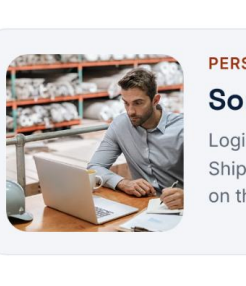
Customer journey map — Shipper

From first discovery to re-booking, for an SME logistics manager shipping across Southeast Asia



PERSONA

Somchai, 38

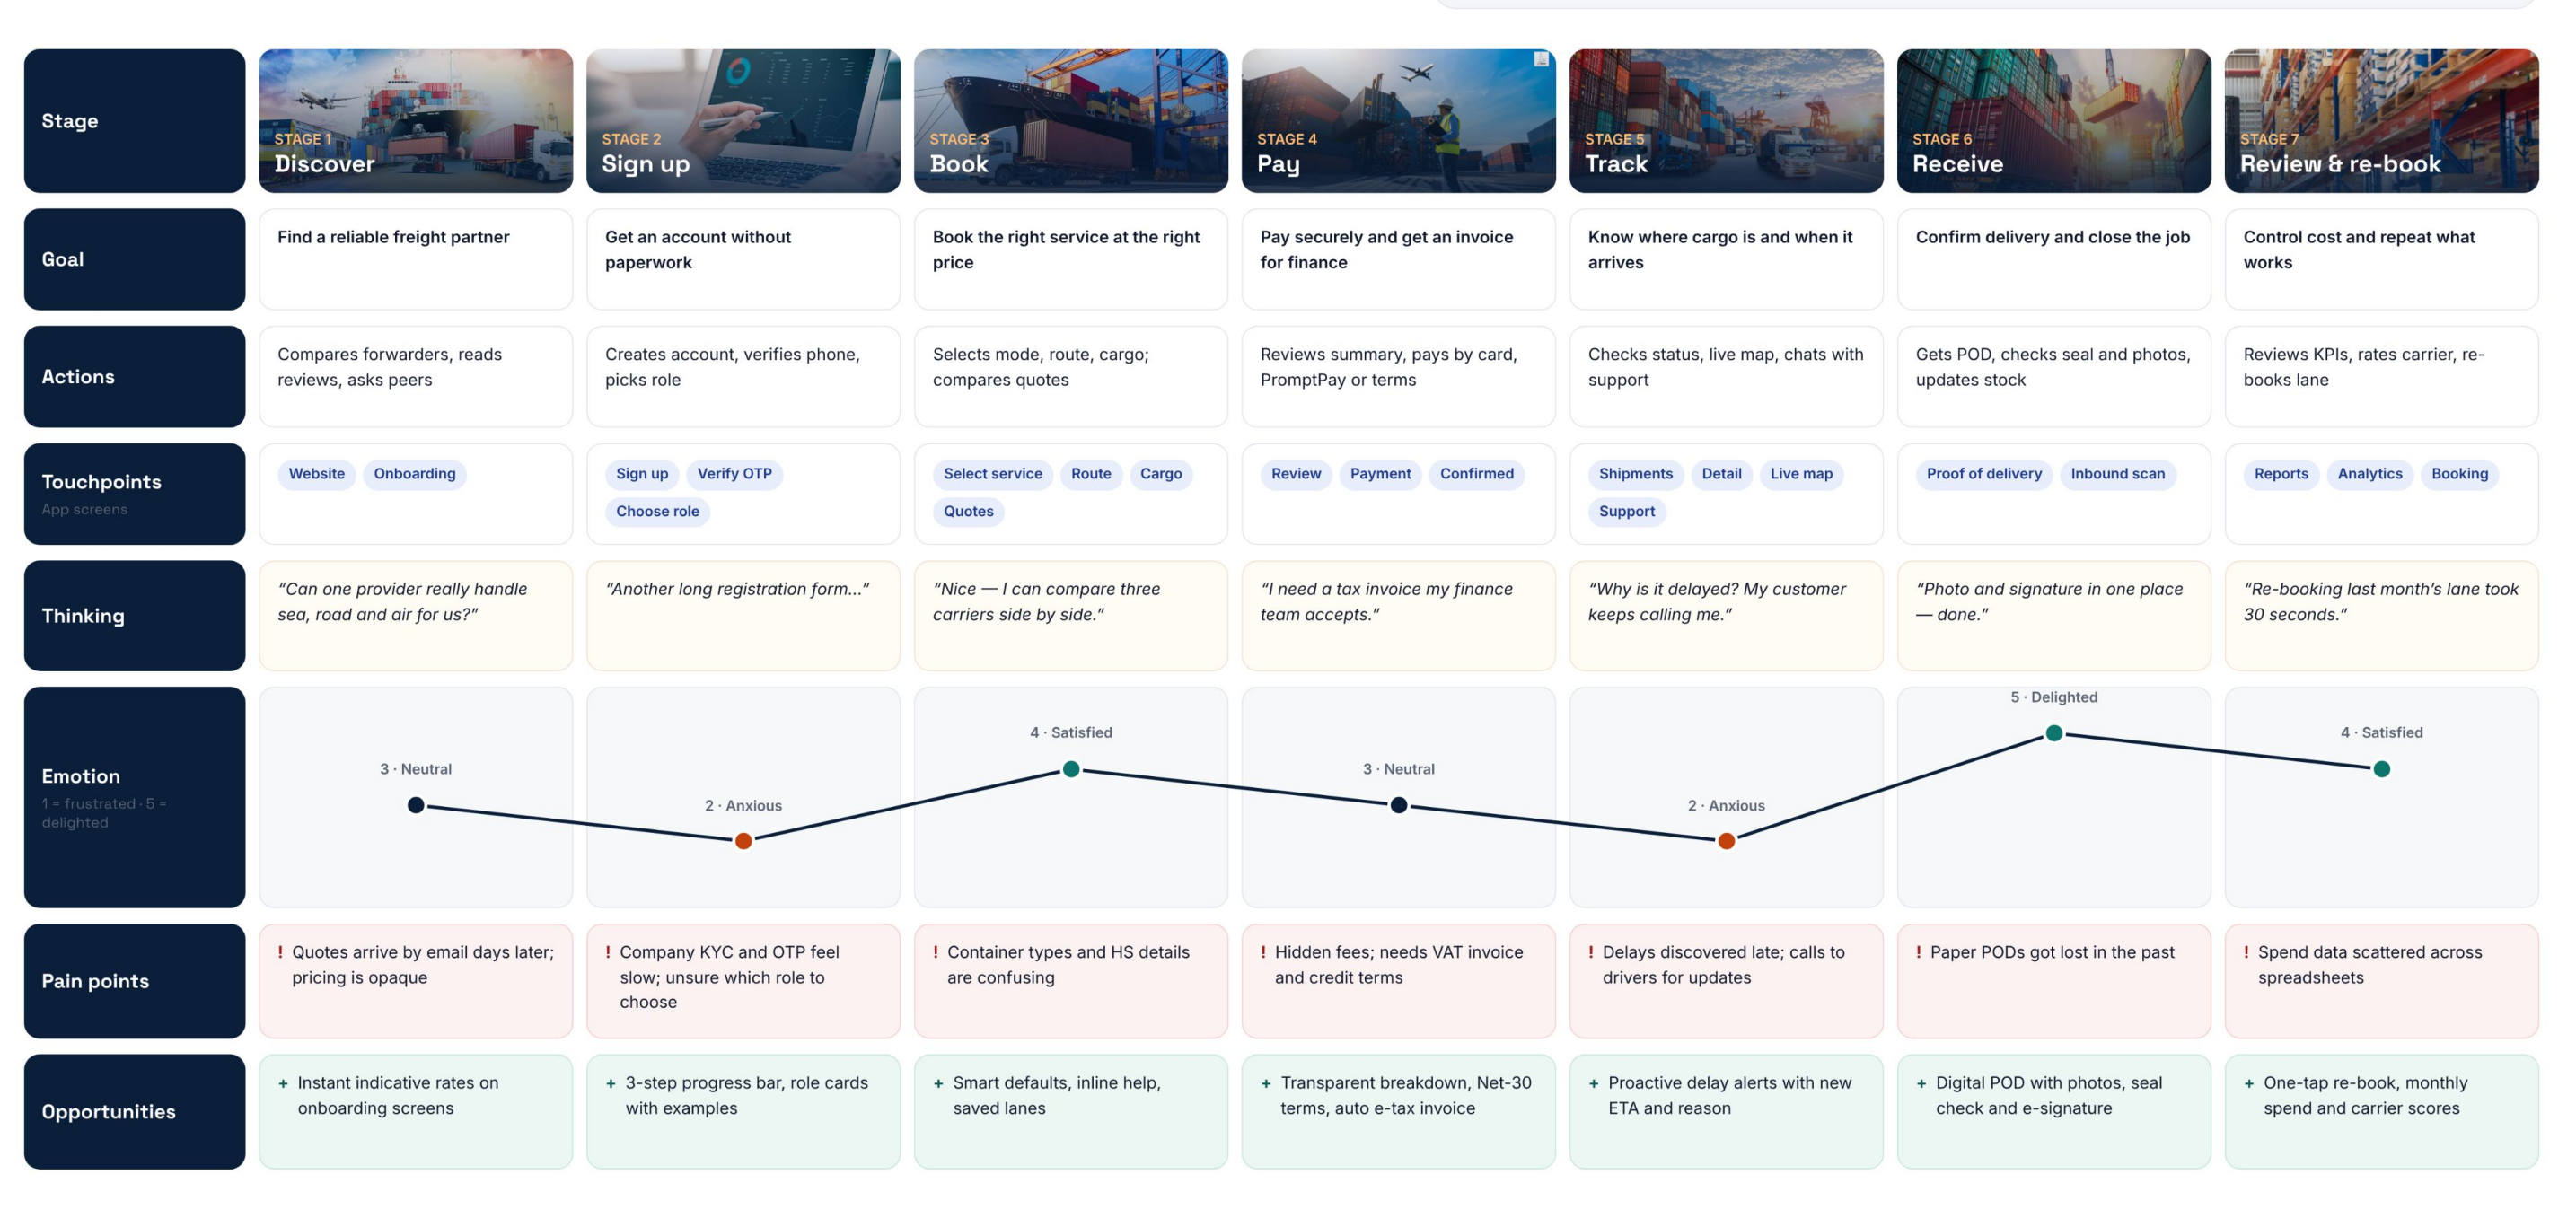
Logistics Manager at Siam Trade Co. (electronics distributor). Ships ~300 loads a month by road and sea, often from his phone on the warehouse floor.

