CAREWELL · UX RESEARCH

Understanding families who manage serious illness together

A four-week discovery plan for a family health app, focused on cancer care. It sets out what we need to learn, how we will learn it, and the assumptions the journey map and design currently rest on.

Status: plan & assumptions. Nothing below is a finding yet. Hypotheses and themes are to be validated in research.

GOAL 1

How do caregivers find and judge treatment options and specialists?

Sources they trust, what makes them doubt, how cost and insurance shape the choice.

GOAL 2

Where do booking, visits and follow-up break down today?

Phone queues, waiting rooms, lost paperwork, unclear lab results, missed doses.

GOAL 3

How is care shared between the patient and family members?

Who decides, who books, who reminds, and what each person is comfortable doing on a phone.

Methods

Method		Sample = target
In-depth interviews	Family caregivers and patients in active treatment, 60 min, remote or at home	8 + 4
Contextual inquiry	Shadow a clinic visit: check-in, waiting, consultation, pharmacy	3 visits
Stakeholder interviews	Oncologists, nurses, front-desk staff on what slows care down	5
Diary study	Two weeks of medication, symptoms and appointments via chat app	6
Competitive review	Hospital apps, telemedicine and pharmacy apps used locally	6 apps
Usability testing	Prototype S01–S24, two rounds, think-aloud	5 × 2

W1 Plan & recruit · W2 Interviews · W3 Diary & clinic · W4 Synthesis

Who we recruit

- Adults 25–45 caring for a parent with a serious or chronic illness
- Patients 50–70 currently in treatment (chemo, cardiac, diabetes)
- Mix of Bangkok and regional cities; public and private hospitals
- At least 3 participants with low smartphone confidence
- Exclude: people working in healthcare IT

Hypotheses to validate

H1 Caregivers book more of the patient's visits than the patient does.

H2 Unclear cost and insurance is the main reason people delay booking.

H3 Lab reports cause anxiety mainly because they are hard to read.

H4 Older patients accept reminders but not complex forms.

How might we…

- …help a worried caregiver know the next step within minutes?
- …make price and coverage clear before booking?
- …turn a lab report into something a family can act on?
- …let one person manage care for several family members?

Success measures

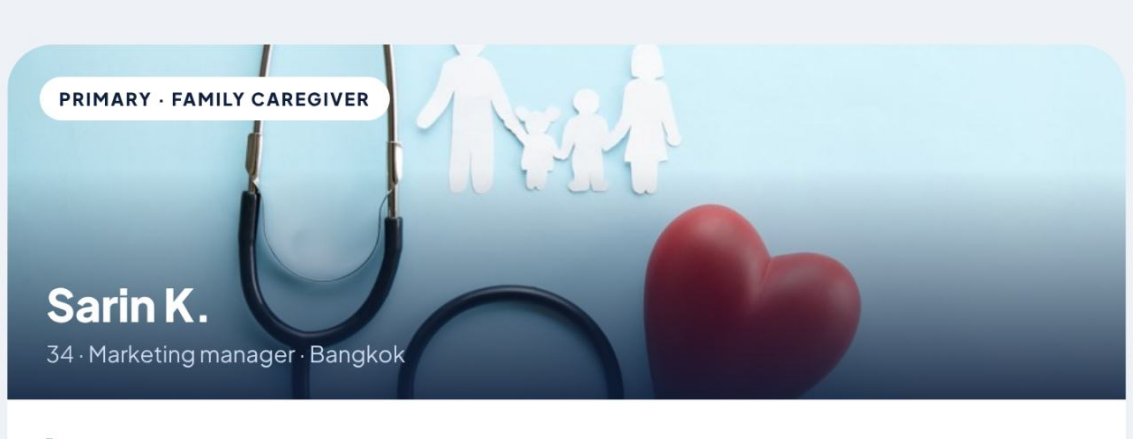
Task success Book a visit unaided	**Time on task** Search → booked
SUS score Per test round	**Confidence** Self-rated, 1–5

CAREWELL · PERSONAS

One family, three ways of using health care

The app is designed around the caregiver who coordinates, while staying simple enough for the patients she cares for.

