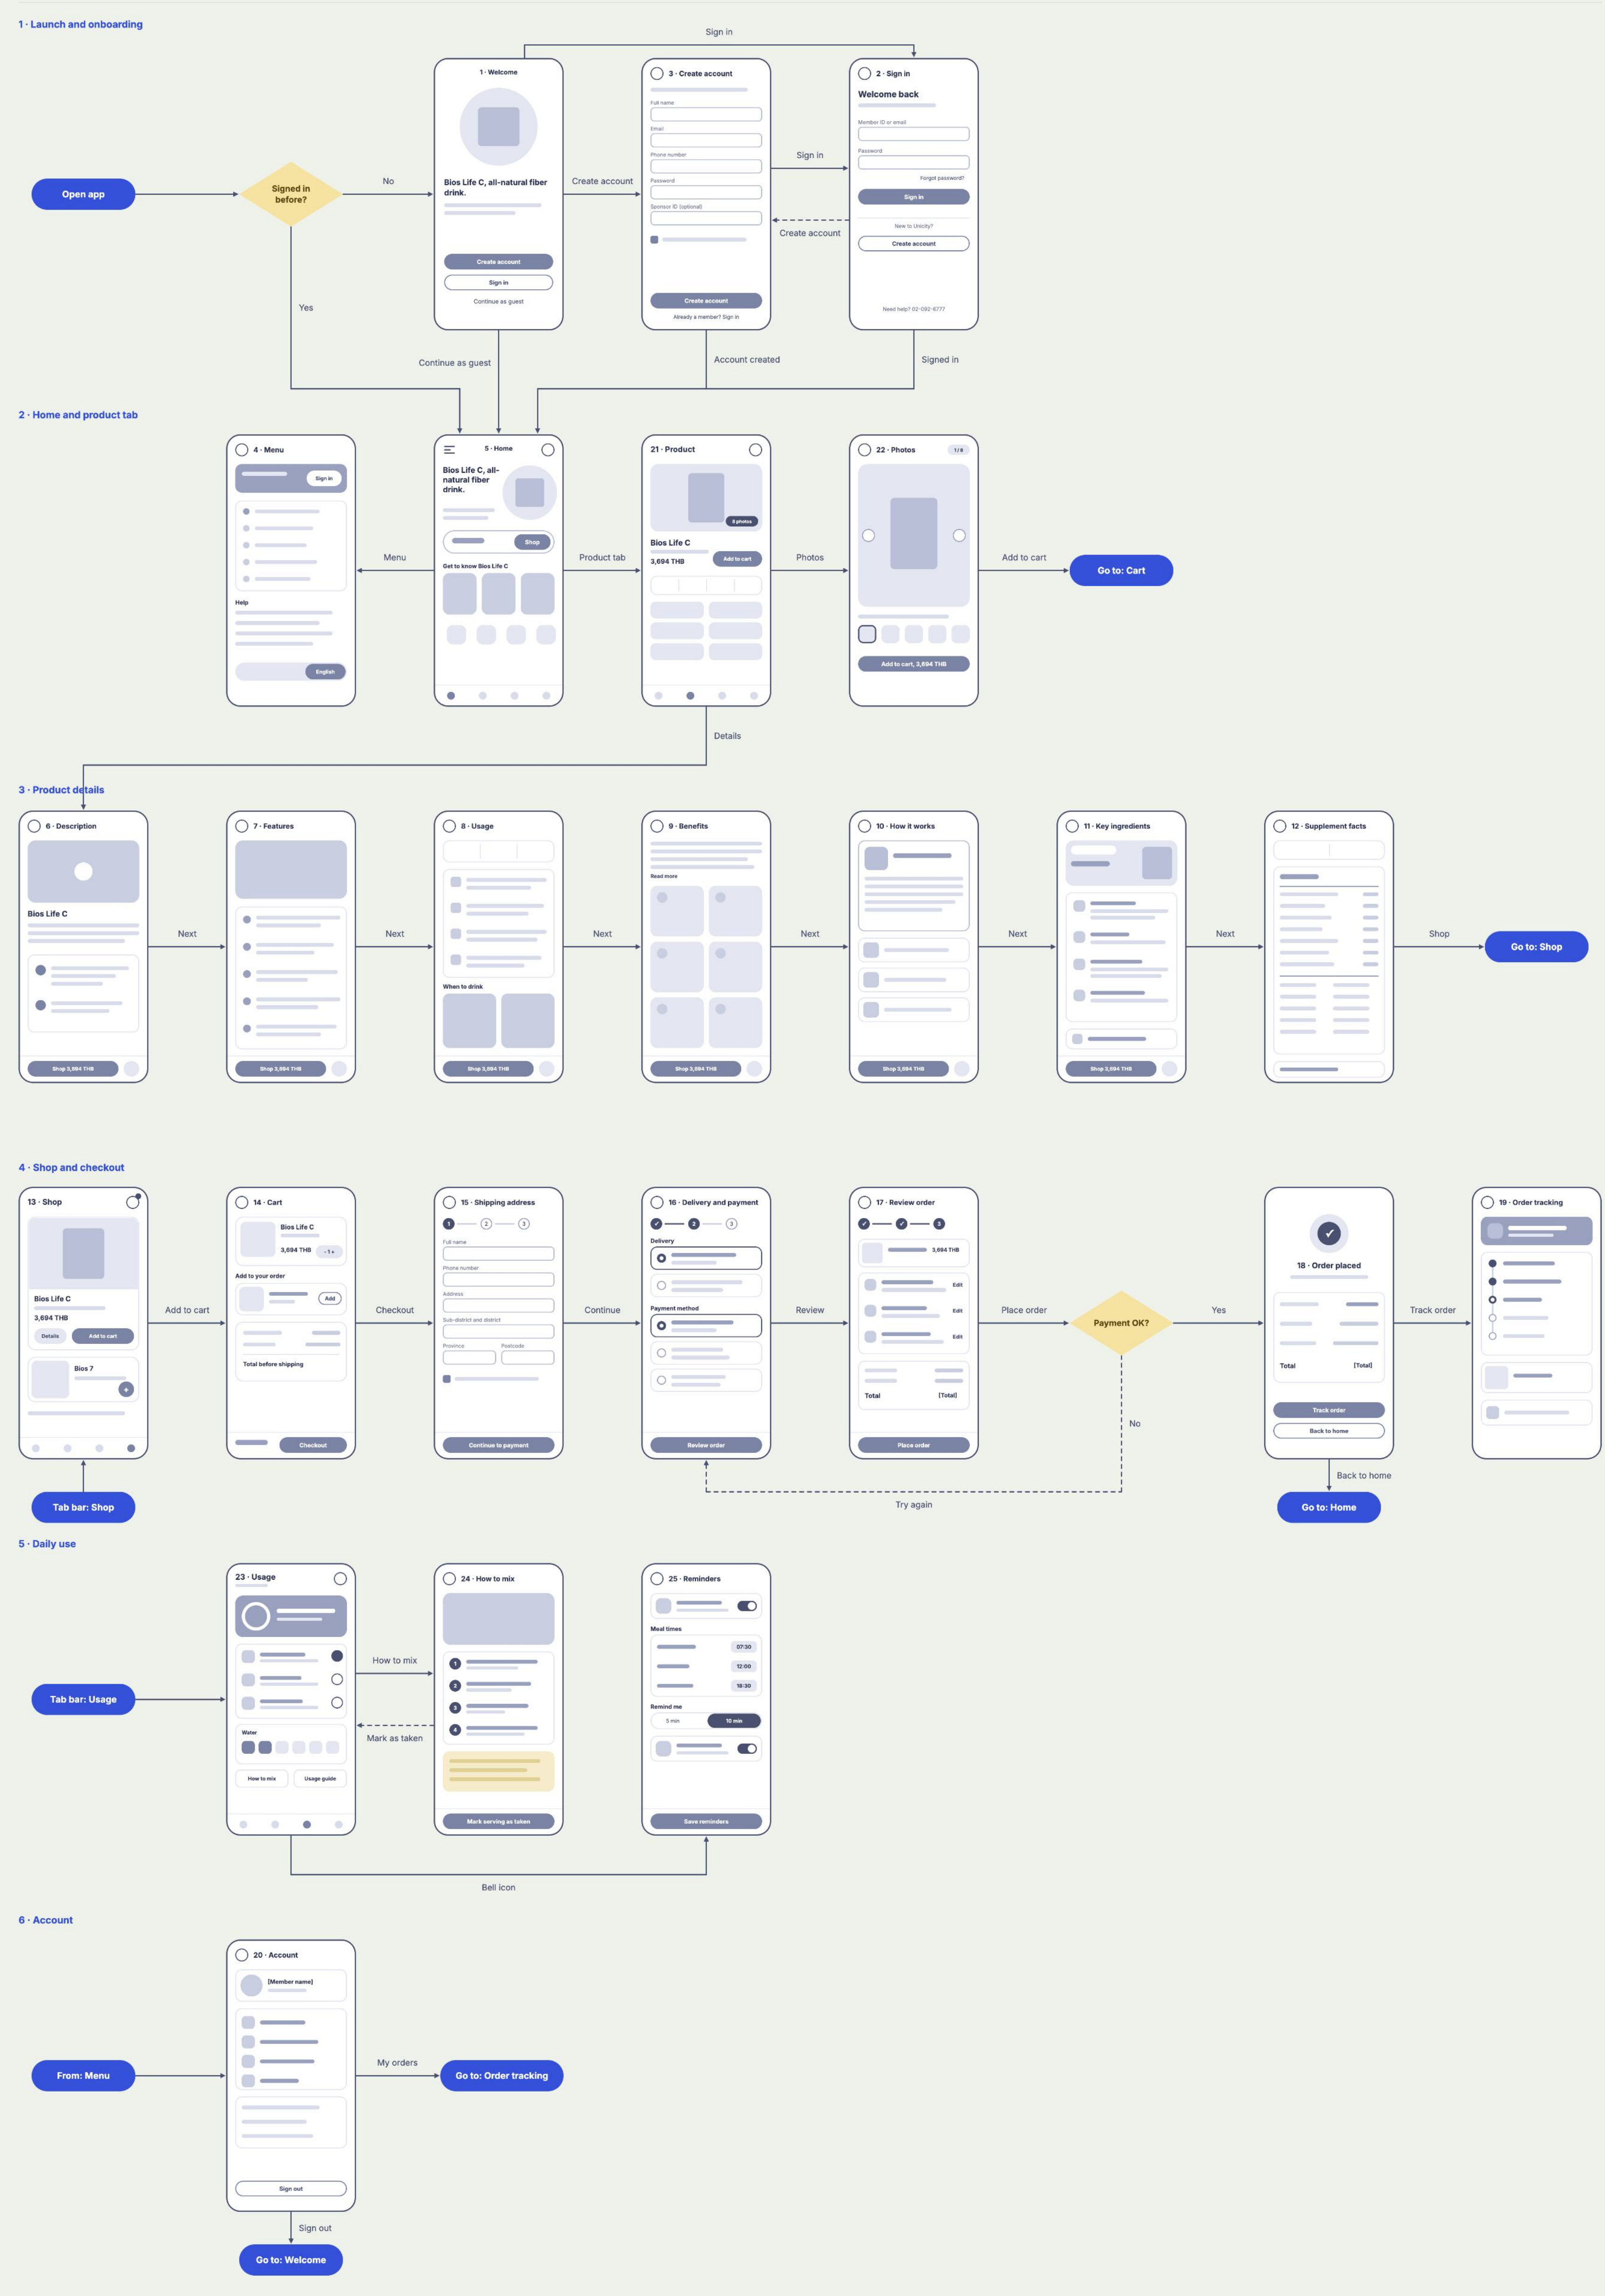
User flow: Bios Life C app

How a customer moves through the 25 screens, from opening the app to tracking an order.

