SKINCARE SHOP APP · UX

UX Research Plan

What we need to learn from customers before building, and how we will learn it.

OBJECTIVE

Make reordering and buying skincare in the app faster and more confident for Associate members and new customers.

Inputs so far: the redesigned screens, the user flow and the customer journey map. None of these have been tested with real customers yet.

RESEARCH QUESTIONS

1. How do members decide what to reorder, and how often?
2. How do customers tell similar Neigene Evolution products apart?
3. What information do they need before buying a product?
4. How important is PV to members, and when do they check it?
5. Where do people drop out between cart and payment?

HYPOTHESES TO TEST

- A “Buy again” row will cut reorder time.
- Filtering by skin concern helps more than filtering by category.
- Benefits and usage steps on Product Detail raise confidence.
- A PV progress bar in the cart increases order size.
- Clear payment errors reduce abandoned orders.

Methods

1

Stakeholder interviews

Goal: learn business goals, order data and known complaints.

Who: 3–4 people from sales, support and marketing.

Output: success metrics and constraints.

2

Customer interviews

Goal: understand routines, reorder habits and how PV matters to them.

Who: 8–10 members and new customers, 45 min each.

Output: affinity map, updated personas.

3

Usability testing

Goal: find where people get stuck in the prototype.

Who: 5–6 people per round, 2 rounds, moderated.

Output: issue list ranked by severity.

4

Survey + analytics

Goal: check how common the interview findings are.

Who: short survey to members; review existing order and site data.

Output: priorities backed by numbers.

Interview guide

Customer interviews, about 45 minutes

1. Tell me about your skincare routine today.
2. Walk me through the last time you ordered skincare. What happened first?
3. How do you decide which product to buy or reorder?
4. What do you check before you add something to your cart?
5. What role does PV play when you order? When do you check it?
6. Tell me about a time ordering went wrong. What did you do?
7. If you could change one thing about ordering, what would it be?

Usability test tasks

Run on the clickable prototype on this canvas

#	TASK	SCREENS	SUCCESS LOOKS LIKE
1	Find Multiple Cream and check your member price.	Home → Our Products → Detail	Finds the price without help in under 1 minute.
2	Find a product for dry skin.	Search, Filter & Sort	Picks a product and explains why it fits.
3	Add two items, change a quantity and read your total PV.	Detail → Cart	States the correct total PV.
4	Check out to a new address.	Checkout → Address → Payment	Places the order with no errors.
5	Your card was declined. Finish the order.	Payment Failed → Payment	Retries or switches method without giving up.
6	Find out where your last order is.	Profile → Order Tracking	Reads the current status in under 30 seconds.
7	Turn off promotion notifications.	Profile → Settings	Finds and turns off the setting first try.

PARTICIPANTS

- Associates who ordered in the last 3 months
- Mix of new (under 6 months) and long-time members
- New customers referred by a member
- Mostly shop on their phone
- Market: [country / language]

WHAT WE MEASURE

- Task success rate
- Time on task
- Errors and wrong turns
- Ease rating after each task (1–7)
- System Usability Scale (SUS) at the end

TIMELINE

Week 1 Plan, recruit, stakeholder interviews
Week 2 Customer interviews
Week 3 Usability test, round 1
Week 4 Fix the top issues in the design
Week 5 Round 2, final report

DELIVERABLES

- Affinity map of interview notes
- Validated personas
- Journey map, version 2
- Issue list ranked by severity
- Updated screens on this canvas

Findings

SKINCARE SHOP APP · UX

Personas

Three proto-personas: our current assumptions about who uses the app. Validate them in the research plan before relying on them.

PERSONA 1 · PRIMARY

The Loyal Reorderer

[Name], [age] · Associate member, 2+ years

“I know exactly what I want. Just let me reorder it.”