Proto-personas. Built from assumptions and the journey map; to be revised after interviews in the research plan.



Sarin K.

34 · Marketing manager · Bangkok

> "I'm the one who books, pays and remembers everything for Mom. I need it all in one place."

Only child managing her mother's chemotherapy around a full-time job. Plans on her phone at lunch and late at night.

GOALS	FRUSTRATIONS
Book the right specialist fast	Phone queues and repeat paperwork
See costs and coverage up front	Lab reports she can't interpret
Track Mom's meds, results and visits	Juggling apps from three hospitals

BEHAVIOURS

- Researches online and in LINE groups
- Pays by card or mobile banking
- Shares updates with relatives

Digital confidence ●●●●●

Key screens · S04 Home · S06 Find · S10 Booking · S19 Results · S22 Records

Malee K.

62 · Retired teacher · in chemotherapy

> "I want to feel in control of my treatment, not like a burden on my daughter."

Mid-way through a chemotherapy course. Tired after sessions; uses her phone for LINE and video calls with family.

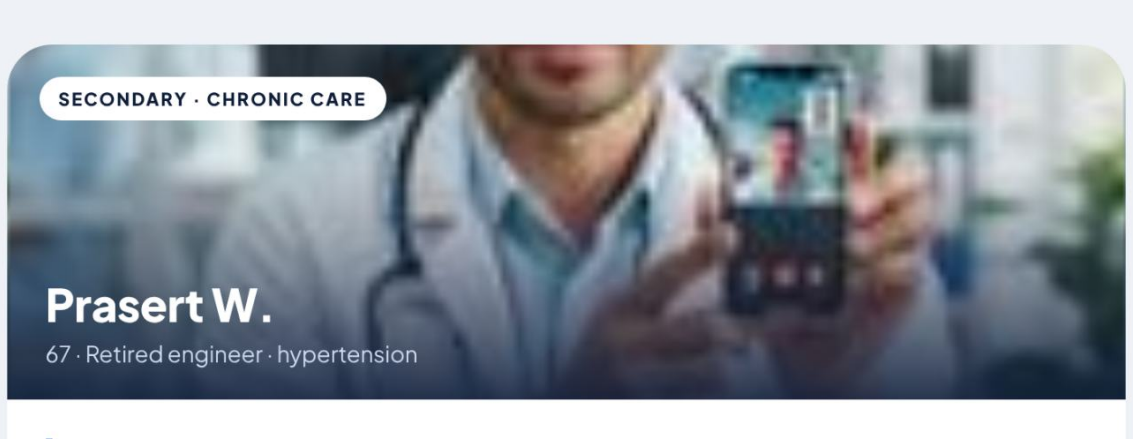
GOALS	FRUSTRATIONS
Know what comes next in treatment	Long waits on treatment days
Ask her care team questions easily	Small text and dense forms
Never miss a dose	Side effects that worry her at night

BEHAVIOURS

- Prefers large text and voice
- Calls rather than types
- Relies on daily reminders

Digital confidence ●●○○○

Key screens · S14 Notifications · S16 Queue · S17 Telemed · S18 Chat · S21 Meds



Prasert W.

67 · Retired engineer · hypertension

> "Just tell me my numbers and when to see the doctor. I don't need anything else."

Manages blood pressure with daily medication and quarterly check-ups. Values clear facts and dislikes clutter.

GOALS	FRUSTRATIONS
Log blood pressure simply	Too many steps to do one thing
Refill prescriptions on time	Unclear trends in his readings
Keep check-ups regular	Forgetting refill dates

BEHAVIOURS

- Checks readings every morning
- Uses one or two apps at most
- Wants paper-like summaries

Digital confidence ●●●○○

CAREWELL · CUSTOMER JOURNEY MAP

From worry to continuous, connected care

Scenario: Sarin needs to find trusted chemotherapy care for her mother, book a consultation, and keep track of the whole family's health — all in one app.