Goals

On-time delivery · predictable cost · fewer phone calls

Frustrations

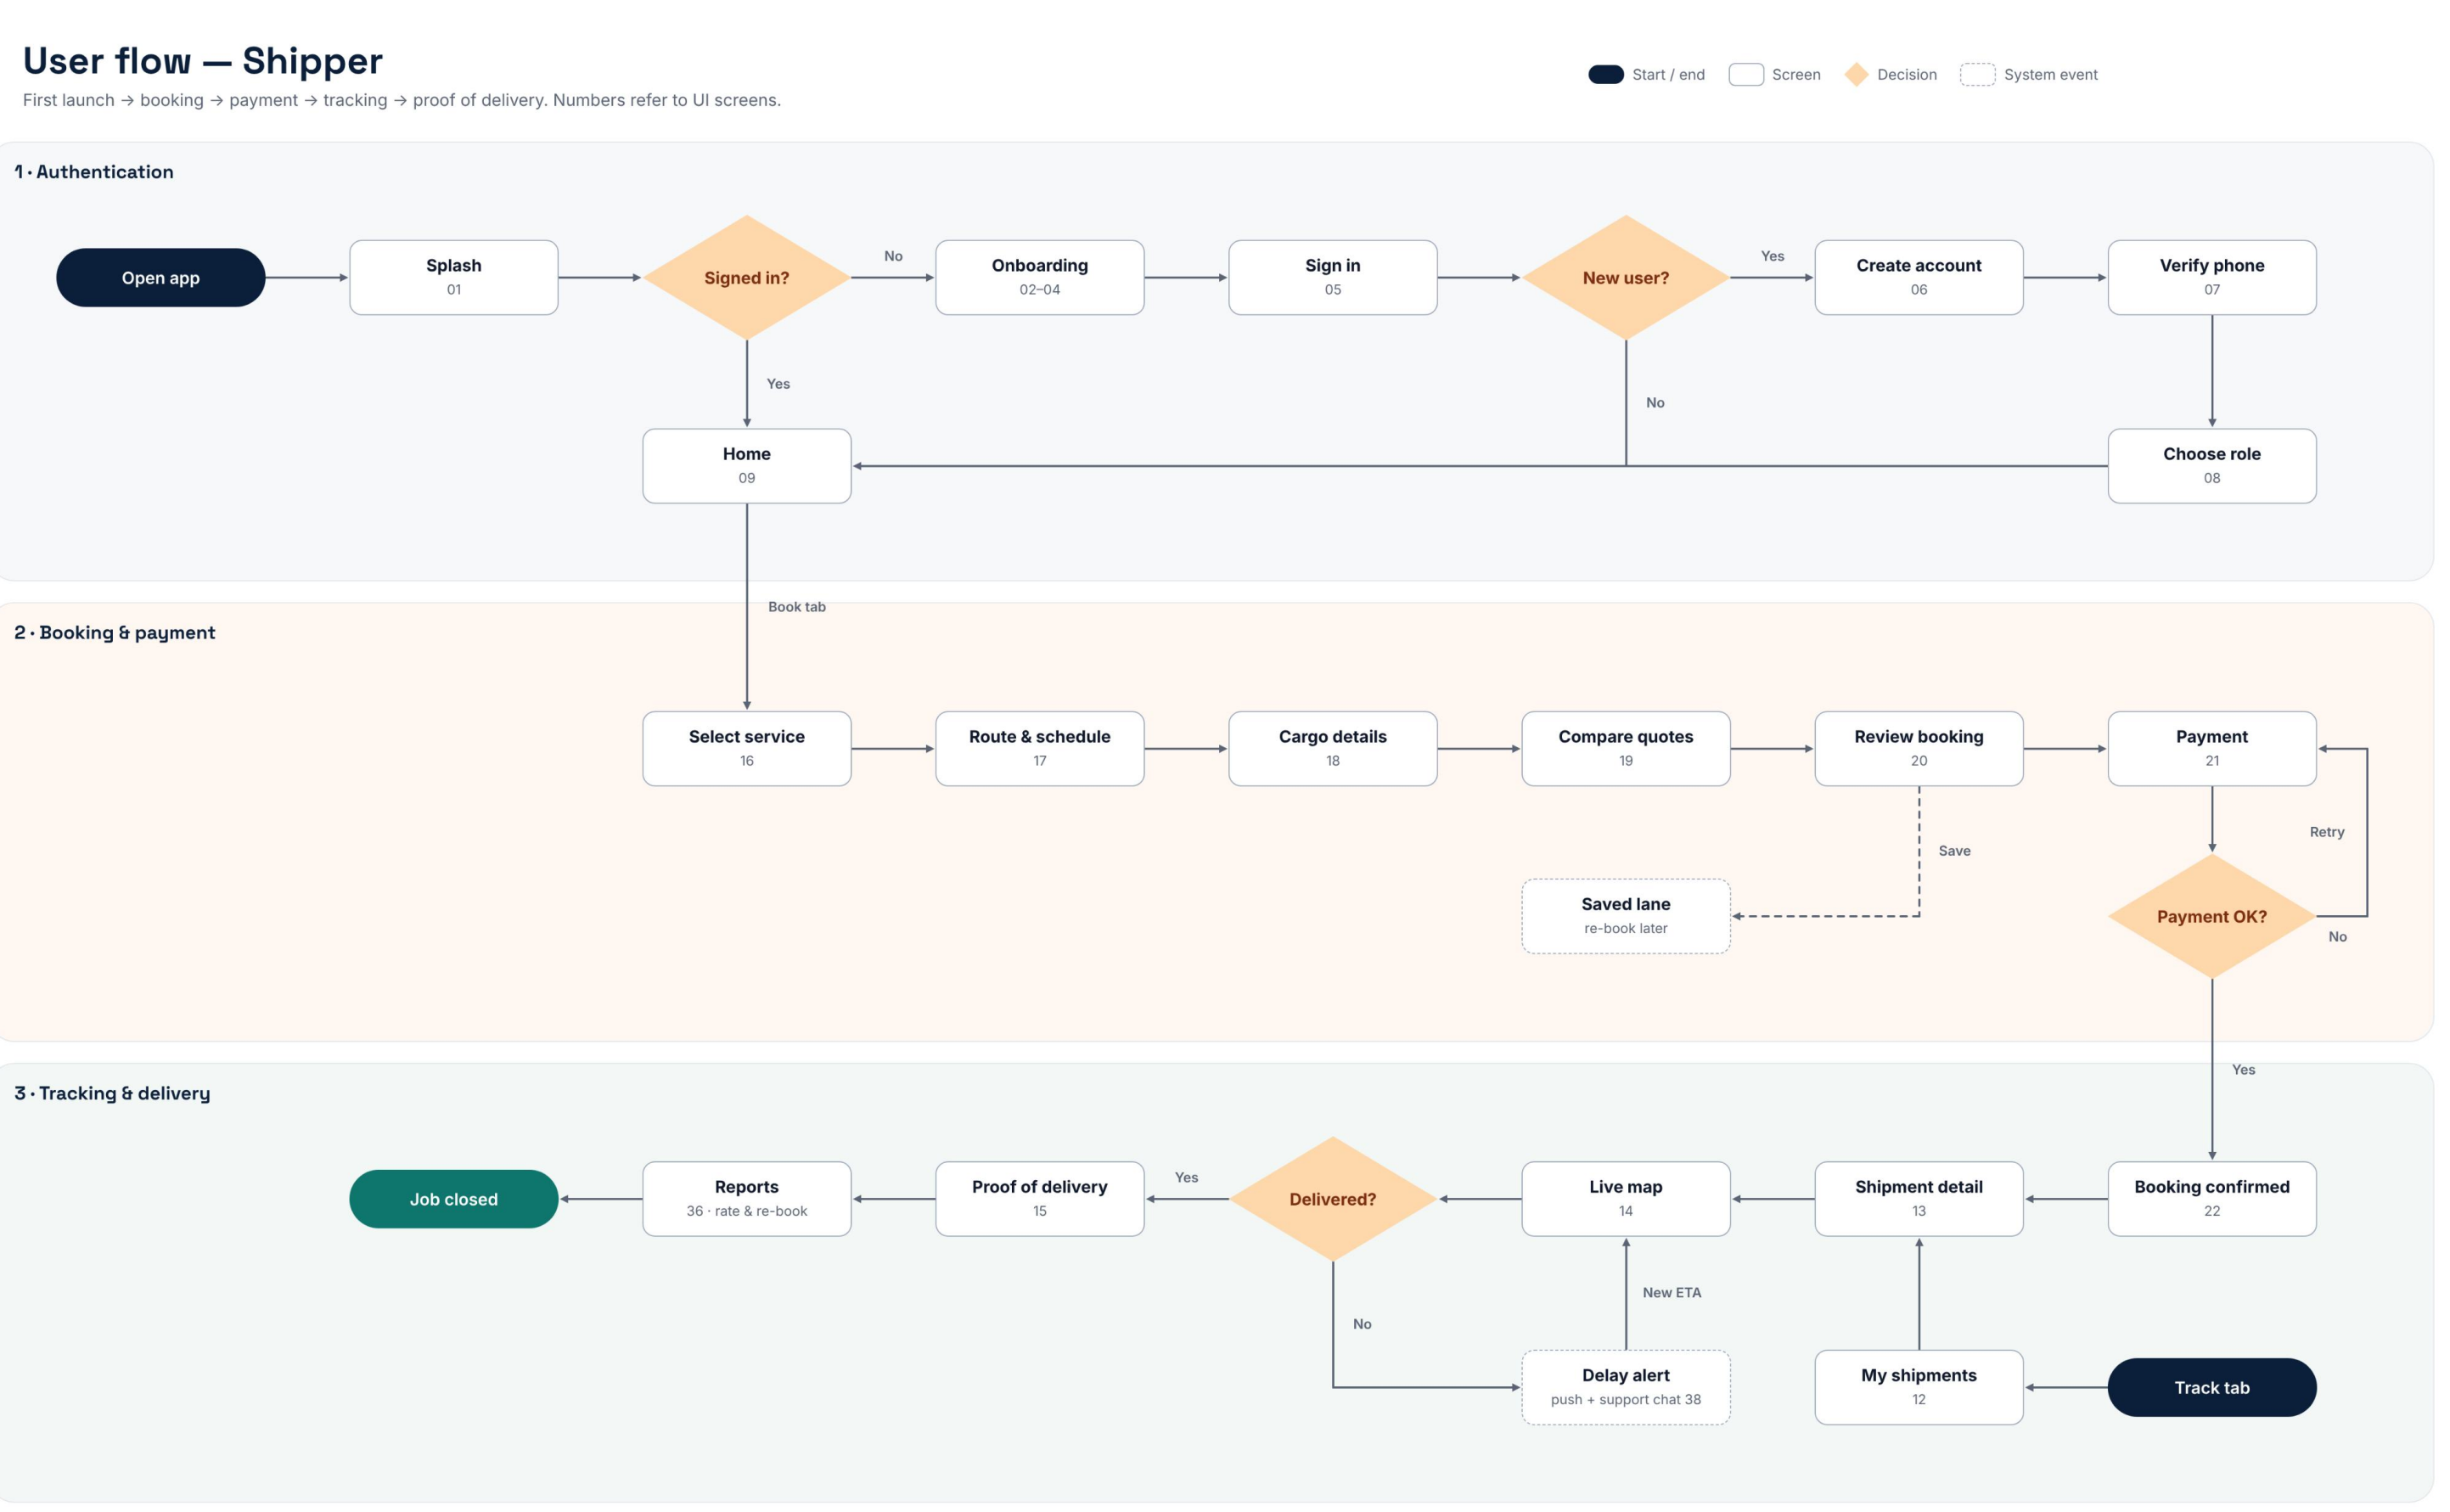
Late delay news · paper documents · opaque pricing



Stage	STAGE 1 Discover	STAGE 2 Sign up	STAGE 3 Book	STAGE 4 Pay	STAGE 5 Track	STAGE 6 Receive	STAGE 7 Review & re-book
Goal	Find a reliable freight partner	Get an account without paperwork	Book the right service at the right price	Pay securely and get an invoice for finance	Know where cargo is and when it arrives	Confirm delivery and close the job	Control cost and repeat what works
Actions	Compares forwarders, reads reviews, asks peers	Creates account, verifies phone, picks role	Selects mode, route, cargo; compares quotes	Reviews summary, pays by card, PromptPay or terms	Checks status, live map, chats with support	Gets POD, checks seal and photos, updates stock	Reviews KPIs, rates carrier, re-books lane
Touchpoints App screens	Website Onboarding	Sign up Verify OTP Choose role	Select service Route Cargo Quotes	Review Payment Confirmed	Shipments Detail Live map Support	Proof of delivery Inbound scan	Reports Analytics Booking
Thinking	*"Can one provider really handle sea, road and air for us?"*	*"Another long registration form..."*	*"Nice — I can compare three carriers side by side."*	*"I need a tax invoice my finance team accepts."*	*"Why is it delayed? My customer keeps calling me."*	*"Photo and signature in one place — done."*	*"Re-booking last month's lane took 30 seconds."*
Emotion 1 = frustrated · 5 = delighted	3 · Neutral	2 · Anxious	4 · Satisfied	3 · Neutral	2 · Anxious	5 · Delighted	4 · Satisfied
Pain points	! Quotes arrive by email days later; pricing is opaque	! Company KYC and OTP feel slow; unsure which role to choose	! Container types and HS details are confusing	! Hidden fees; needs VAT invoice and credit terms	! Delays discovered late; calls to drivers for updates	! Paper PODs got lost in the past	! Spend data scattered across spreadsheets
Opportunities	+ Instant indicative rates on onboarding screens	+ 3-step progress bar, role cards with examples	+ Smart defaults, inline help, saved lanes	+ Transparent breakdown, Net-30 terms, auto e-tax invoice	+ Proactive delay alerts with new ETA and reason	+ Digital POD with photos, seal check and e-signature	+ One-tap re-book, monthly spend and carrier scores

