SKYLA CLINIC · UX

UX research plan & synthesis

What we need to learn about beauty-clinic patients, how we will learn it, and what we expect to find.

Status: hypotheses. No study has been run yet. Every insight below is an assumption to test with real participants before it guides decisions.

Research goals

1 How people choose

Understand how people pick a beauty clinic and a surgeon, and which signals make them trust one.

2 What blocks booking

Find what stops someone who is interested from booking a first consultation.

3 Support after treatment

Learn what patients need between treatment day and full recovery, and what makes them come back.

Research questions

- Which sources do people trust most when comparing clinics: friends, reviews, social posts or doctor credentials?
- How much do they need to know about price before they will contact a clinic?
- What makes a before-and-after photo believable, and what makes it feel fake?
- Would they book a paid video consult before visiting? What would make it feel worth it?
- What worries them most in the first two weeks after a procedure?
- For trans and international patients: what extra needs do they have around privacy, language and travel?

Methods & timeline

about 5 weeks

METHOD	WHO / WHAT	SAMPLE	WHEN	OUTPUT
Desk research & market scan	Market reports, clinic websites, public forums	—	Week 1	Landscape summary
Competitive review	5 clinic apps / LINE Official Accounts	5	Week 1	Feature matrix
Screener survey	People 20–50 who considered an aesthetic treatment	≈ 100	Week 2	Segments, recruit pool
In-depth interviews	Mix of first-timers, regulars, trans and international patients	8–10	Weeks 2–3	Insights, personas
Clinic shadowing	Front desk, consult room, aftercare calls	2 days	Week 3	Service blueprint
Usability tests	Clickable prototype (screens 01–30)	5–6 per round	Week 5	Issues, fixes

Competitive review

by type of service

Feature	Chain clinic app	Clinic LINE account	Booking marketplace	Skyla (proposed)
Prices shown before contact	✗	~	✓	✓
Consented before-and-after results	~	~	✗	✓
Named doctor profiles	~	✗	~	✓
Bookable video consult	✗	~	✗	✓
Deposit paid in the app	~	✗	✓	✓
Day-by-day recovery plan	✗	✗	✗	✓
Thai and English	~	~	✓	✓

✓ Usually ~ Sometimes ✗ Rarely Typical patterns by type of service, to confirm in the competitive review.

How might we…

- How might we show real results without making people feel judged or pressured?
- How might we make price clear early, even when the final quote needs a consult?
- How might we make a first-timer feel safe enough to book a consult today?
- How might we keep patients company during recovery without overwhelming the clinic team?

Expected insights

affinity themes to confirm or reject

Trust · Hypothesis

Trust comes from people, not ads

We believe people trust a named surgeon with real, consented results far more than a promotion.

Validate: Interviews: rank trust signals
Design response: Doctor profiles, Before & after (13–15)

Price · Hypothesis

Hidden prices stop the first step

We believe a clear "from" price removes the biggest reason people never contact a clinic.

Validate: Survey + interview probe
Design response: From prices on 08, 11, 12

Consult · Hypothesis

People want to ask before they commit

We believe a short, bookable video consult lowers the risk of the first visit.

Validate: Prototype test: consult vs visit
Design response: Video consult (19, 26)

Booking · Hypothesis

Long forms feel like a sales trap

We believe 4 short steps with a small deposit feel safer than a long form or a call-back.

Validate: Usability test completion
Design response: Booking flow (19–23)

Recovery · Hypothesis

Recovery is lonely and uncertain

We believe daily tasks and a one-tap red-flag call cut anxiety and support calls.

Validate: Diary study after treatment
Design response: Recovery plan (28)

Privacy · Hypothesis

Some patients need extra discretion

We believe trans and private patients want neutral notifications and their chosen name everywhere.

Validate: Interviews with trans patients
Design response: Notifications (29), Profile (30)

How we will measure success

Metric	Definition	Baseline
Consult booking rate	Visitors to a treatment page who book a consult	Baseline: to measure
Booking completion	Started bookings that reach "You're booked!"	Baseline: to measure
Drop-off at payment	Share who leave on Review & pay (22)	Baseline: to measure
Recovery task completion	Daily care tasks ticked in the first 14 days	Baseline: to measure
Return within 6 months	Patients who book a second service	Baseline: to measure

SKYLA CLINIC · UX

Personas

Four patient types the Skyla app is designed for, drawn from the research questions and journey map.