PERSONA

Sarin, 34

Office worker · Bangkok · Tech-savvy but short on time

"I want information I can trust, booking that's easy, and Mom's health and mine in one place."

	01 Awareness	02 Consideration	03 Booking	04 Service	05 Post-care	06 Loyalty
Goals	Understand Mom's symptoms and know where to start	Compare treatments, doctors and costs	Book a consultation at the most convenient time	Arrive on time and avoid long waits	Understand results and follow the care plan	Track the whole family's health long-term
Actions	Googles symptoms, asks friends, sees an app ad on social	Downloads the app, signs up, searches "chemotherapy", filters	Reads details, picks a doctor, date and time, pays	Gets a reminder, checks in by QR or joins a video call	Reviews lab results and prescription, sets pill reminders	Logs vitals, books follow-ups, leaves a review
Touchpoints	Search Social Family	App Store Onboarding Search	Detail Calendar Payment	Push QR Check-in Telemed	Lab results Meds Chat	Health Overview Family profile
Thinking	*"Does she need to see a specialist for this?"*	*"Which doctor is the expert — and how much will it cost?"*	*"So much easier than calling the hospital."*	*"How long until it's our turn?"*	*"What does this number on the report mean?"*	*"Everything in one app — I feel so much calmer."*
Emotion						
Pain points	Scattered online info of unclear reliability	Opaque pricing, few doctor reviews	Long forms, unsure about insurance coverage	Long waits with no visibility of the queue	Lab reports are hard to read; missed doses	Switching between apps to care for several people
Opportunities	**AI Symptom Checker** + doctor-reviewed articles	**Treatment cards** filters, from-price and ratings	**3-step booking** auto insurance check	**Live queue** + directions to hospital	**Plain-language results** + medication reminders	**Family profiles** + weekly Health Overview

This is general guidance, not a diagnosis. In an emergency, call 1669.

Hi! Tell me what symptoms you're worried about. Is it for you or a family member?

For my mom. She's tired, losing weight, and has a lump on her neck for about a month.

Thank you for sharing. These symptoms should be checked by a specialist soon.

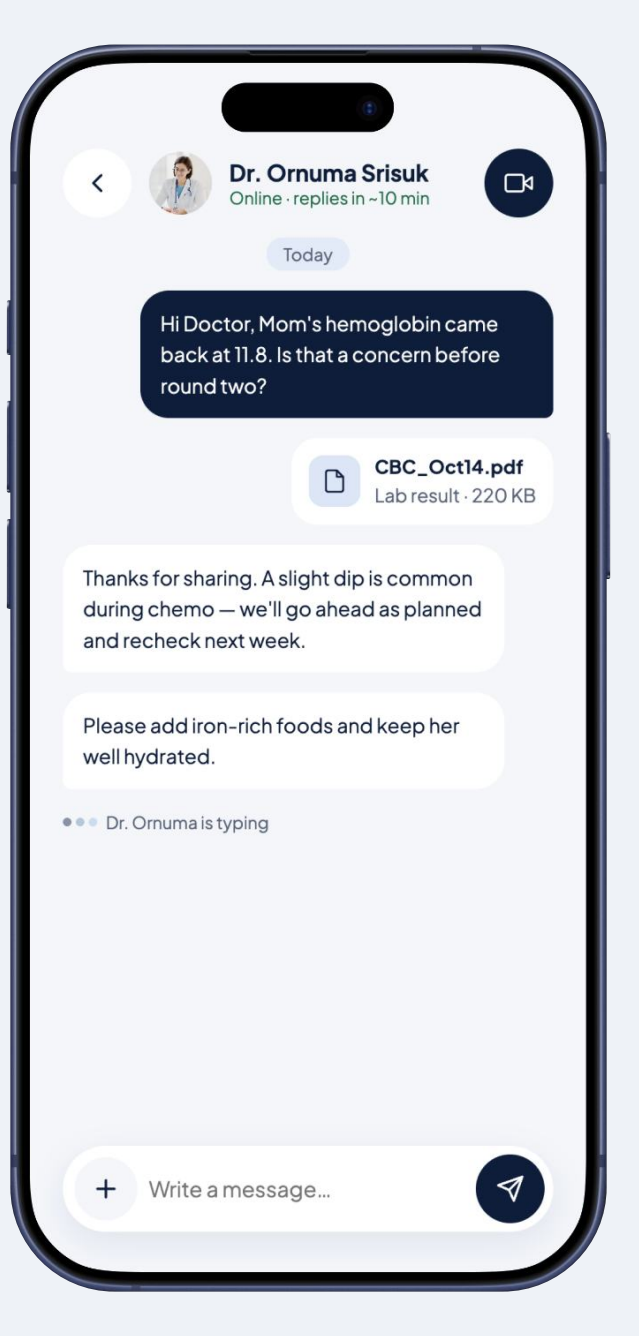
"Her blood count is improving — we can start round two next week."