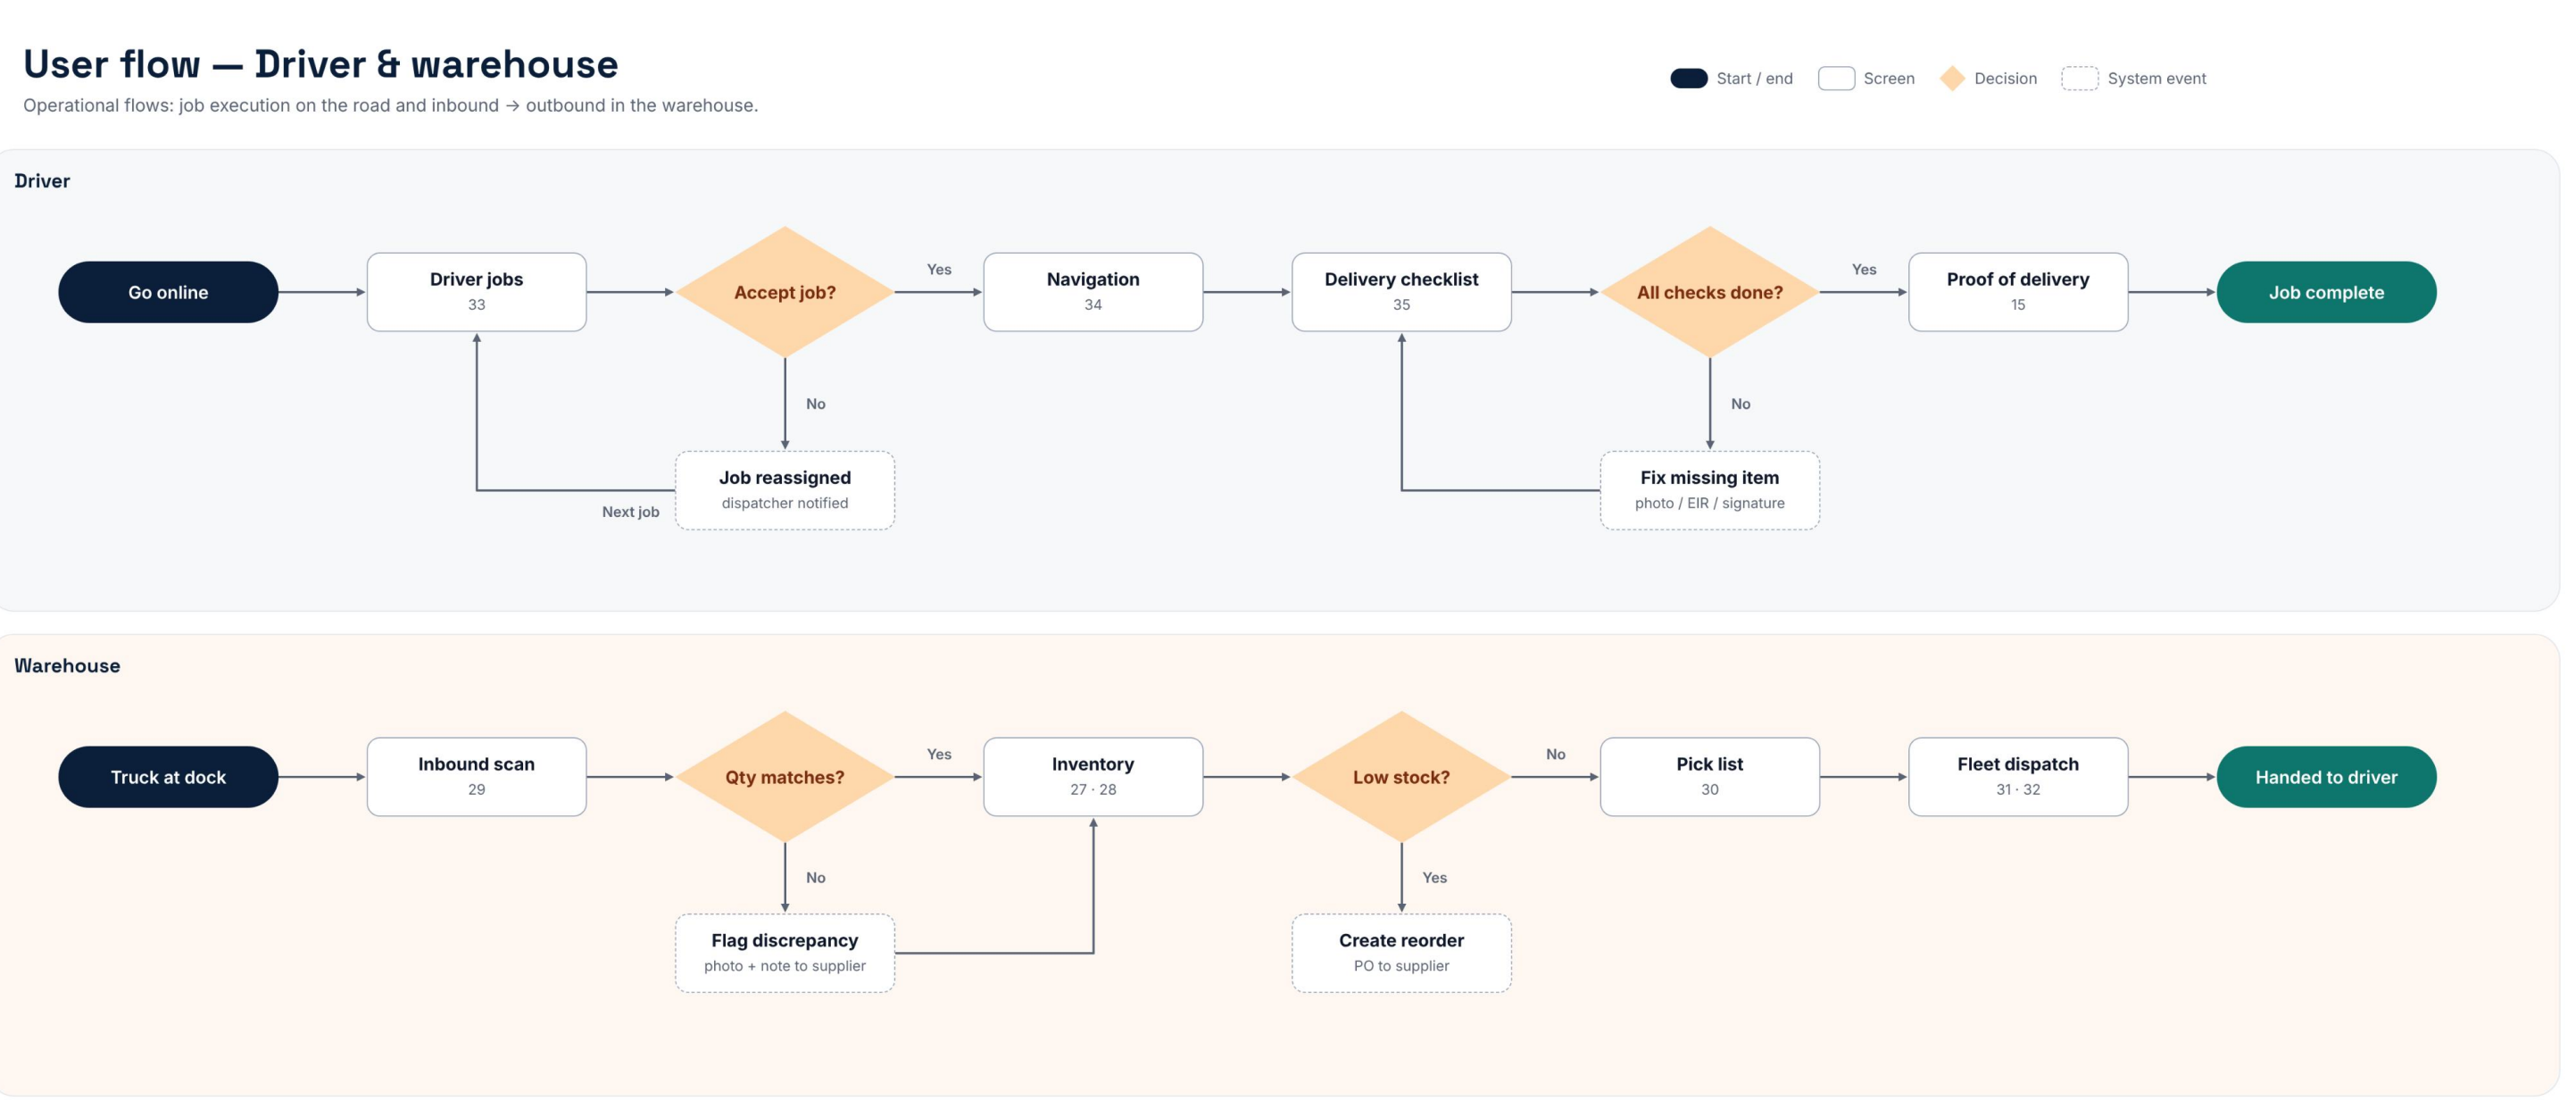
User flow — Shipper

First launch → booking → payment → tracking → proof of delivery. Numbers refer to UI screens.



User flow — Driver & warehouse

Operational flows: job execution on the road and inbound → outbound in the warehouse.