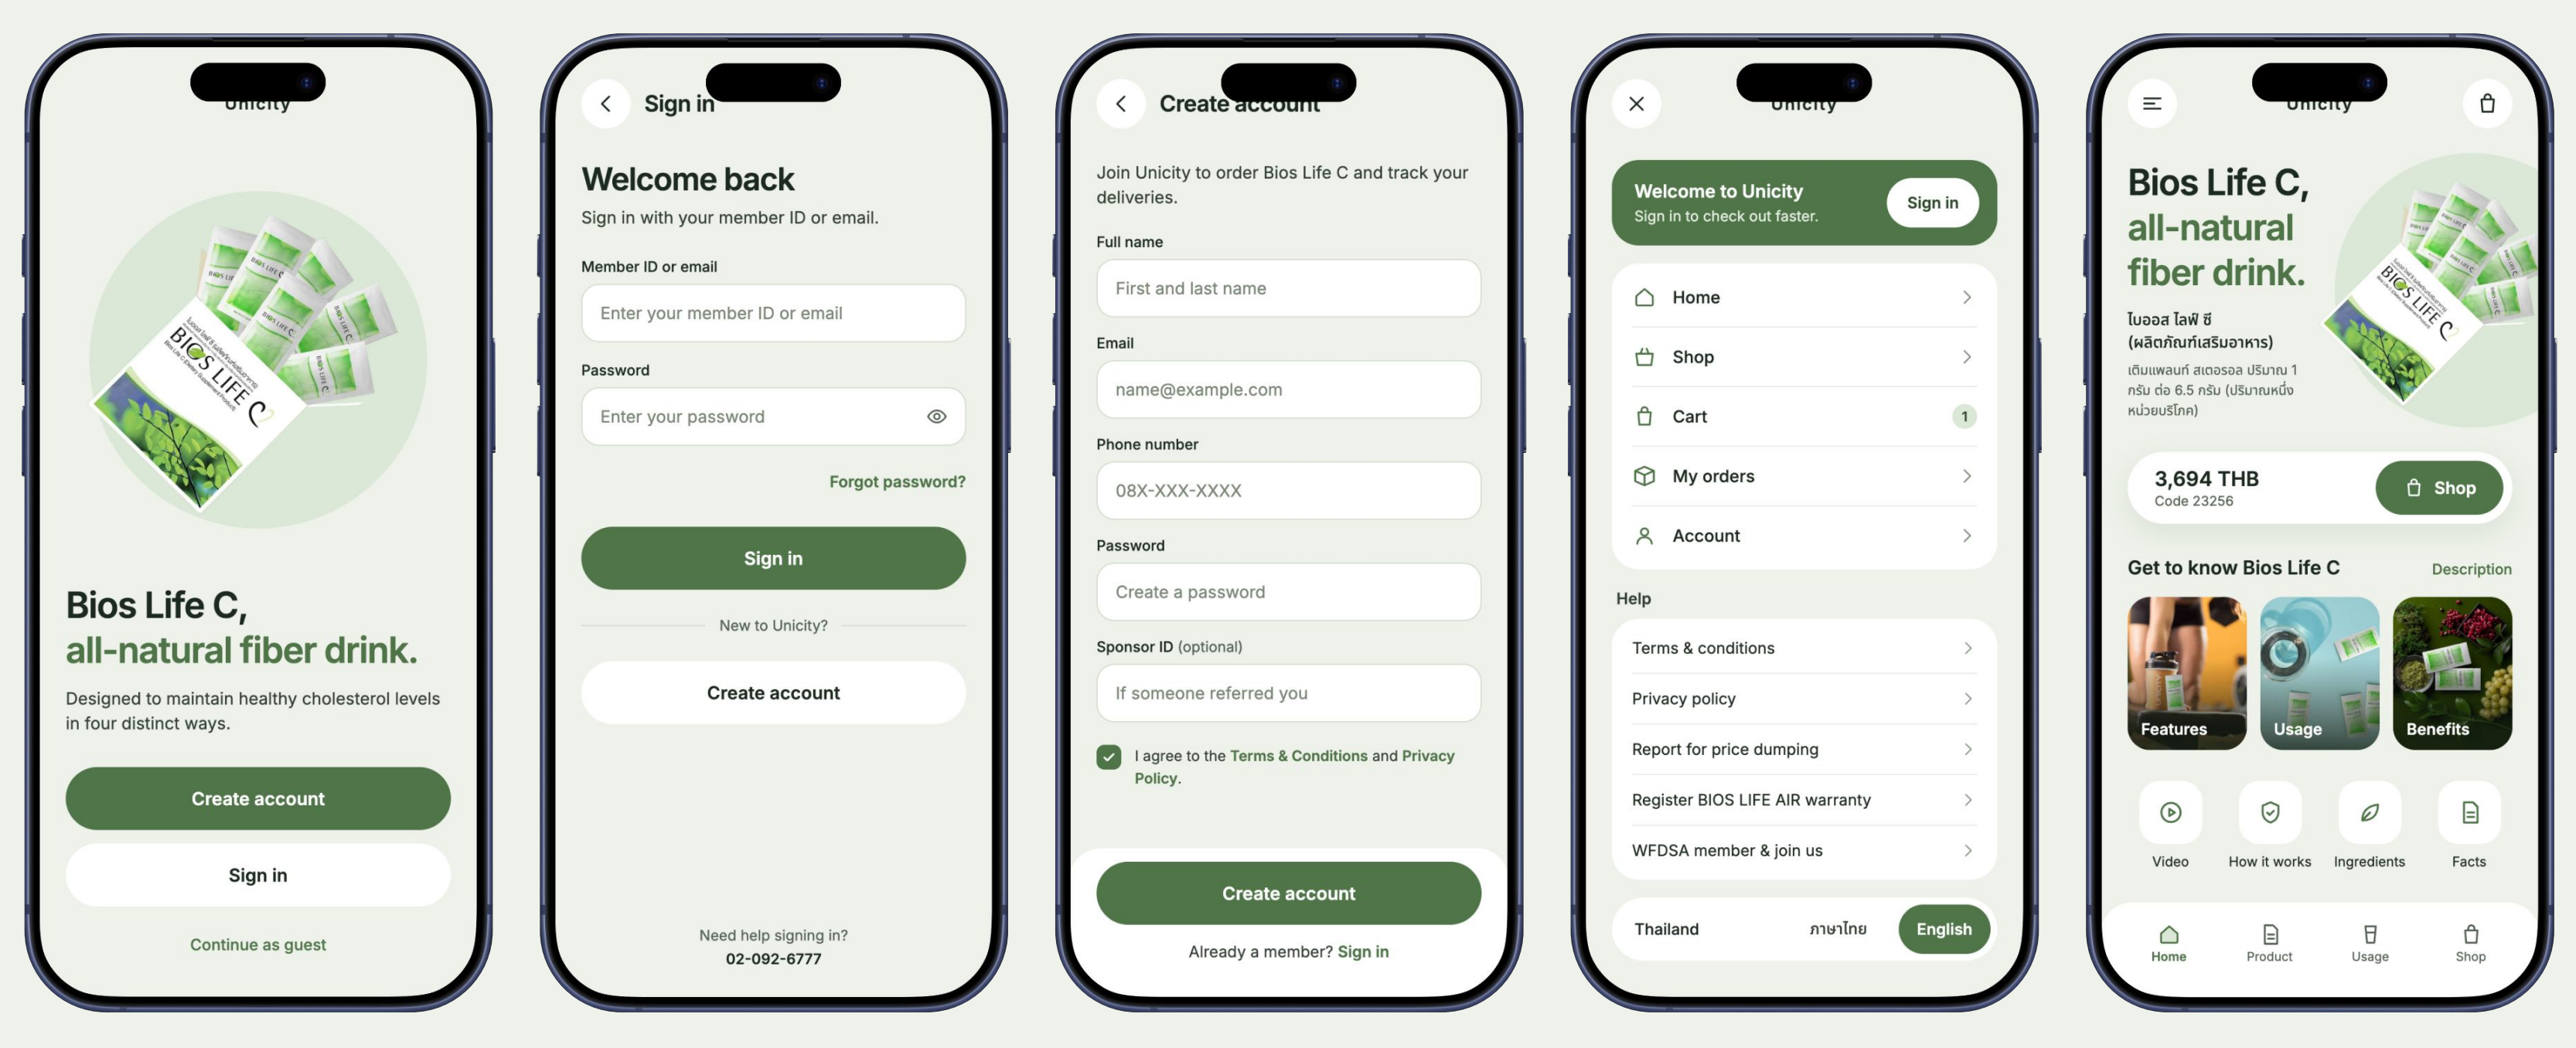


Wireframes

Wireframes for the Bios Life C app: 25 screens covering onboarding, product, checkout, daily use and account. Each arrow shows what a tap opens.



The bottom tab bar (Home, Product, Usage, Shop) opens those screens from any screen that shows it. "Go to" pills jump to a screen drawn elsewhere on this board.



Bios Life C, all-natural fiber drink.

Designed to maintain healthy cholesterol levels in four distinct ways.