GOALS

- Reorder her usual products in a few taps
- Always get the member price
- Reach her monthly PV target

FRUSTRATIONS

- Searching for the same products every month
- Shipping cost appears only at the end
- Payment errors that don’t explain why

BEHAVIOURS

- Shops on her phone in the evening
- Knows products by name
- Orders 2–4 items at a time

NEEDS FROM THE APP

- “Buy again” on Home
- PV progress in the cart
- Saved address and card

PROFILE (ASSUMED)

KEY SCREENS

Home · Cart · Order Tracking

PERSONA 2 · SECONDARY

The Curious First-timer

[Name], [age] · New customer, referred by a friend

“They all say Neigene Evolution. Which one is for my skin?”

GOALS

- Find the right product for her skin concern
- Trust the brand before spending
- Start with a small first order

FRUSTRATIONS

- Product names look alike
- No benefits, ingredients or reviews
- Unsure how membership and prices work

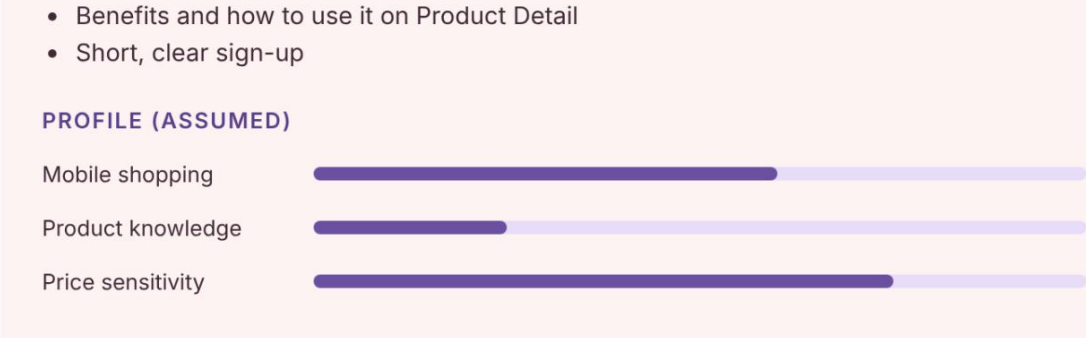
BEHAVIOURS

- Reads ingredients and compares online
- Asks the friend who referred her on chat
- Leaves if sign-up feels long

NEEDS FROM THE APP

- Filter by skin type and concern
- Benefits and how to use it on Product Detail
- Short, clear sign-up

PROFILE (ASSUMED)



KEY SCREENS

Search · Product Detail · Create account

PERSONA 3 · SECONDARY

The Busy Distributor

[Name], [age] · Associate who orders for others

“I need to check my PV and send this to a customer, in one minute.”

GOALS

- Track PV for herself and her team
- Order for family and customers
- Share product info quickly

FRUSTRATIONS

- No easy way to share a product
- Hard to follow several orders at once
- Re-entering different delivery addresses

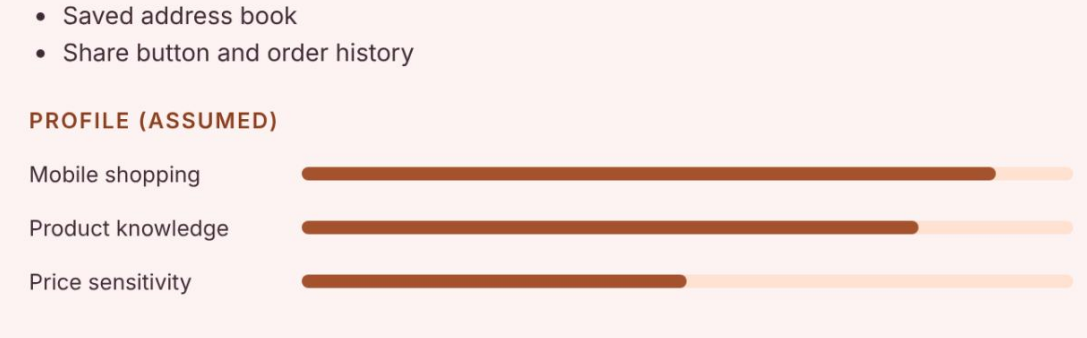
BEHAVIOURS

- Uses the app many times a day, in short bursts
- Ships to several addresses
- Watches the PV deadline each month