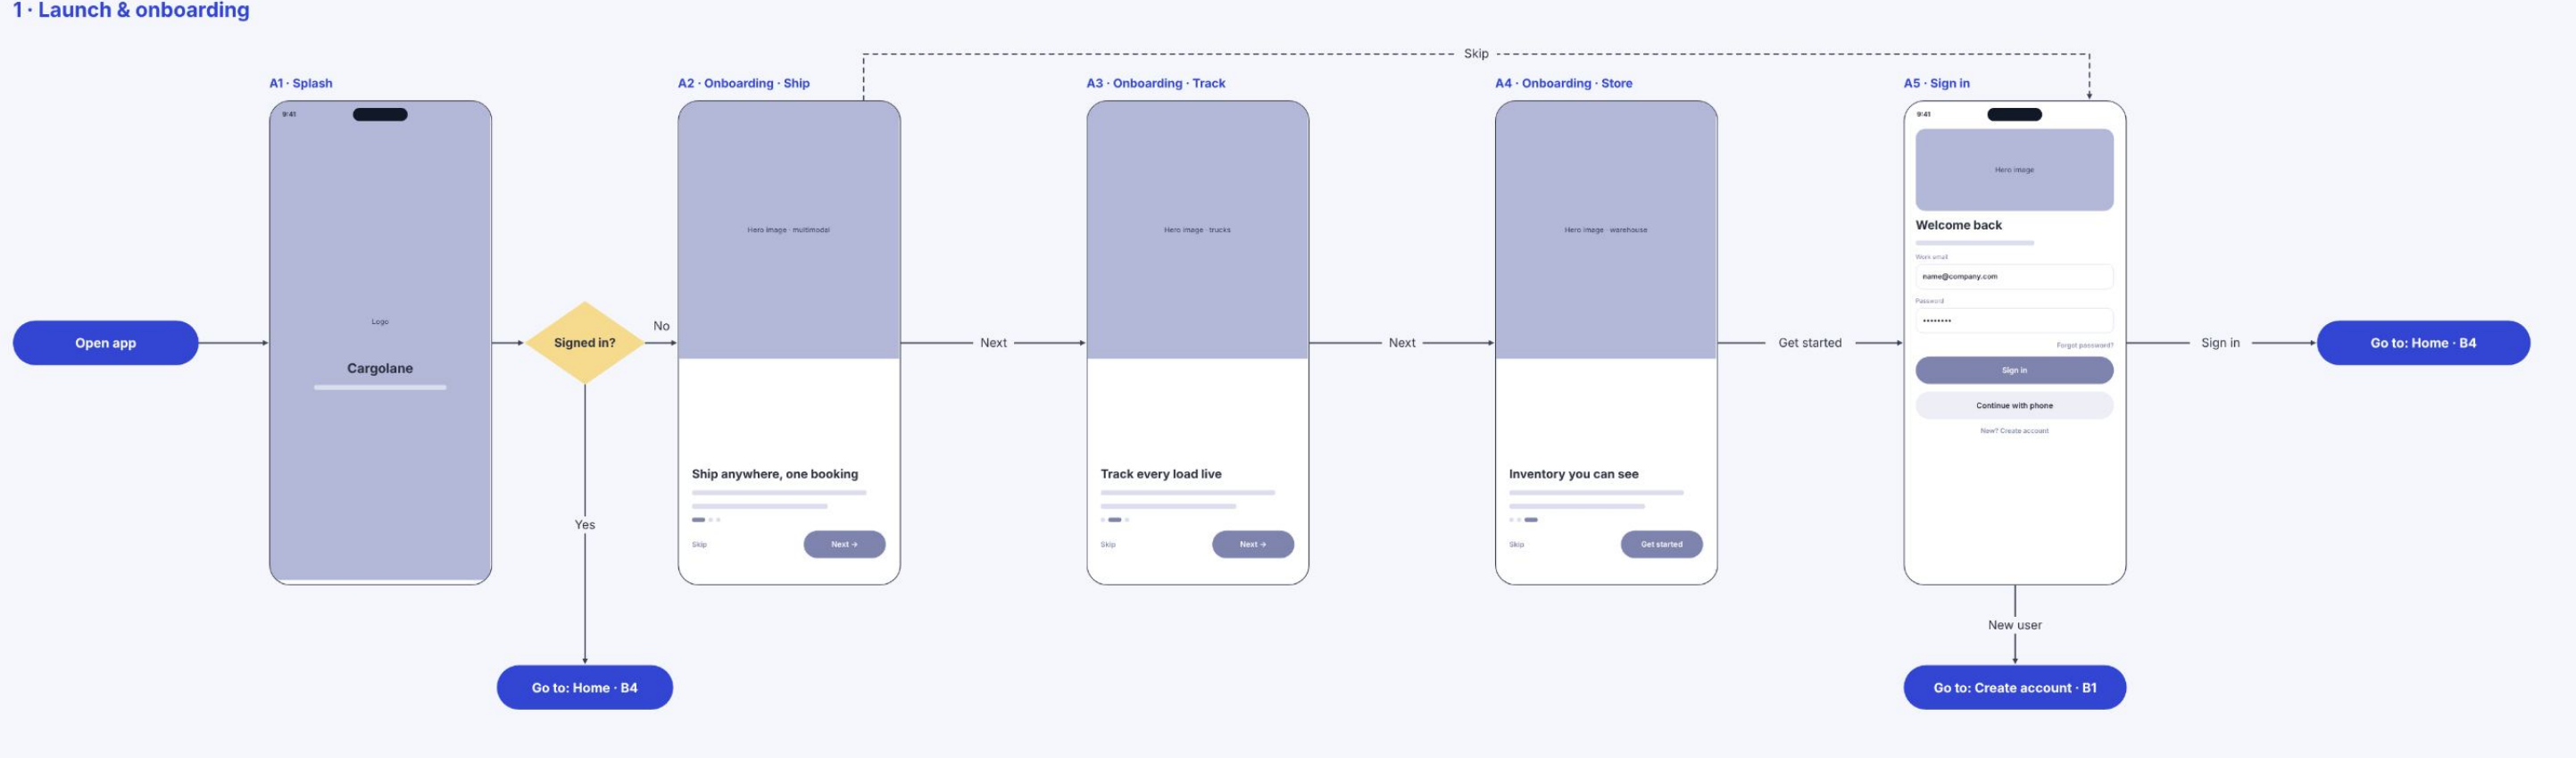


Wireframes · Part 1

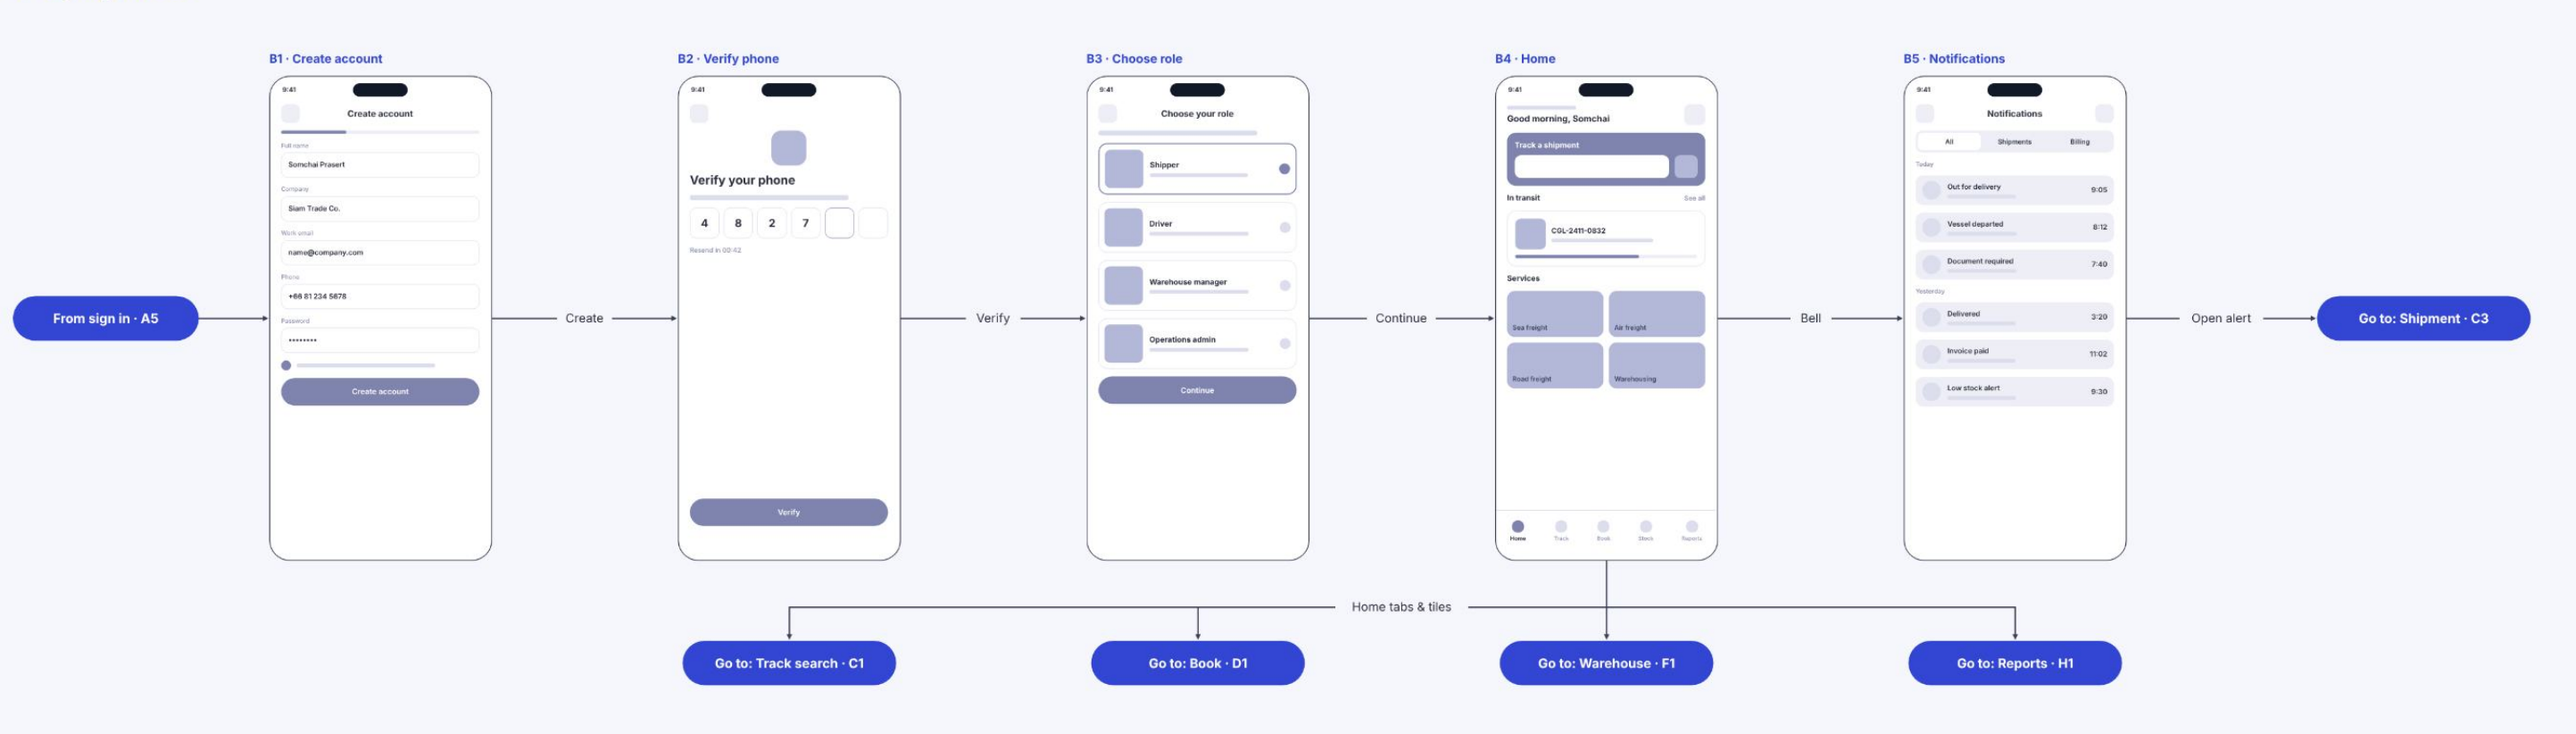
Low-fidelity wireframes for Cargolane — one per UI screen (codes A1–H5 match the UI frames). Part 1 covers launch, sign-up & home, tracking and booking. Each arrow shows what a tap opens; "Go to" pills jump to a screen drawn elsewhere on these boards.