Dr. Ornuma Srisuk
Online · replies in ~10 min

Today

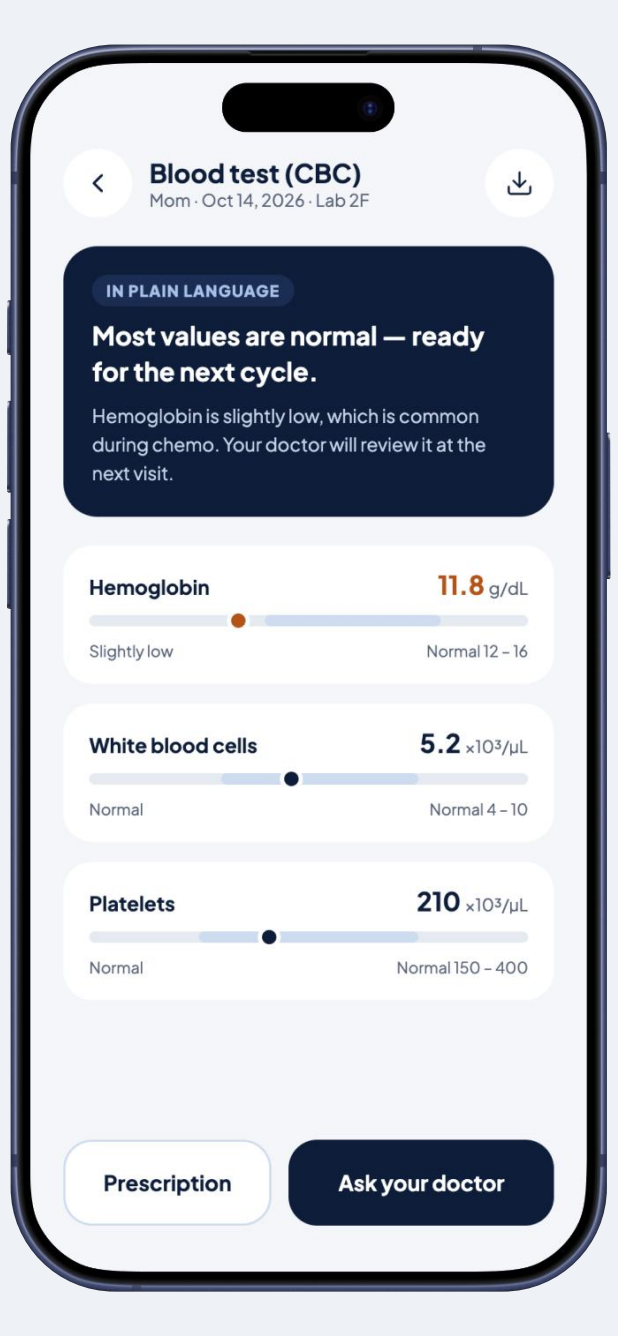
Hi Doctor, Mom's hemoglobin came back at 11.8. Is that a concern before round two?