NEEDS FROM THE APP

- PV dashboard on Profile
- Saved address book
- Share button and order history

PROFILE (ASSUMED)



KEY SCREENS

Profile · Delivery Address · Order Tracking

These are proto-personas built from the current design, not from research. Names, ages and profile bars are placeholders or guesses. Update them after the customer interviews in the UX Research Plan.

SKINCARE SHOP APP · UX

Customer Journey Map

One Associate member reordering skincare, from opening the app to the next reorder.

PERSONA

[Persona name], [age]

Associate member who reorders Neigene Evolution skincare every month and tracks her PV.

Needs: member prices, fast reorder, clear PV and delivery info.

SCENARIO

She is running low on Multiple Cream and wants to reorder it, try a new serum, and place the order before her monthly PV deadline.

HOW TO READ

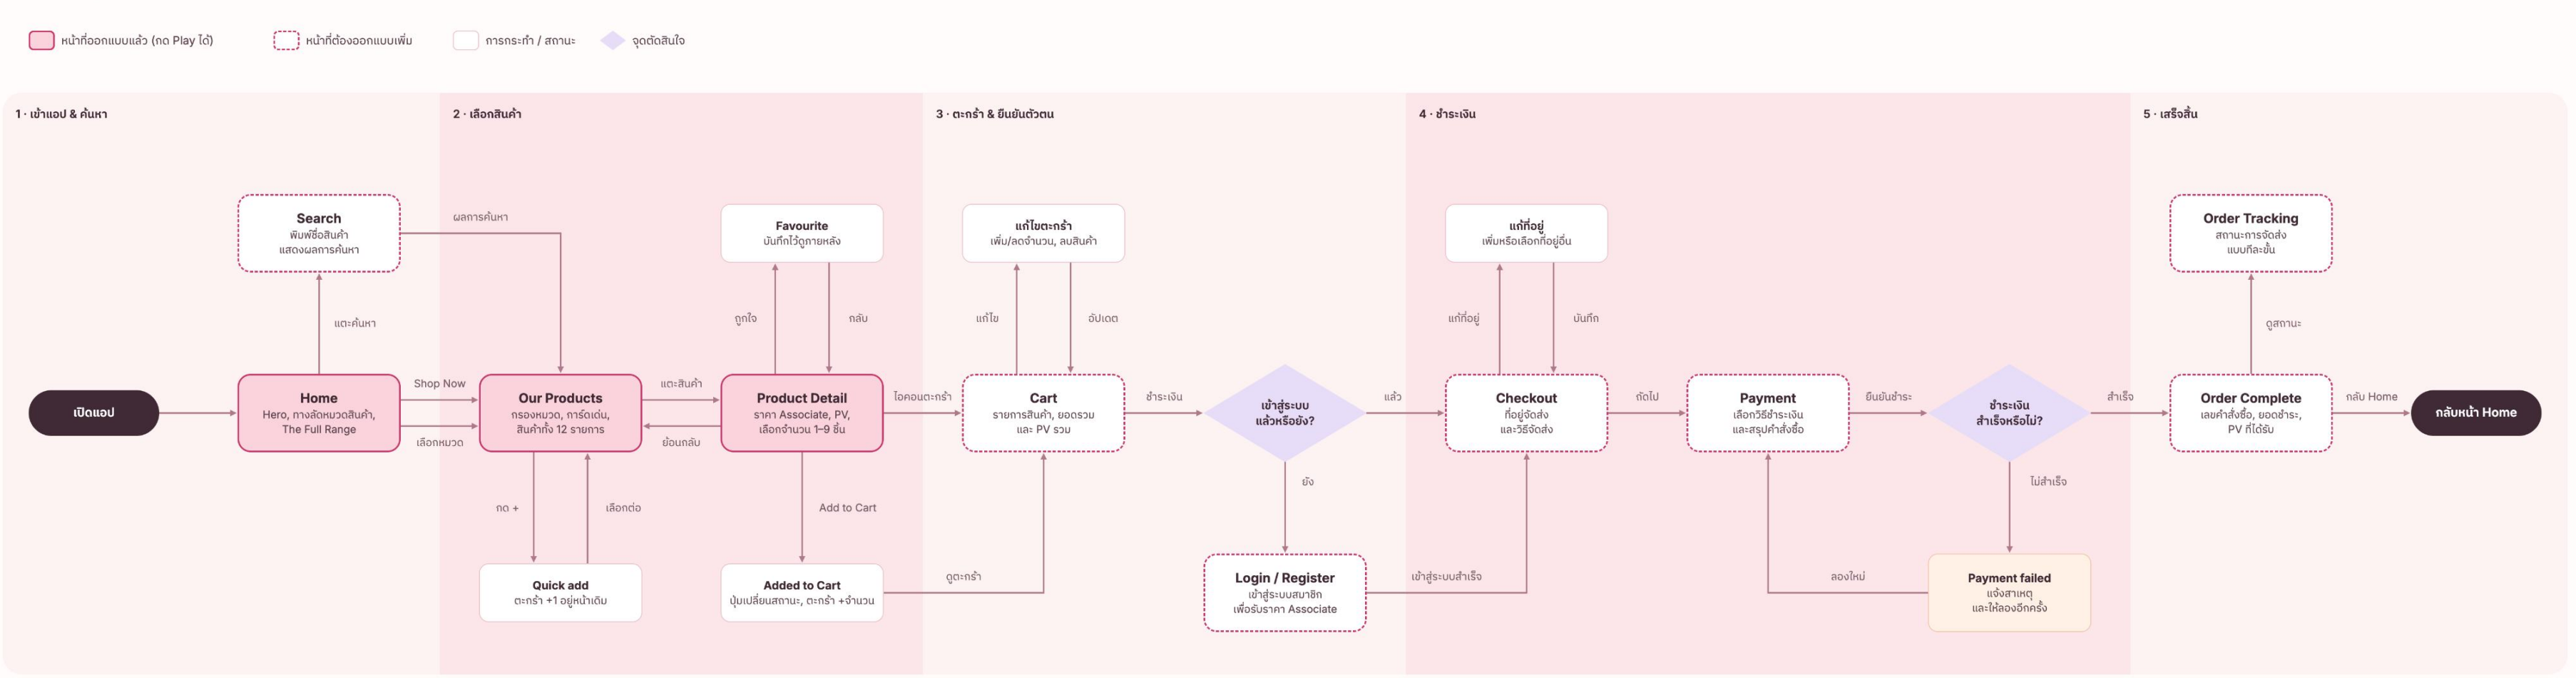
- 🟧 Pain point: where she gets stuck
- 🟪 Opportunity: what the design can do
- Cart — Screen on the canvas