▬ Start / go to ☐ Screen ◆ Decision —— Tap / next ┈┈ Loop back

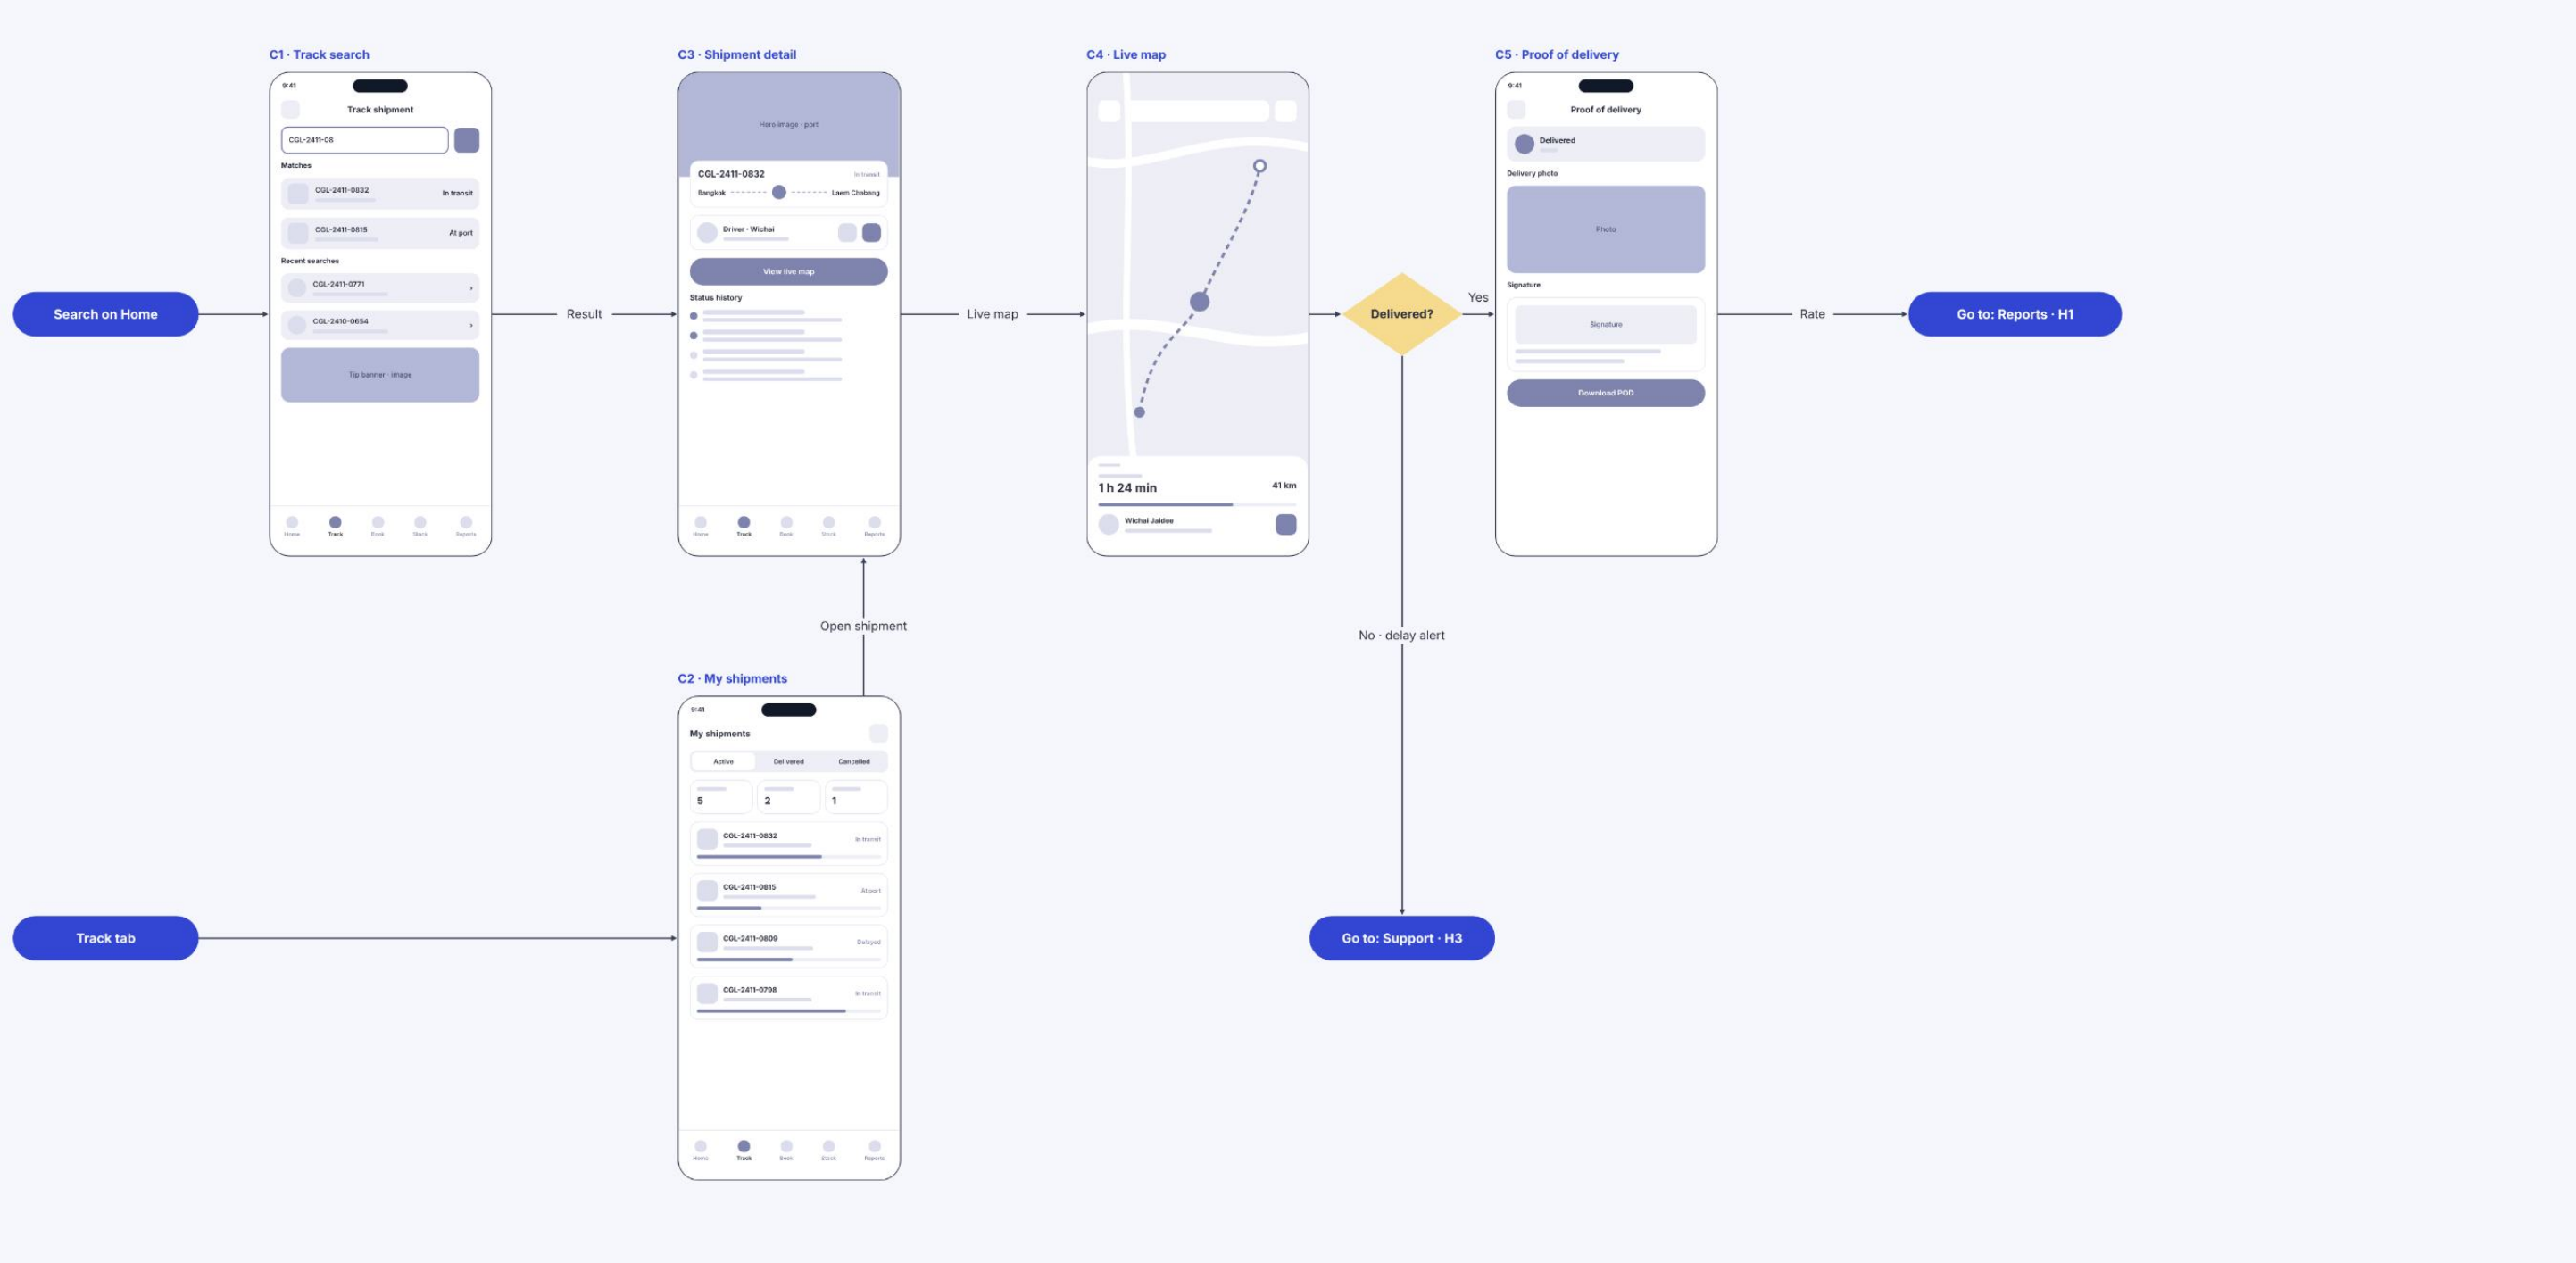
1 · Launch & onboarding



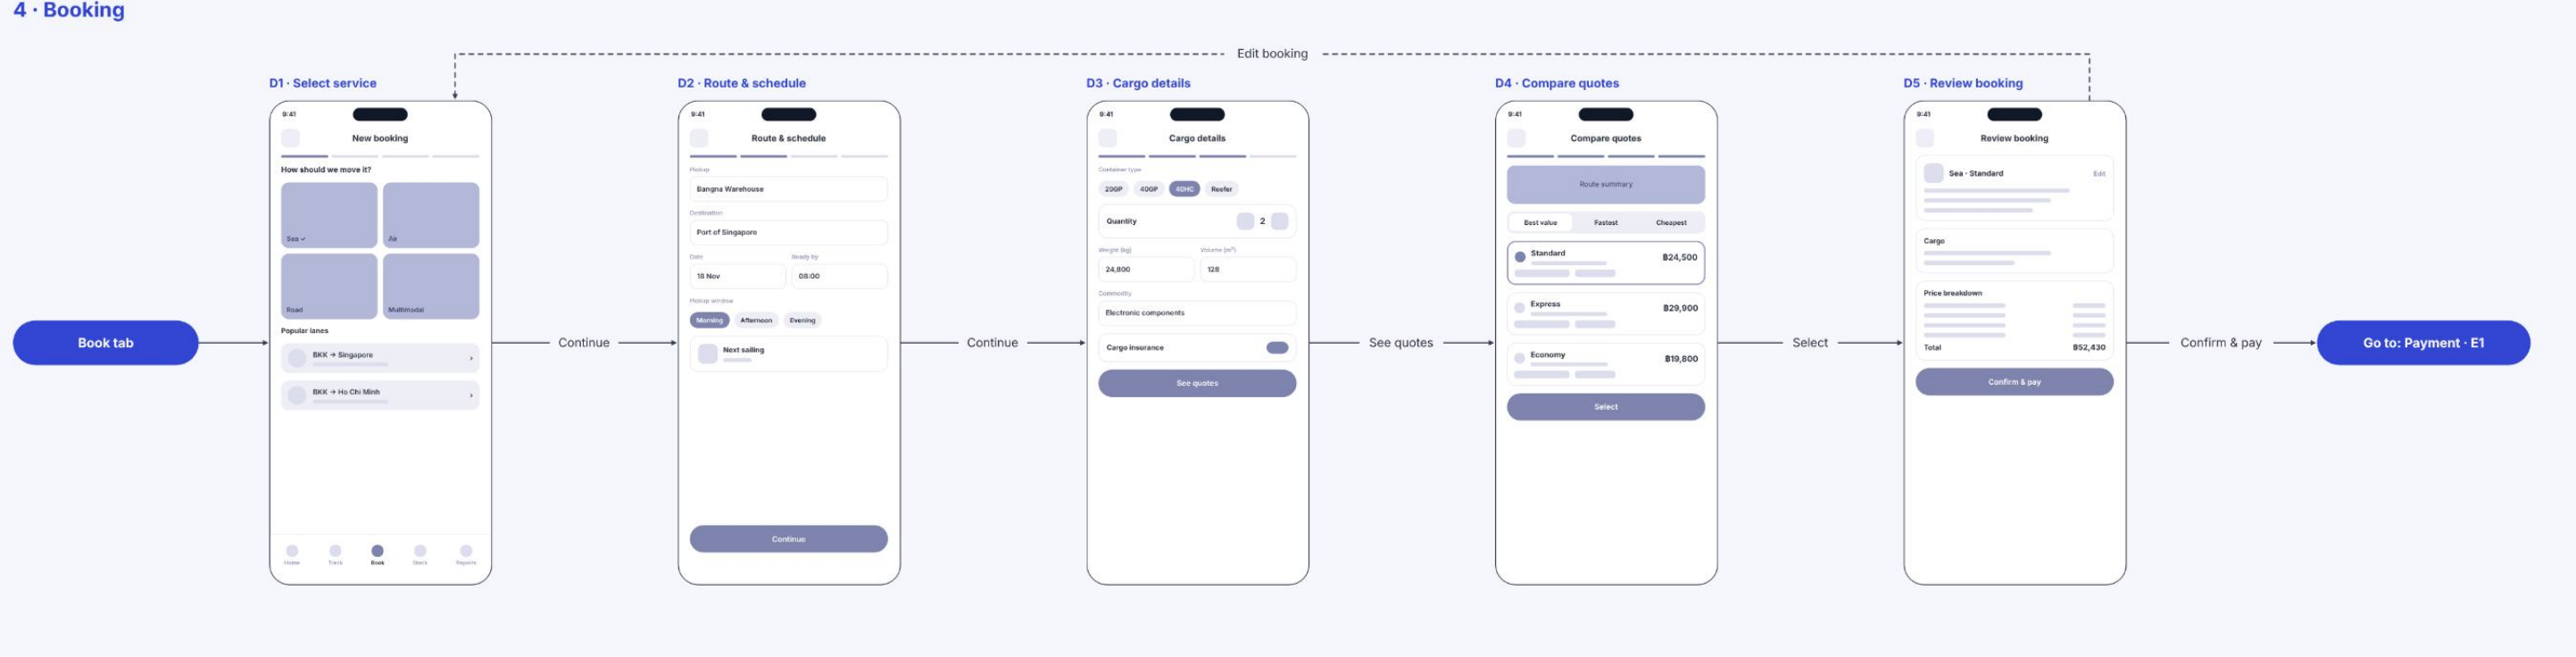
2 · Sign up & home



3 · Tracking



4 · Booking