CBC_Oct14.pdf
Lab result · 220 KB

Thanks for sharing. A slight dip is common during chemo — we'll go ahead as planned and recheck next week.

Please add iron-rich foods and keep her well hydrated.

Dr. Ornuma is typing



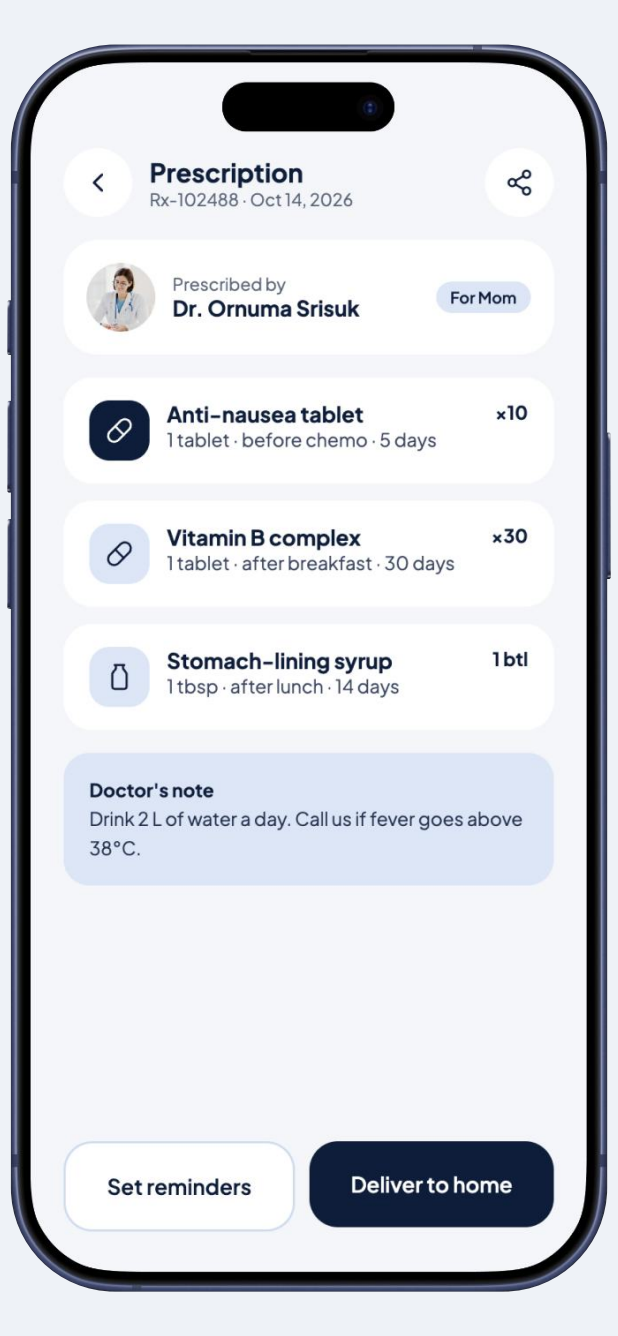
Blood test (CBC)
Mom · Oct 14, 2026 · Lab 2F

IN PLAIN LANGUAGE

Most values are normal — ready for the next cycle.

Hemoglobin is slightly low, which is common during chemo. Your doctor will review it at the next visit.

Hemoglobin	11.8 g/dL	Slightly low	Normal 12 – 16
White blood cells	5.2 ×10³/µL	Normal	Normal 4 – 10
Platelets	210 ×10³/µL	Normal	Normal 150 – 400



Prescription
Rx-102488 · Oct 14, 2026

Prescribed by Dr. Ornuma Srisuk — For Mom

Anti-nausea tablet 1 tablet · before chemo · 5 days	×10
Vitamin B complex 1 tablet · after breakfast · 30 days	×30
Stomach-lining syrup 1 tbsp · after lunch · 14 days	1 btl

Doctor's note
Drink 2 L of water a day. Call us if fever goes above 38°C.
