Customer journey map · Sathorn mobile app

One retail investor's path from first download to a confirmed order and coming back the next day: what she does, which screen she is on, how she feels, and where the app can do better.

Screen in this file · Screen still to design · Proto-persona: an assumption to validate with research

PS **Ploy** 29 · Marketing executive, Bangkok · investing for 1 year

GOAL: Grow savings with large, dividend-paying Thai stocks

HABIT: Checks the market on her phone at lunch and on the BTS home

FRUSTRATION: Broker apps feel dense and full of jargon

NEEDS: Clear numbers, quick orders, confidence she is not making a mistake

	STAGE 1 **Join** Download, open an account, sign in	STAGE 2 **Check the market** A quick look at how the day is going	STAGE 3 **Research a stock** Find ideas and dig into one company	STAGE 4 **Place an order** Decide, fill the ticket, confirm	STAGE 5 **Track the result** Order matched, portfolio updated	STAGE 6 **Stay informed & return** Alerts, news and dates bring her back
GOAL	Get a trading account working without a branch visit	Know in 10 seconds if the market is up or down today	Decide whether PTT is worth buying at today's price	Buy 500 shares of PTT at a fair price, without errors	Be sure the order went through and see what she owns	Hear about what matters to her holdings without watching all day
ACTIONS	1. Installs the app 2. Verifies identity (ID card, selfie) 3. Links a bank account 4. Sets a PIN and turns on biometrics	1. Opens the app at lunch 2. Reads the SET Index and % change 3. Switches chart range 1D to 1M 4. Glances at breadth and turnover	1. Opens Markets, sorts Top gainers 2. Checks the sector heatmap 3. Searches or taps PTT 4. Reads key figures and bid / offer	1. Taps Buy on Stock detail 2. Enters volume and price 3. Checks total cost and fees 4. Confirms with PIN	1. Waits for a match 2. Gets an order notification 3. Opens Portfolio 4. Checks cost and profit or loss	1. Sets a price alert on PTT 2. Stars it to her Watchlist 3. Reads the market wrap 4. Notes the XD date in the calendar
SCREENS	App store page Account opening Sign in	Home Desktop dashboard	Markets · Top movers Sectors & flows Stock detail Search Sector stock list	Stock detail · Buy Order ticket Review & confirm	Order status Push notification Portfolio	Watchlist News & calendar Price alert Notifications
THINKING	*"How long until I can actually trade? Is my ID data safe?"*	*"Green today. Nice. Is that a big move or a normal one?"*	*"P/E 10.4, yield 6.1%. Is that cheap for an energy stock?"*	*"Limit or market order? What if I typed one zero too many?"*	*"Did it match? When do I actually pay for this?"*	*"I want to know when it drops, not stare at it all day."*
PAIN POINTS	Long ID check with no sign of progress Unclear when the account will be ready	No context for whether a move is large Sample-looking numbers erode trust	Jargon: P/E, P/BV, XD, bid / offer Stock rows do not open Stock detail yet	Fear of typos in volume or price Order types and fees not explained No ticket designed yet	Silence between submit and match Settlement date (T+2) not shown	Too many or irrelevant notifications News not tied to her holdings
OPPORTUNITIES	Step tracker with time estimate Let her explore the market while the account is pending	One-line summary: "SET up 0.75%, bigger than usual" Live data badge with time stamp	Tap-to-explain on every metric Compare P/E with sector average Link every stock row to Stock detail	Prefill price from bid / offer, step by tick Warn on unusual size or price Show total cost before confirm	Live status: queued, part filled, matched Show payment date and amount	Alerts for holdings and watchlist only Daily summary at market close XD and earnings reminders
MEASURE	Sign-up completion rate, time to first sign-in	Daily active users, time on Home	Stock detail views per session, searches	Ticket-to-confirm rate, order errors	Portfolio opens after a match	Alert opt-ins, 7-day return rate

Notes

1. Order valid? checks buying power or shares held, the price against the day's ceiling and floor, and whether the market is open.
2. Clickable in Play mode today: the tab bar, the two Markets view tabs, and Back on Stock detail. Stock rows, Buy / Sell and the Trade button are not linked yet.
3. The desktop dashboard is one page: its sidebar and tabs jump to the same sections, and Trade starts the same order flow.

Wireframe User Flow — SET Market App (Mobile)

Start / end · Screen · Decision · Tap / next · Loop back

Thai stock-market app · 21 low-fidelity wireframes, one per mobile screen, linked by tap paths: home, markets and research, order and confirm, watchlist and news. Badges match the "Mobile · ..." frames on this canvas. All figures are sample data.