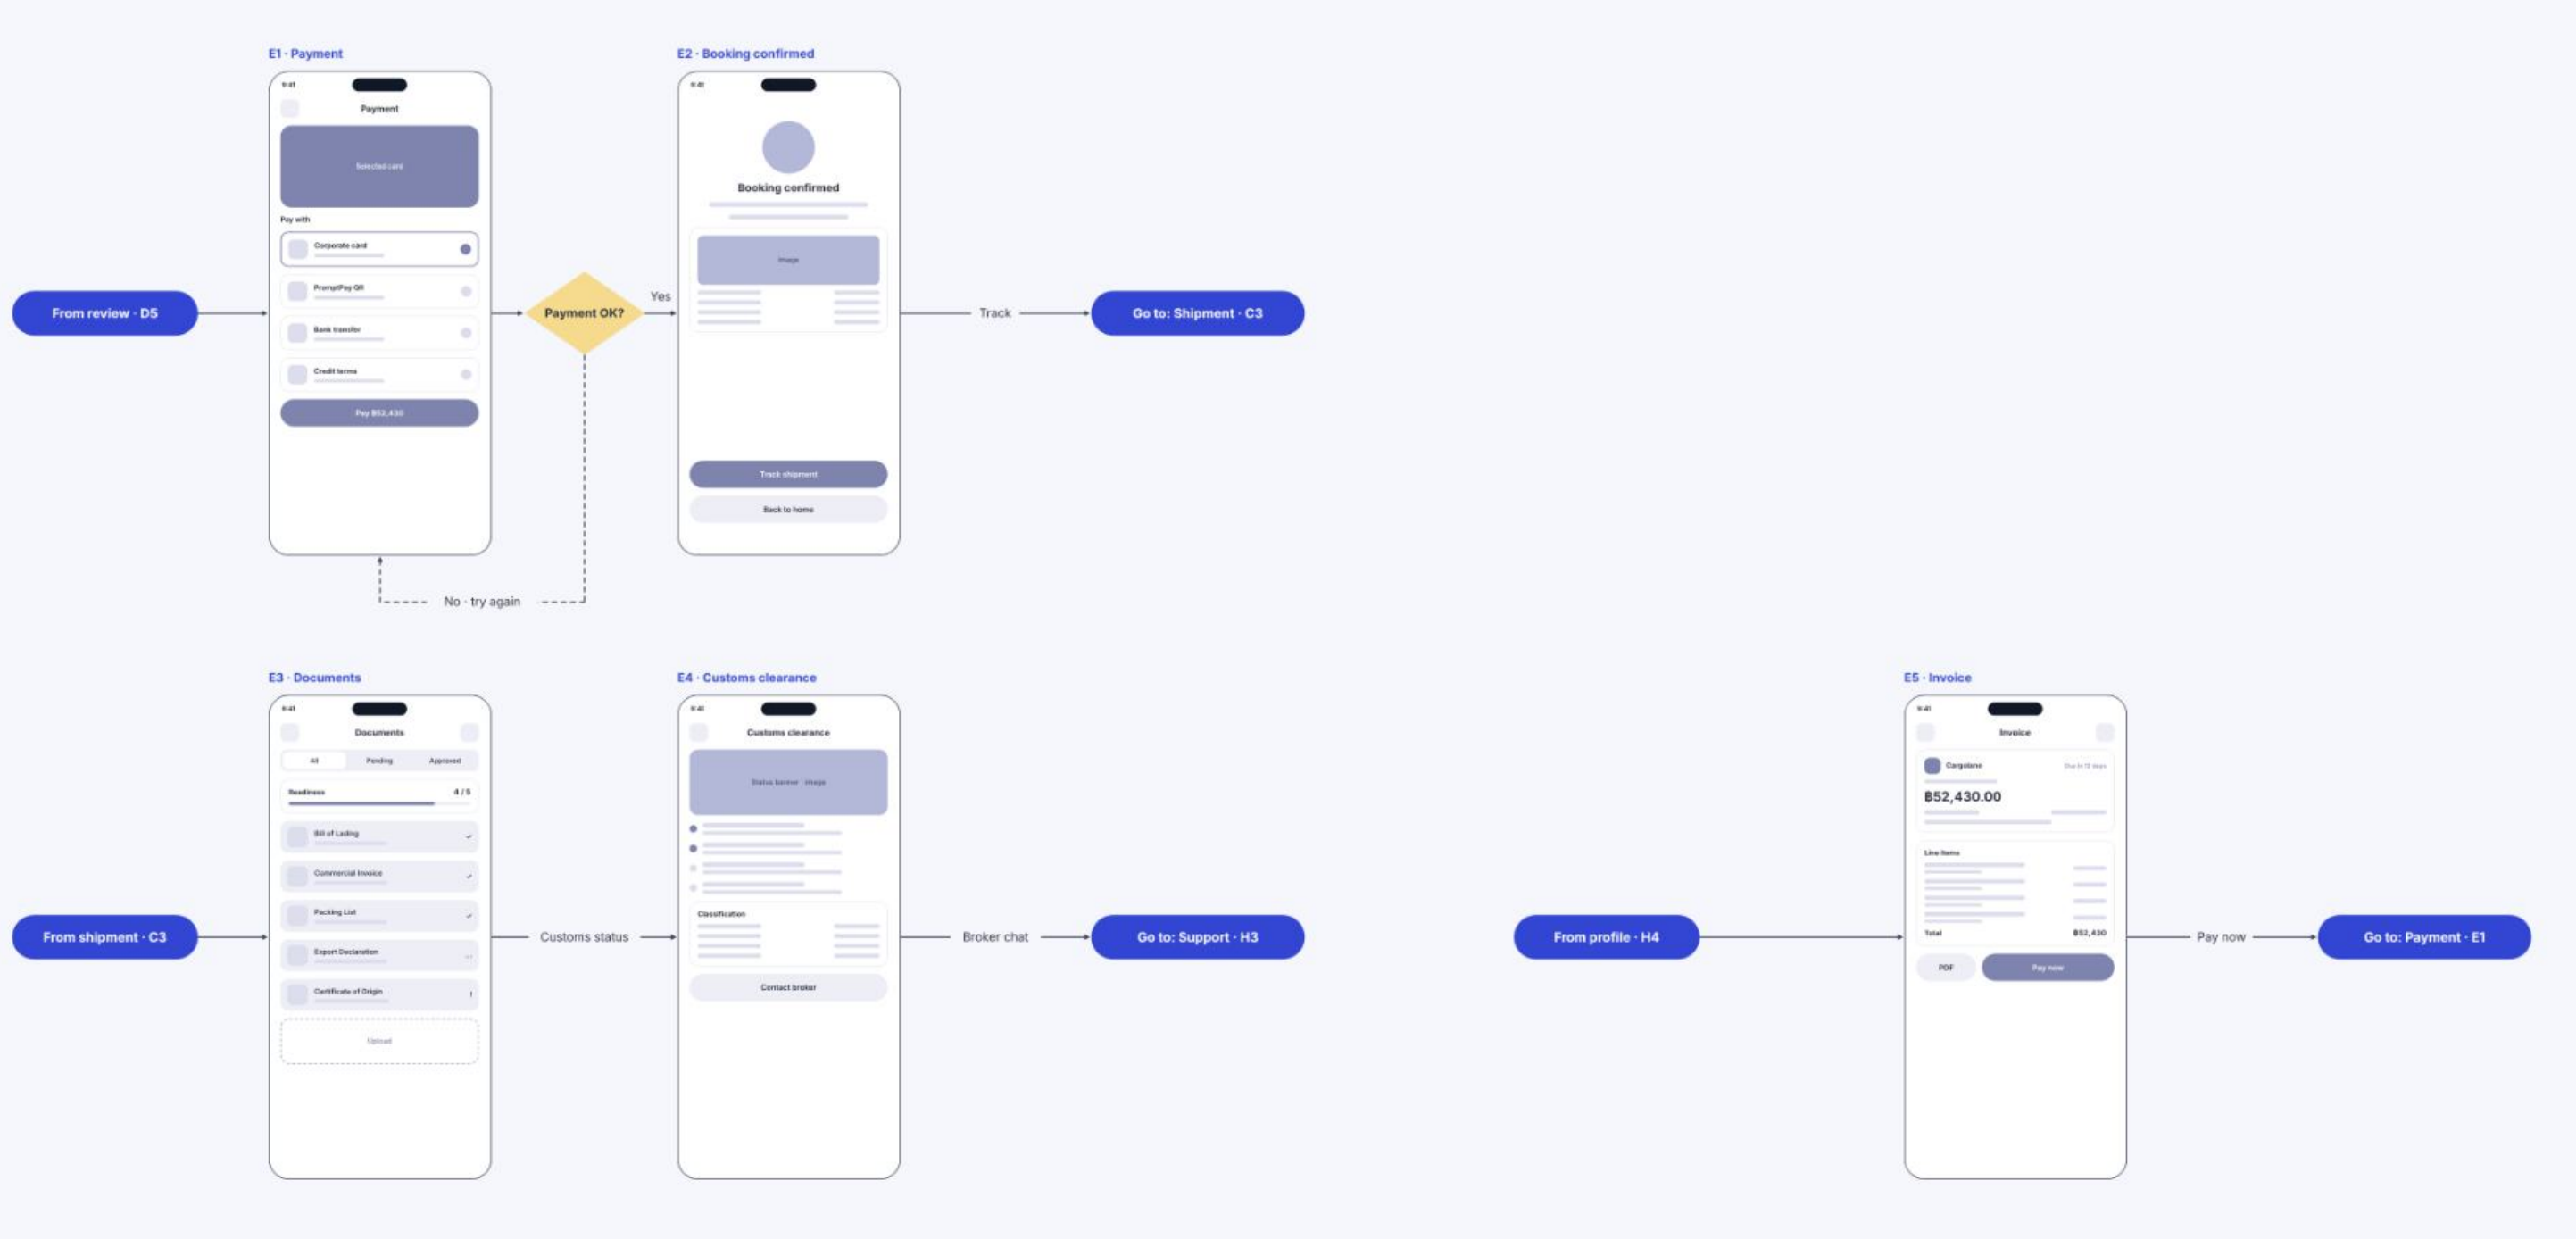
Bottom tab bar (Home, Track, Book, Stock, Reports) opens those sections from any screen that shows it. Continued in Wireframes · Part 2.

Wireframes · Part 2

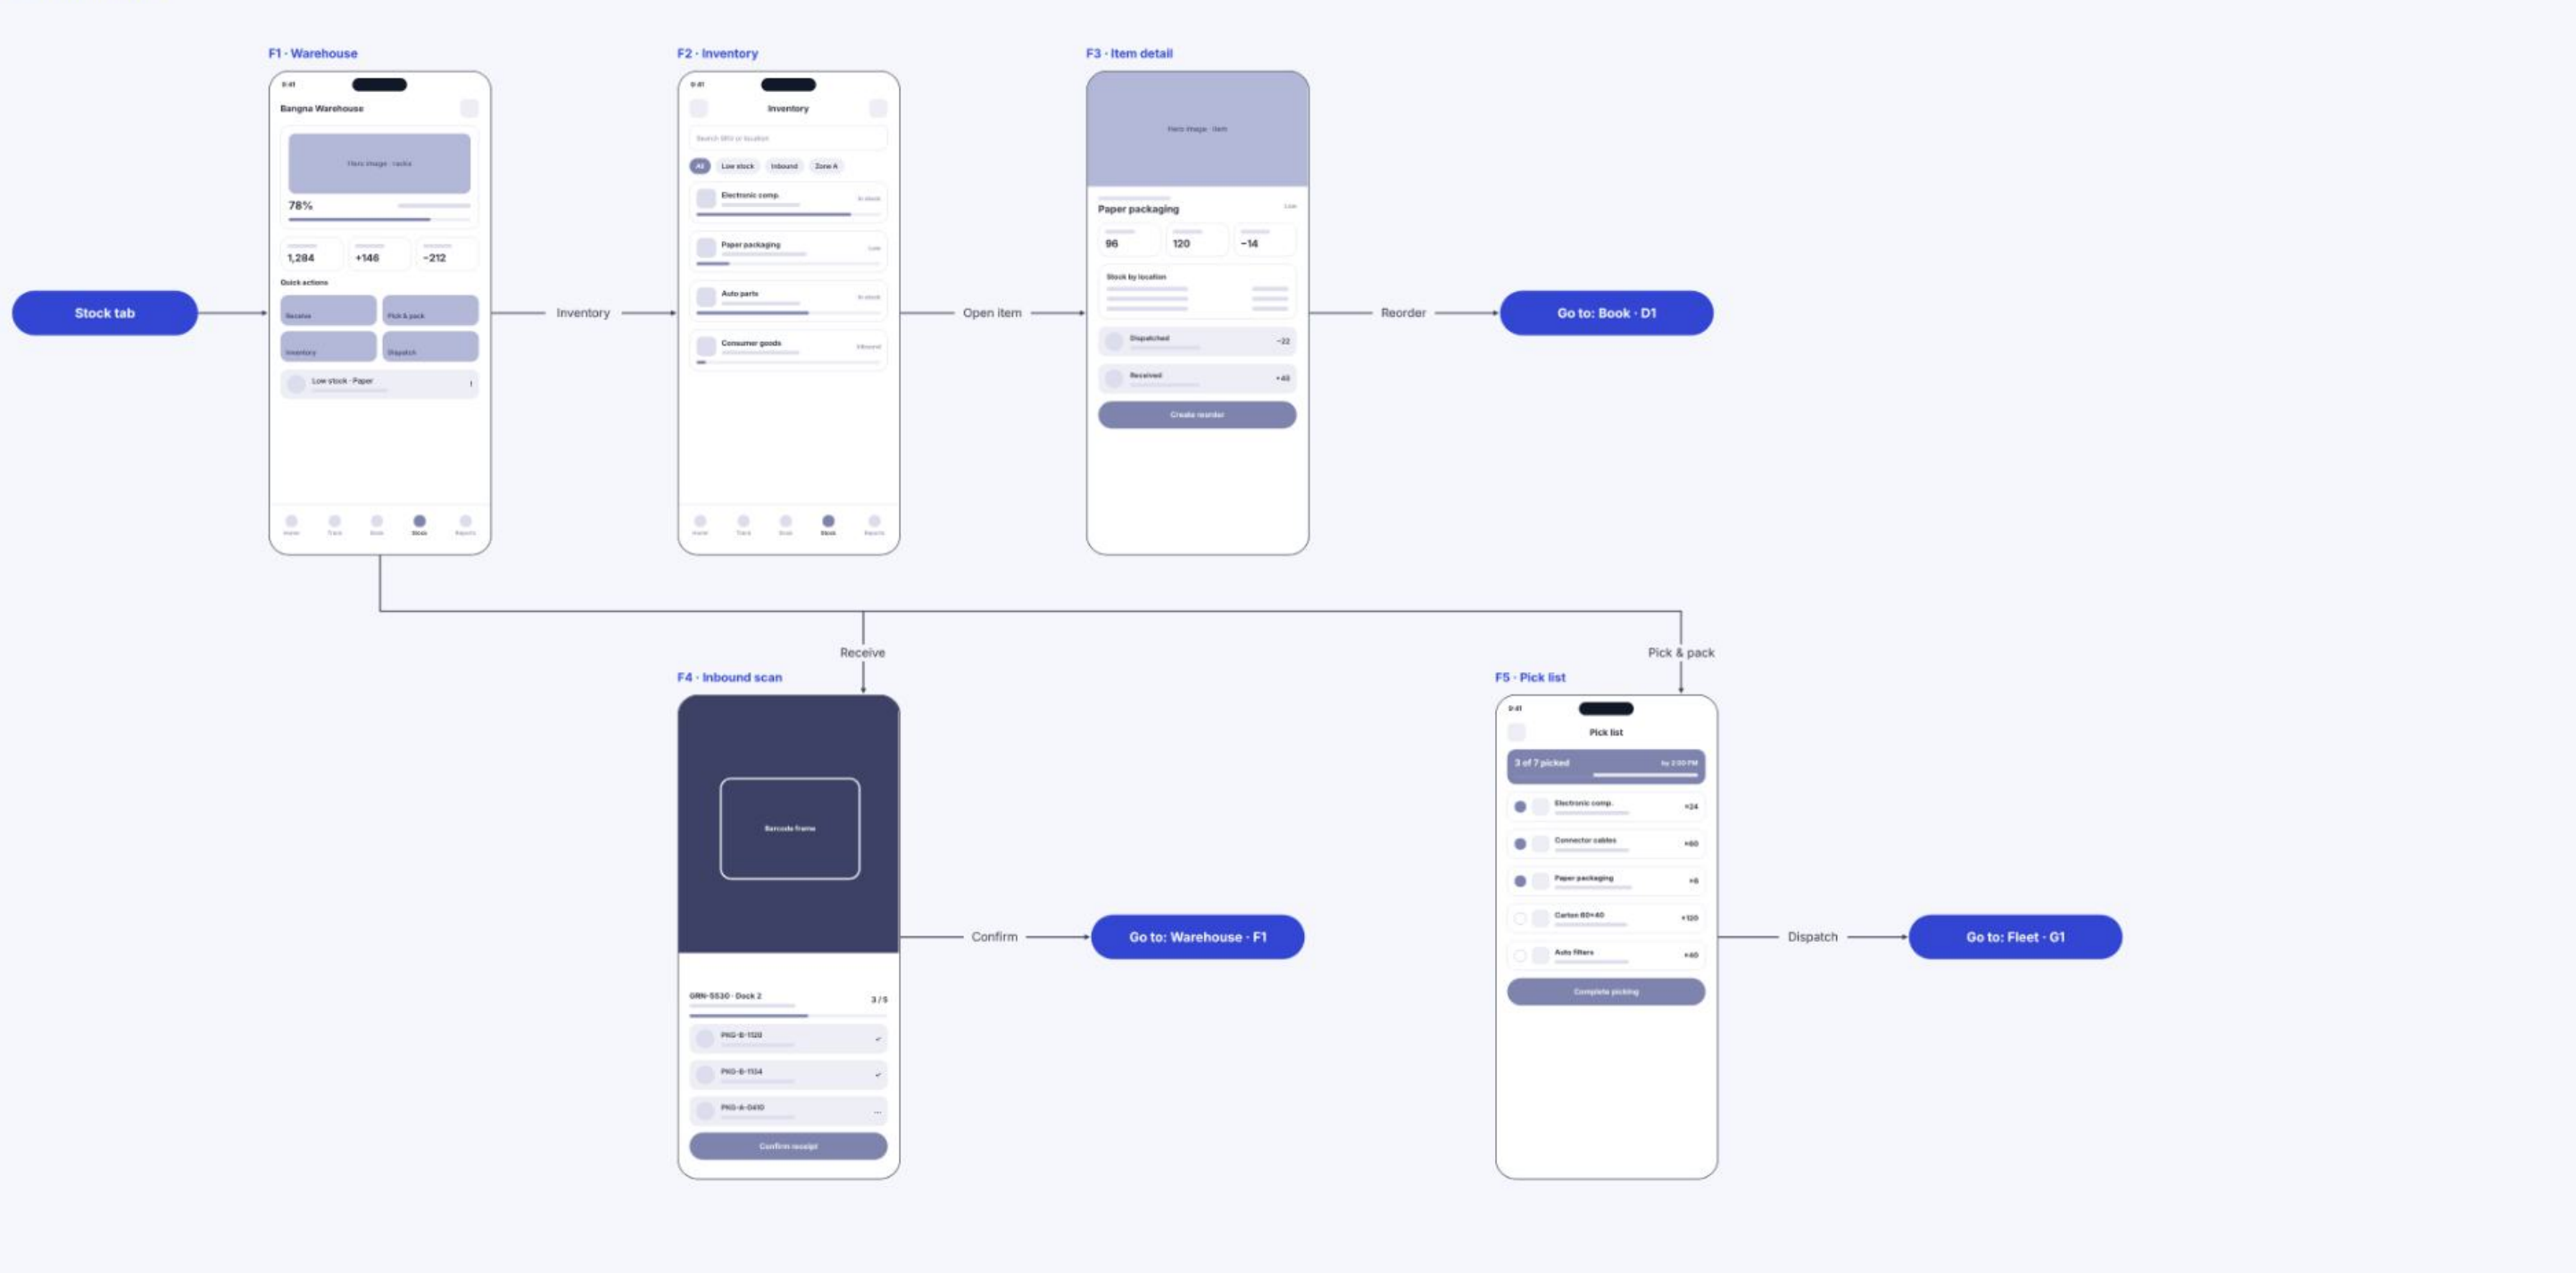
Part 2 covers payment & documents, warehouse, fleet & driver, and analytics & account. Codes match the UI frames on this canvas. Each arrow shows what a tap opens; "Go to" pills jump to a screen drawn elsewhere on these boards.