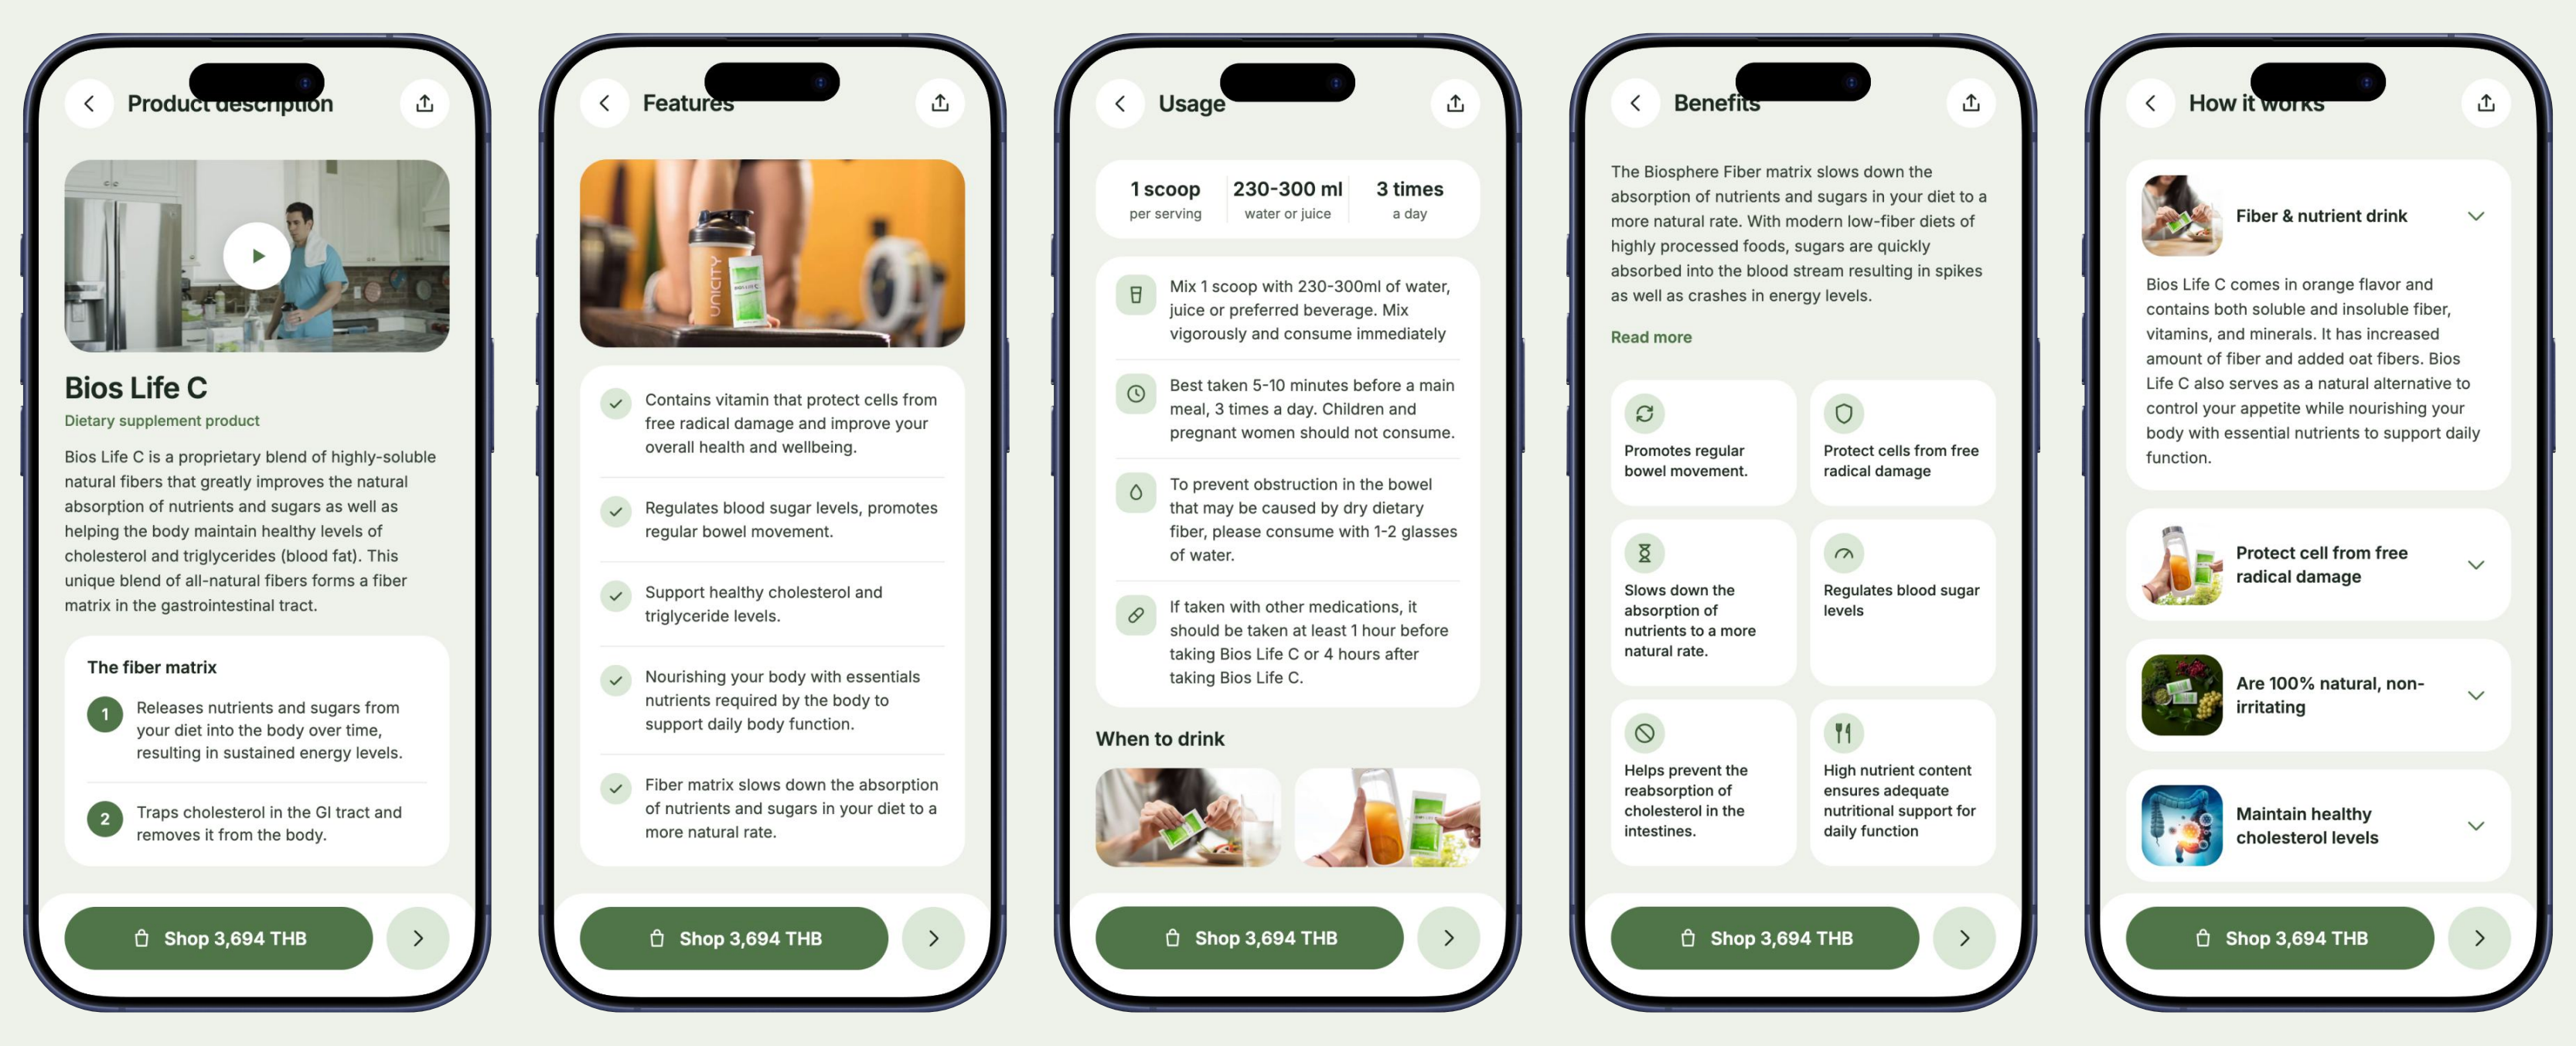
Get to know Bios Life C



Bios Life C

Dietary supplement product

Bios Life C is a proprietary blend of highly-soluble natural fibers that greatly improves the natural absorption of nutrients and sugars as well as helping the body maintain healthy levels of cholesterol and triglycerides (blood fat). This unique blend of all-natural fibers forms a fiber matrix in the gastrointestinal tract.

The fiber matrix

1. Releases nutrients and sugars from your diet into the body over time, resulting in sustained energy levels.
2. Traps cholesterol in the GI tract and removes it from the body.

- Contains vitamin that protect cells from free radical damage and improve your overall health and wellbeing.
- Regulates blood sugar levels, promotes regular bowel movement.
- Support healthy cholesterol and triglyceride levels.
