Customer journey map · Companion Wellness

How a pet owner looks after three pets with the app, from first setup to following up after a vet visit. Each stage links to the screens in this file. The persona, feelings and pain points are assumptions to check with real owners.

Screen Designed in this file · Screen Not designed yet

PO **PERSONA**

Busy pet owner with three pets

Pharina (Shiba Inu, 3), Latte (Scottish Fold, 5) and Red Bean (Toy Poodle, 8). Works full time and shares feeding with family.

Wants: no missed doses, quick bookings, proof each pet is healthy.

	STAGE 1 **Set up** Goal: get every pet in one place	STAGE 2 **Daily care** Goal: keep meals and walks on track	STAGE 3 **Plan and book** Goal: book vet and groomer without a phone call	STAGE 4 **Visit day** Goal: arrive on time and prepared	STAGE 5 **Follow up** Goal: see that the care is working
Actions	Downloads the app Adds Pharina, Latte and Red Bean Enters weight and past vaccines	Checks Home each morning Logs breakfast, water and walks with + Gives the 15:00 dental chew	Sees flea and tick drops due in 12 days Taps Book a visit, picks Checkup at 13:30 Reviews grooming on Oct 17	Gets a reminder in the morning Checks the time on the Home vet card Attends the checkup or video call	Sees weight at 9.8 kg, in the ideal range Reads the care tip on Profile Notes the score rose to 86 (+4)
Touchpoints	Profile Add pet form Home pet chips	Home Health Log entry sheet	Calendar Bookings Booking confirmed	Notifications list Home vet card Clinic (offline)	Health Home weight chart Profile
Thinking	*"Do I really have to type in all their records by hand?"*	*"Did someone already feed her this morning?"*	*"Is 13:30 really free, and how much will it cost?"*	*"What did the vet ask me to bring again?"*	*"She's finally in her ideal range."*
Feeling	Curious	Confident	Uncertain	Stressed	Reassured
Pain points	Vaccine history sits in paper booklets Three pets means three long setups	Logging the same meal every day is repetitive Family members can feed twice	No clinic name, vet or price on time slots No screen confirms the booking went through	No list of what to bring or how to get there Rescheduling means calling the clinic	Vet notes and prescriptions stay on paper Red Bean shows "needs attention" with no next step
Opportunities	Scan the vaccine booklet with the camera Copy shared details from one pet to the next	One-tap log of the usual portion Shared household log with who fed when	Show clinic, vet and price on each slot Confirmation screen with add to calendar	Visit-day card with checklist and map Reschedule in the app	Visit summary sent by the clinic Care plan for pets that need attention

User flow · Companion Wellness mobile app

Every tap on the mobile app, the screen it opens and the next tap. The tab bar (Home, Calendar, +, Health, Profile) sits on the five main screens, so those tabs work from any of them.