▬ Start / go to ☐ Screen ◆ Decision —— Tap / next ┈┈ Loop back

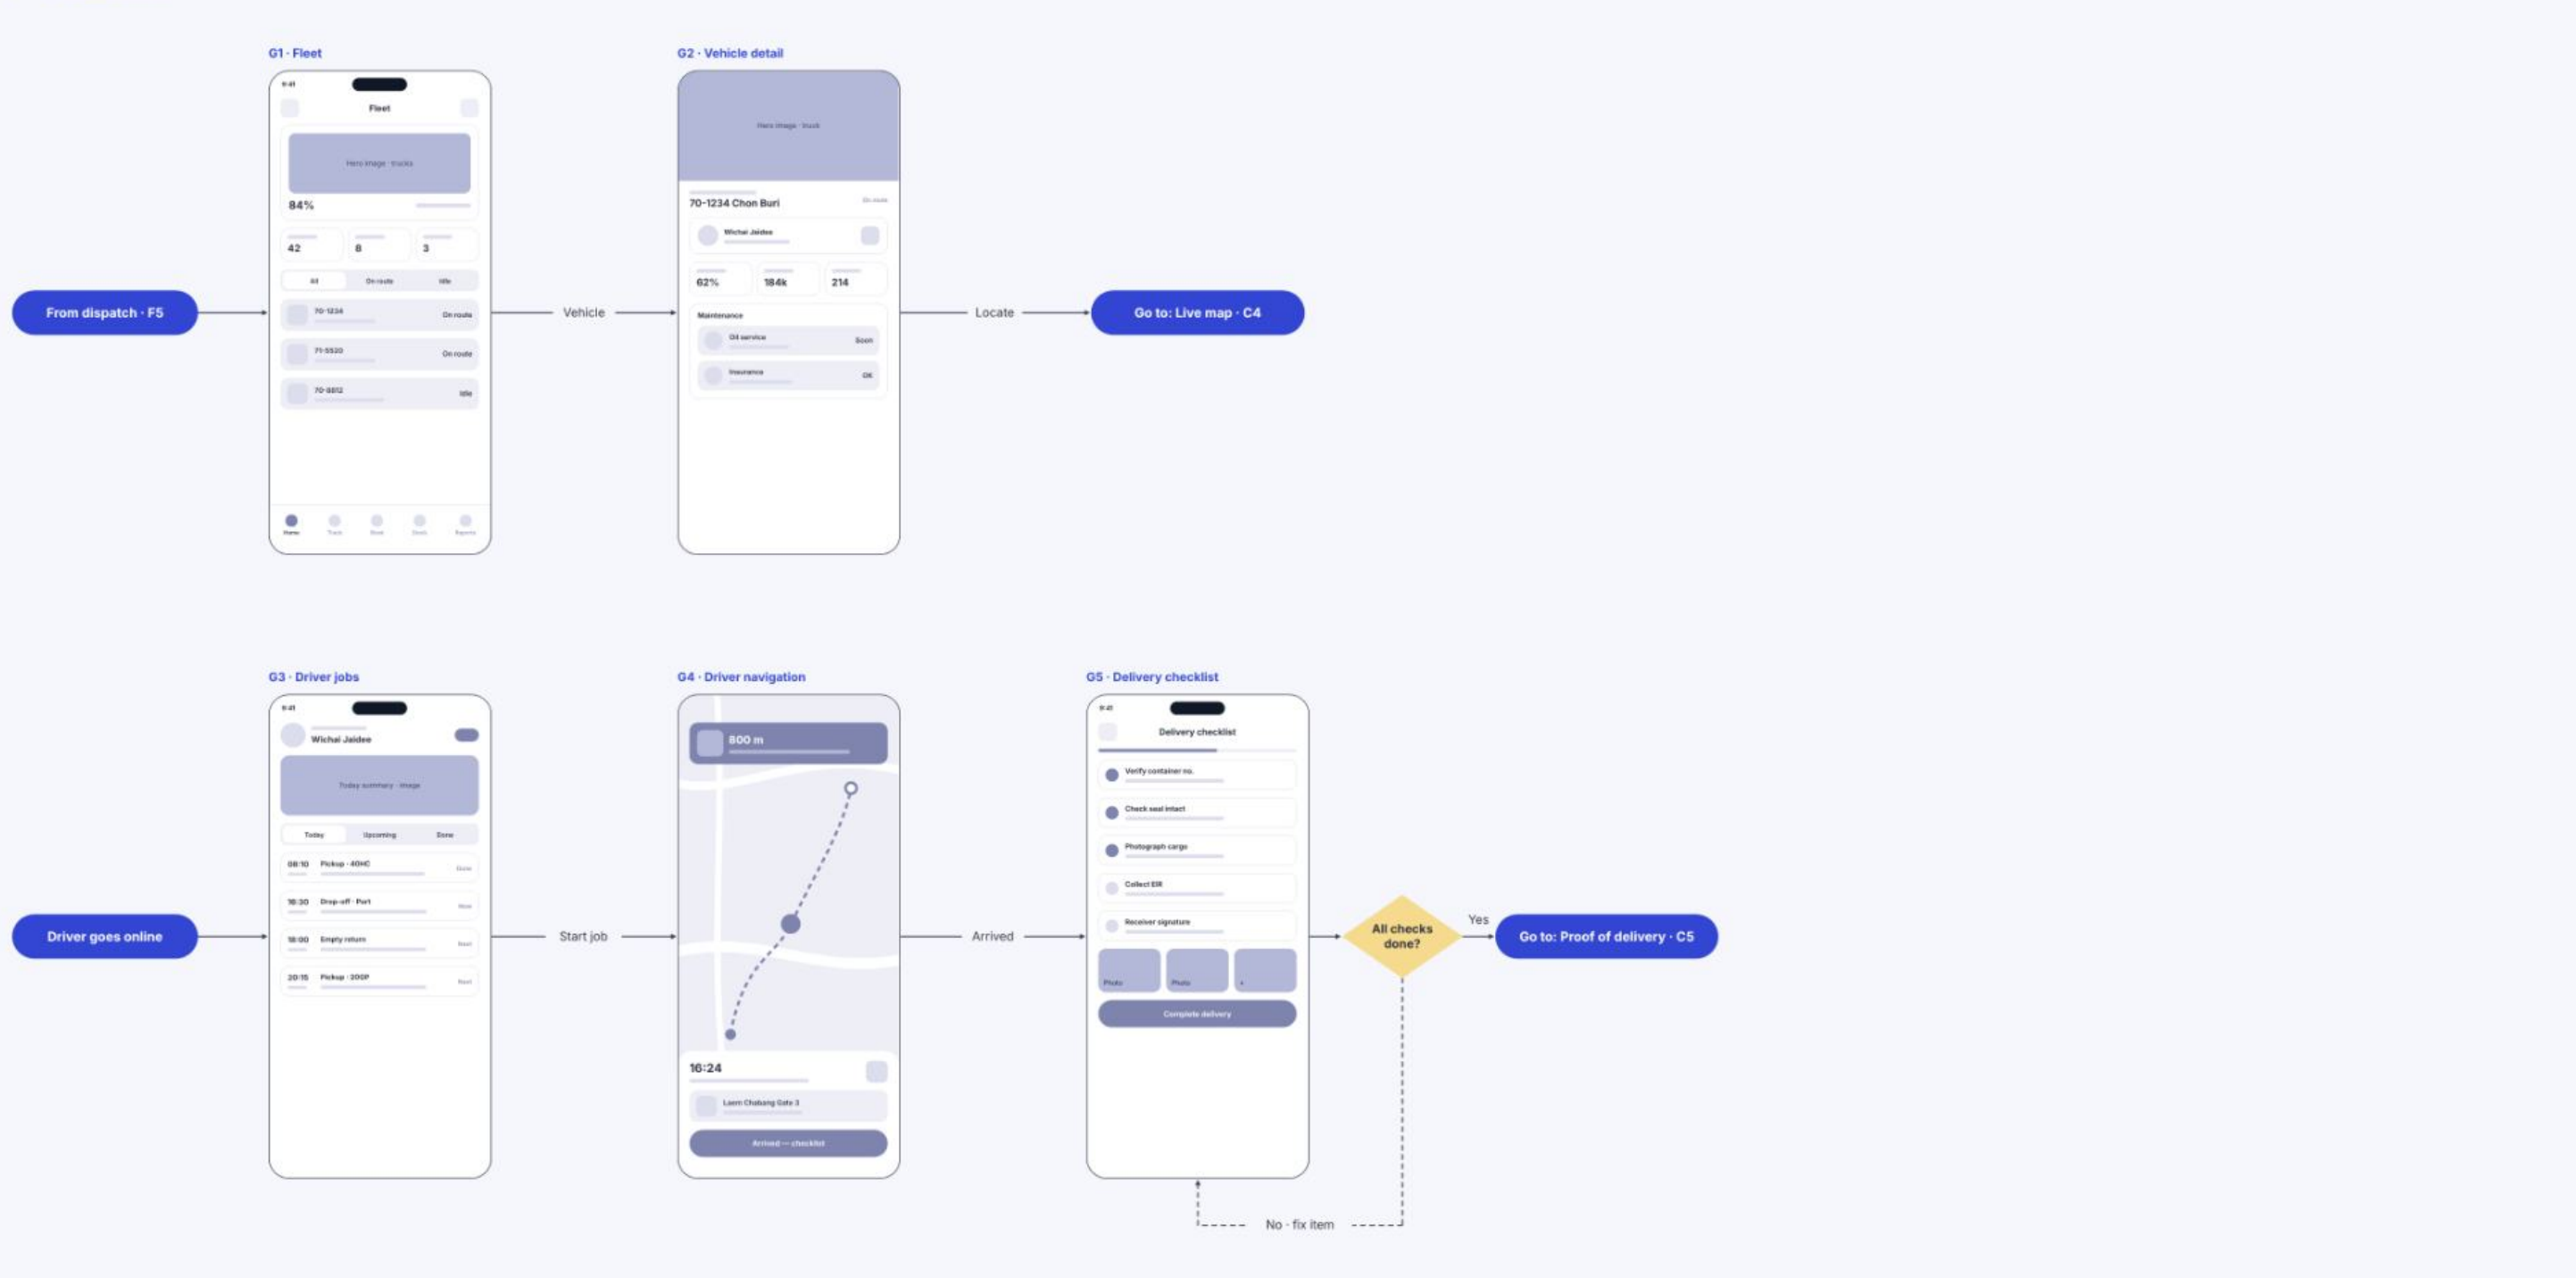
5 · Payment & documents



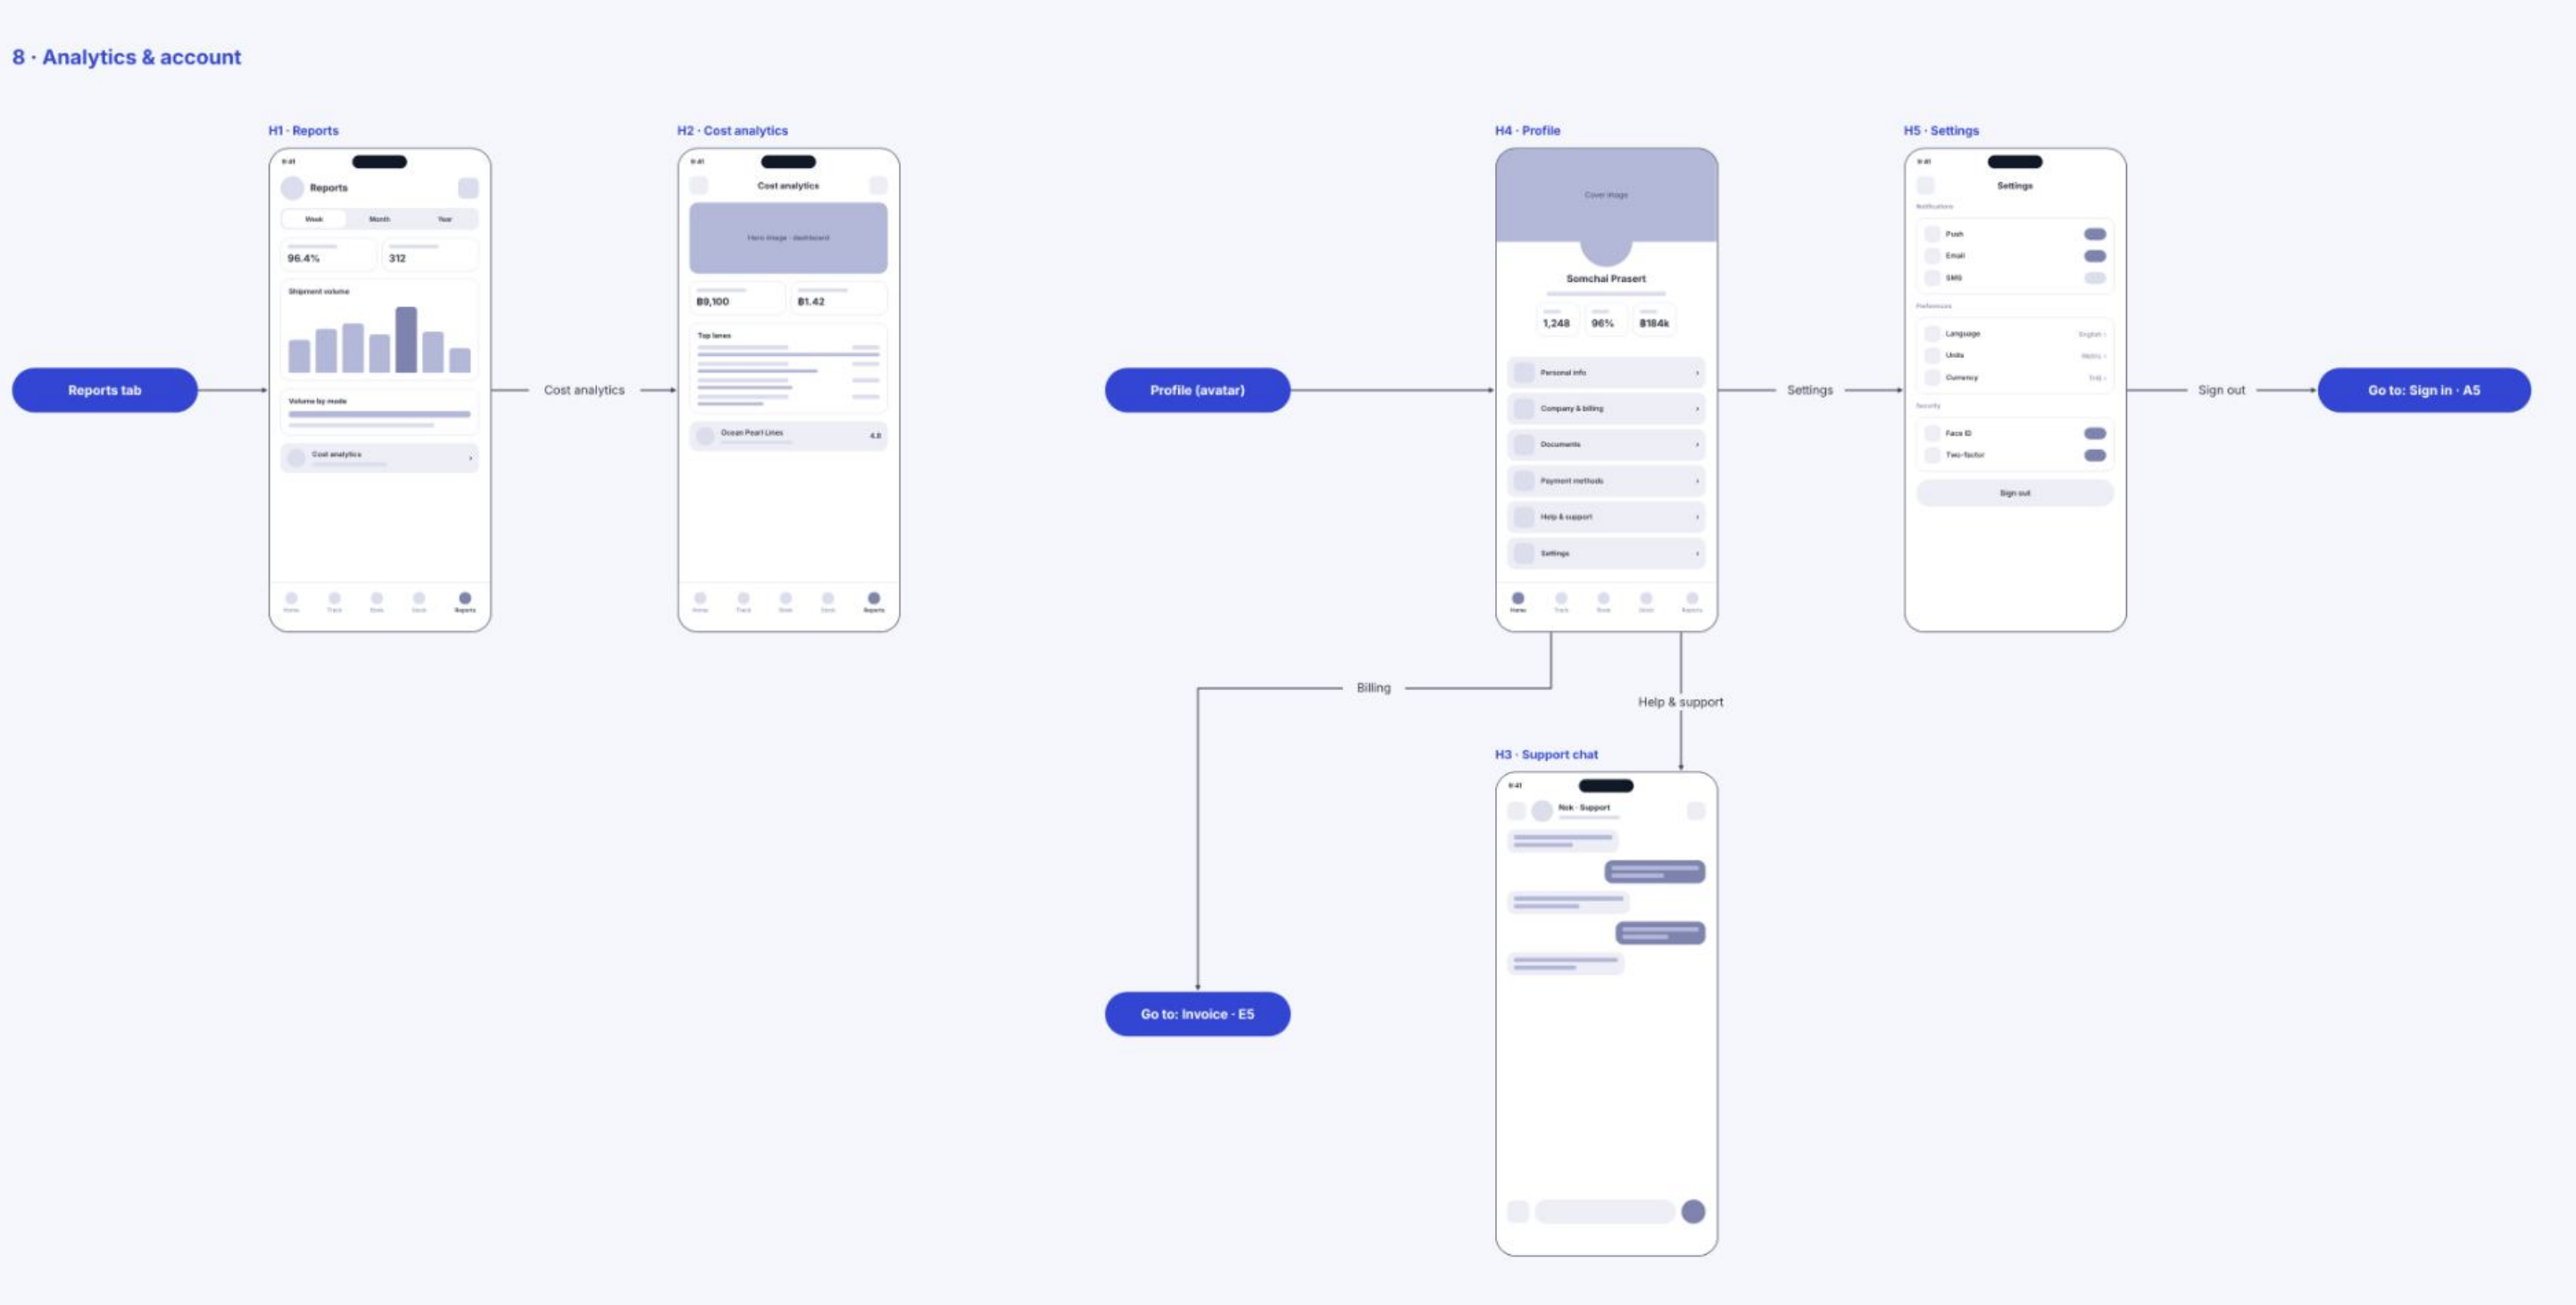
6 · Warehouse



7 · Fleet & driver



8 · Analytics & account



Driver screens (G3–G5) are used on the driver's device; the shipper and warehouse screens share the same tab bar.