- Nourishing your body with essentials nutrients required by the body to support daily body function.
- Fiber matrix slows down the absorption of nutrients and sugars in your diet to a more natural rate.

1 scoop per serving · 230-300 ml water or juice · 3 times a day

- Mix 1 scoop with 230-300ml of water, juice or preferred beverage. Mix vigorously and consume immediately
- Best taken 5-10 minutes before a main meal, 3 times a day. Children and pregnant women should not consume.
- To prevent obstruction in the bowel that may be caused by dry dietary fiber, please consume with 1-2 glasses of water.
- If taken with other medications, it should be taken at least 1 hour before taking Bios Life C or 4 hours after taking Bios Life C.

When to drink

The Biosphere Fiber matrix slows down the absorption of nutrients and sugars in your diet to a more natural rate. With modern low-fiber diets of highly processed foods, sugars are quickly absorbed into the blood stream resulting in spikes as well as crashes in energy levels.

- Promotes regular bowel movement.
- Protect cells from free radical damage
- Slows down the absorption of nutrients to a more natural rate.
- Regulates blood sugar levels
- Helps prevent the reabsorption of cholesterol in the intestines.
- High nutrient content ensures adequate nutritional support for daily function

Fiber & nutrient drink

Bios Life C comes in orange flavor and contains both soluble and insoluble fiber, vitamins, and minerals. It has increased amount of fiber and added oat fibers. Bios Life C also serves as a natural alternative to control your appetite while nourishing your body with essential nutrients to support daily function.

Protect cell from free radical damage

Are 100% natural, non-irritating

Maintain healthy cholesterol levels