	01 **Discover** Opens the app	02 **Browse & Search** Looks for products	03 **Evaluate** Checks one product	04 **Cart & Sign in** Reviews the order	05 **Checkout & Pay** Places the order	06 **Delivery & Reorder** Waits, then buys again
Goal What she wants	Find my usual products quickly and see my member prices.	Find the right product without scrolling through everything.	Be sure the product suits my skin and is worth the price.	Check the total, savings and PV before paying.	Pay quickly and safely with the fewest steps.	Know when it arrives, and reorder easily next month.
Actions What she does	• Opens the app on Home • Scans the hero and categories • Taps Shop Now or a category	• Filters by category • Sorts by price or PV • Searches by product name	• Opens the product • Compares Associate vs regular price • Saves it to Favourites	• Adds items and adjusts quantities • Checks savings and total PV • Logs in if she isn’t already	• Confirms the delivery address • Picks a delivery method • Chooses payment, places the order	• Reads the confirmation • Tracks the order status • Comes back to reorder
Screens Touchpoints on the canvas	Home Menu	Our Products Filter & Sort Search Results No Results	Product Detail Favourites	Cart Cart – Empty Log In	Checkout Delivery Address Payment Payment Failed	Order Complete Order Tracking Profile Settings
Thinking What’s on her mind	*“Am I signed in? Are these my Associate prices?”*	*“So many ‘Neigene Evolution’ names. Which one is for my skin?”*	*“What does it actually do, and how do I use it?”*	*“Have I reached my PV for this month?”*	*“Do I have to type my address again? Why did my card fail?”*	*“When will it arrive? I’ll need this again next month.”*
Emotion Higher = happier	Curious	Focused	Unsure not enough info	Reassured sees savings + PV	Anxious if payment fails	Delighted
Pain points Where she gets stuck	• Can’t tell if she’s signed in or which prices apply • No shortcut to products she bought before	• Similar product names are hard to tell apart • No filter by skin type or concern • Searches like “vitamin c” find nothing	• No description, ingredients or how-to-use yet • No reviews to build confidence	• Login interrupts her at checkout • Shipping fee unknown until the end • No view of progress toward her PV goal	• Re-entering address and card details • Payment errors don’t say what went wrong	• No estimated delivery date • Reordering means searching all over again
Opportunities What the design can do	• “Associate prices on” badge on Home • “Buy again” row with her last items	• Filter by skin type and concern • Search that handles typos and synonyms • One-line benefit on each product card	• Benefits, key ingredients and usage steps • “Use it with” routine suggestions • Ratings and reviews	• Keep the cart through login • Show a shipping estimate in the cart • PV progress bar toward the monthly goal	• Saved addresses and cards • Clear error messages with one-tap retry or switch method	• Push notifications at each delivery step • One-tap reorder and refill reminders

Persona, emotions and pain points are hypotheses drawn from the current design. Validate them with customer interviews or usability tests.

User Flow — Skincare Shop App

เส้นทางของผู้ใช้ ตั้งแต่เปิดแอป เลือกสินค้า จนสั่งซื้อสำเร็จ

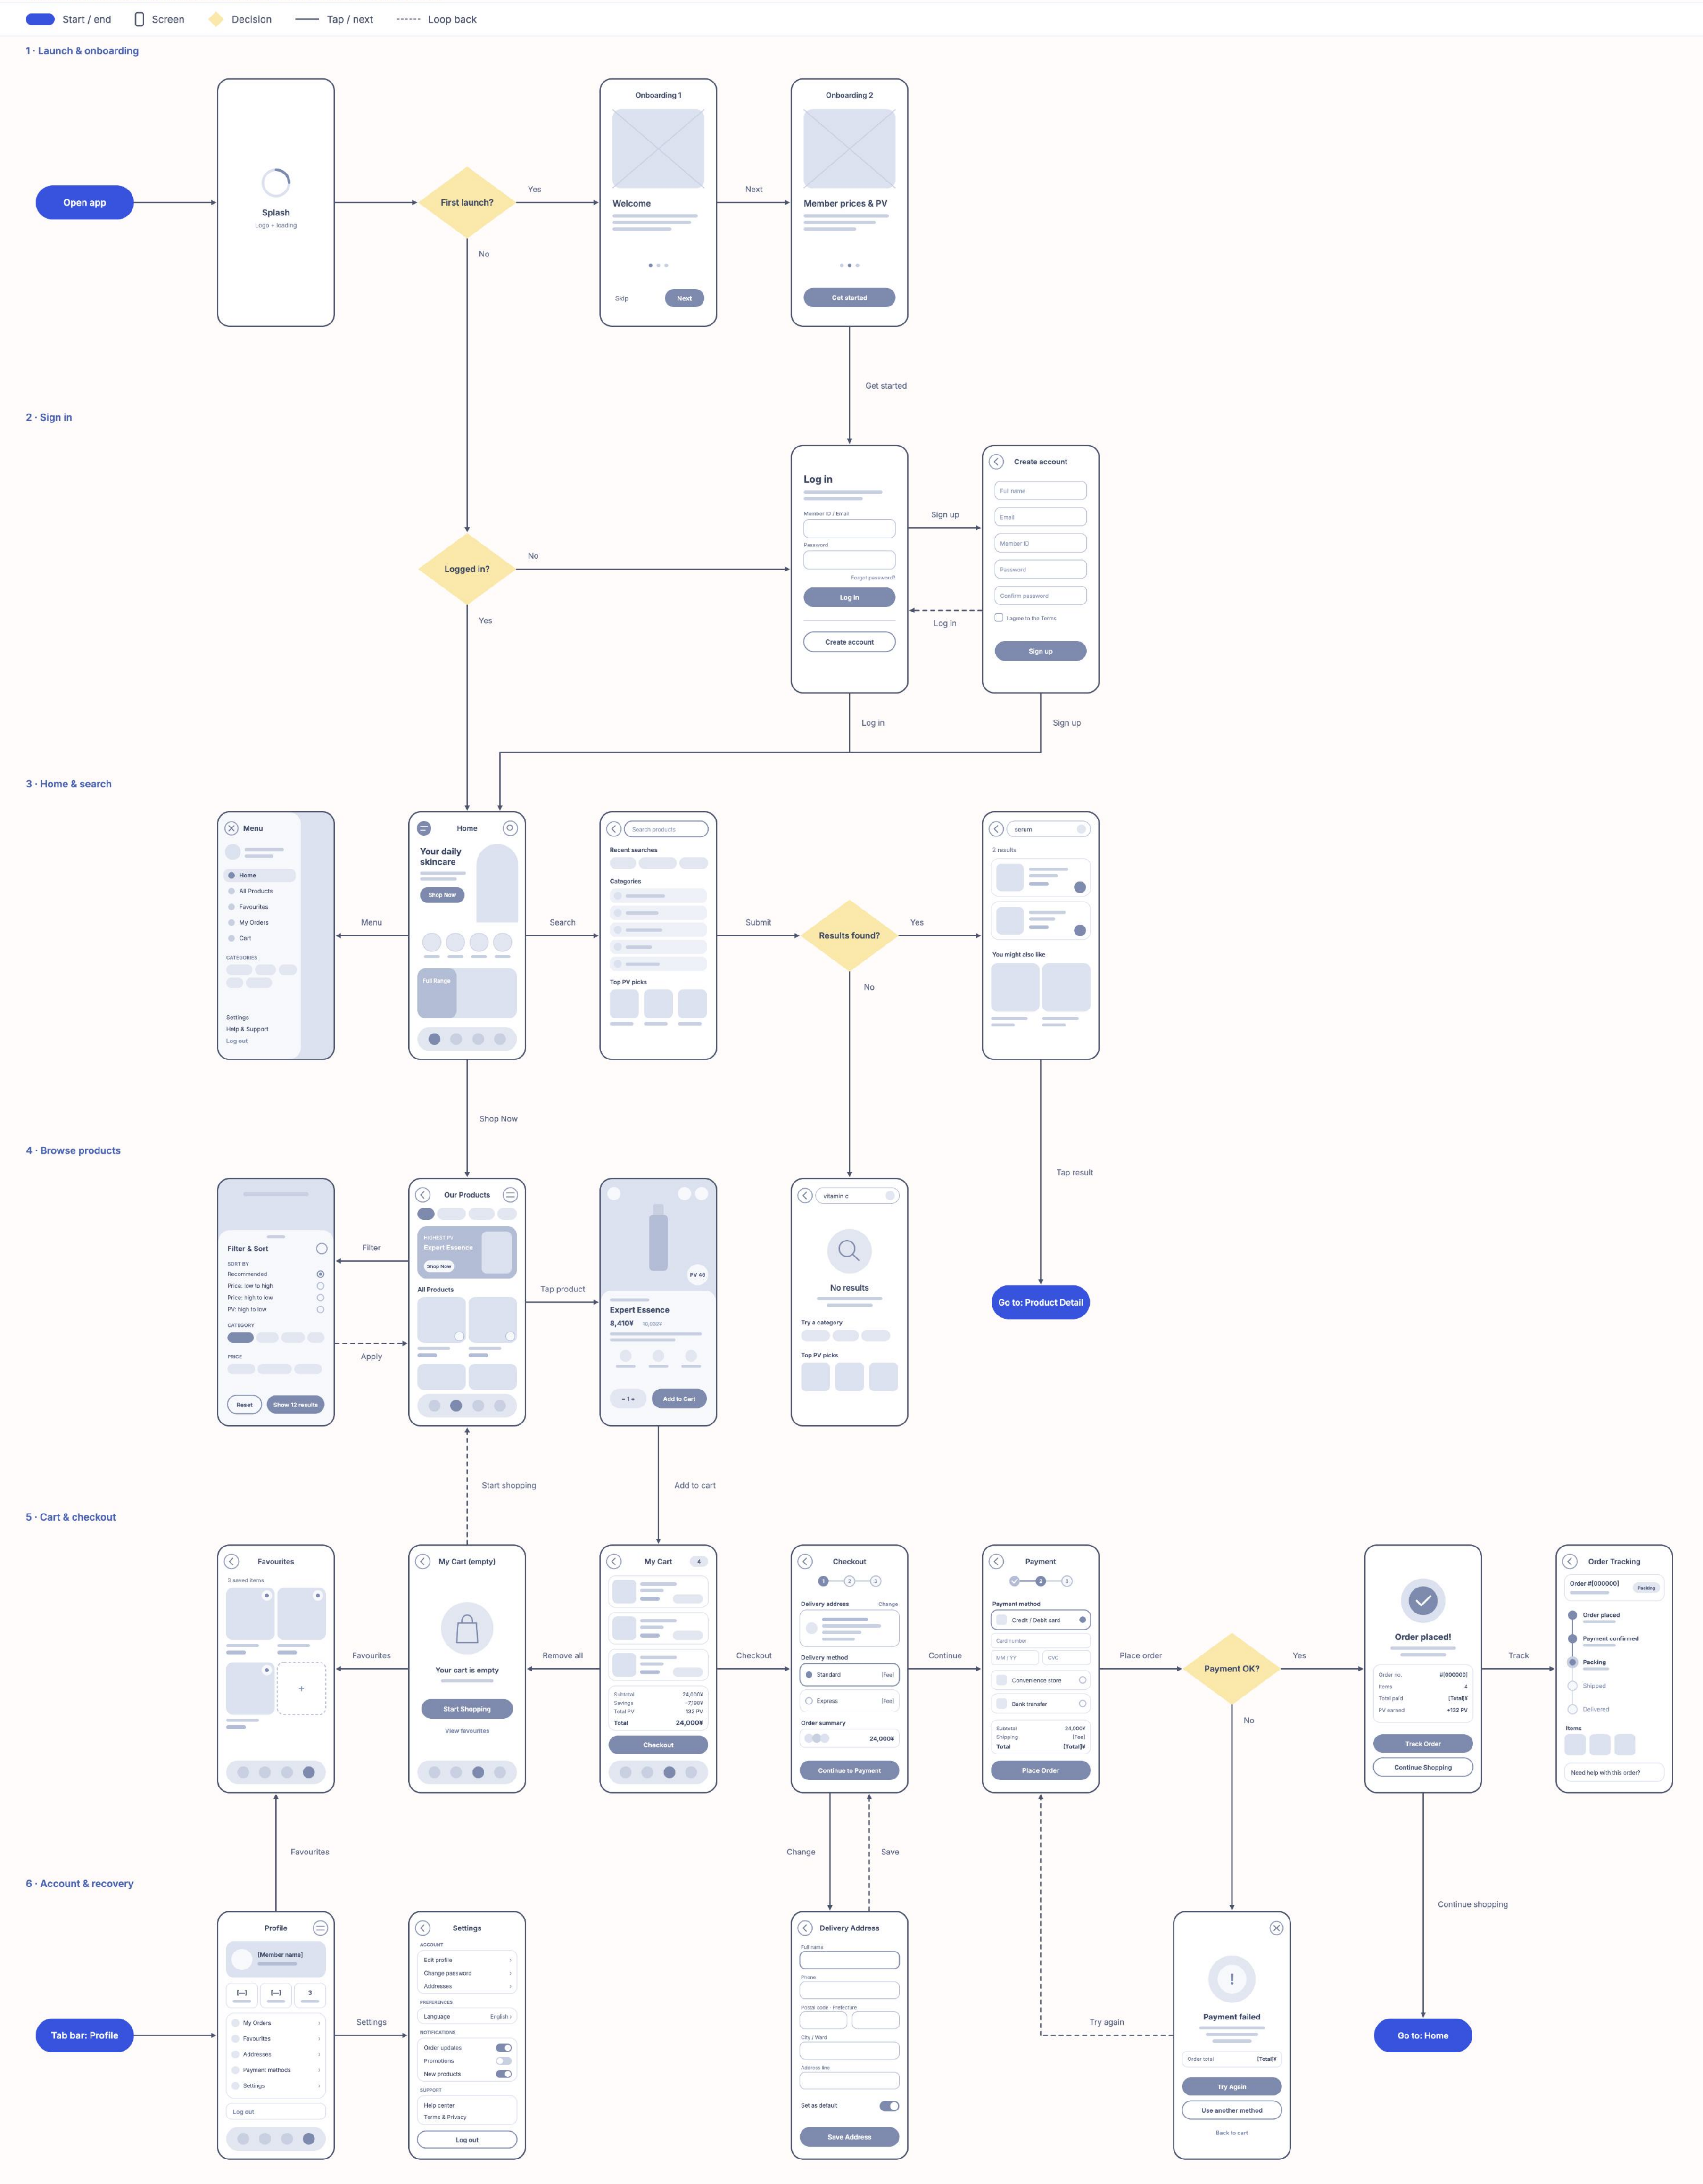


แถบเมนูล่าง (ทุกหน้า ยกเว้น Product Detail)
Home · Products · Cart · Profile กดไปได้ทันทีจากทุกจุดของ flow
ตัวเลขบนไอคอนตะกร้าแสดงจำนวนสินค้าที่เพิ่มแล้ว

กรณีพิเศษที่ต้องออกแบบ
ตะกร้าว่าง → ปุ่ม “เริ่มช้อป” กลับไป Our Products · ค้นหาไม่พบ → แนะนำหมวดสินค้า
ไม่มีอินเทอร์เน็ต → ข้อความแจ้งพร้อมปุ่มลองใหม่ · สั่งได้ 1–9 ชิ้นต่อรายการ

User Flow

Wireframes for Unicity Skincare: 24 screens covering onboarding, sign in, browsing, search, product, cart, checkout, payment and account. Each arrow shows what a tap opens.



The bottom tab bar (Home · Products · Cart · Profile) opens those screens from any screen that shows it. “Go to” pills jump to a screen drawn elsewhere on this board.