Status: hypotheses. These are proto-personas built from assumptions. Replace or adjust them with what the interviews and survey show.

NP · THE CAREFUL FIRST-TIMER · Proto-persona

Nicha Pongsiri, 32

Marketing executive · Bangkok

Jawline contouring · First surgery · Thai

> "I want to look like me, just more defined, and I need to know the real cost first."

GOALS
- A natural-looking result she can plan around work
- Pick a surgeon she trusts, not just a promotion
- Know the full cost before committing

FRUSTRATIONS
- Prices only given after a sales call
- Before-and-after photos that look edited
- Not knowing what recovery really feels like

BEHAVIOURS
- Researches for weeks on Instagram, TikTok and forums
- Asks close friends for referrals
- Messages clinics on LINE in the evening

WHAT SKYLA MUST DO
- "From" prices and doctor profiles (11, 12, 14)
- Video consult before visiting (19, 26)
- Day-by-day recovery plan (28)

Digital confidence low → high ■■■■□
Price sensitivity low → high ■■■■□
Anxiety about surgery low → high ■■■■□

PS · THE SKIN-CARE REGULAR · Proto-persona

Ploy Sirisuk, 26

Office administrator · Nonthaburi

Laser & facials · Monthly visits · Thai

> "I come back every month. I just want booking to take ten seconds."

GOALS
- Keep her skin routine on track
- Get good value from packages and offers
- Rebook her usual slot quickly

FRUSTRATIONS
- Calling to book during work hours
- Offers she hears about too late
- Repeating her skin history each visit

BEHAVIOURS
- Uses LINE and TikTok daily
- Compares package prices between clinics
- Books lunch-time or after-work slots

WHAT SKYLA MUST DO
- Personal offers and Saved items (16, 18)
- Fast date and time picker (20)
- Booking history in My bookings (24)

Digital confidence low → high ■■■■■
Price sensitivity low → high ■■■■■
Anxiety about treatment low → high ■□□□□

AC · THE TRANSITION PLANNER · Proto-persona

Arin Chaiyaporn, 29

Graphic designer · Chiang Mai

Transgender center · Voice & facial feminization · Travels to Bangkok

> "I need a team that gets it right every time: my name, my pronouns, and my privacy."

GOALS
- Plan several procedures with one experienced team
- Feel respected at every step
- Fit visits around travel and recovery

FRUSTRATIONS
- Being called by her old name at reception
- Notifications that reveal treatment details
- Hard to find surgeons with relevant experience

BEHAVIOURS
- Learns from community groups and trusted creators
- Prefers chat over phone calls
- Plans trips months ahead

WHAT SKYLA MUST DO
- Chosen name and pronouns in Profile (30)
- Discreet notification text (29)
- Specialist doctor profiles and results (13–15)

Digital confidence low → high ■■■■■
Price sensitivity low → high ■■■□□
Need for privacy low → high ■■■■■

DM · THE MEDICAL TRAVELLER · Proto-persona

Daniel Moore, 41

Project manager · Melbourne, Australia

Hair transplant · Medical tourism · English

> "Before I book a flight, I want to talk to the surgeon and see the whole price."

GOALS
- A clear total price including follow-ups
- Meet the surgeon online before flying
- Recover at home with remote check-ins

FRUSTRATIONS
- Time zones and slow email replies
- Quotes that change after arrival
- No follow-up once he is home

BEHAVIOURS
- Compares clinics across countries
- Reads English reviews and forums
- Books on desktop, follows up on phone

WHAT SKYLA MUST DO
- English throughout and clear deposit (22)
- Video consult across time zones (19, 26)
- Remote recovery plan and chat (27, 28)

Digital confidence low → high ■■■■□
Price sensitivity low → high ■■■□□
Anxiety about travel low → high ■■■■□

SKYLA CLINIC · UX

Customer journey map

Scenario: first jawline contouring, from first look to coming back

PROTO-PERSONA NP Nicha Pongsiri, 32 · Office worker in Bangkok · first surgery

GOAL A slimmer jawline that still looks like her, with downtime she can plan around work.

WORRIES Safety and doctor credentials, the real total cost, and not knowing what recovery feels like.

	1 Discover	2 Research	3 Consult	4 Book	5 Treatment	6 Recover	7 Return
DOING	Sees a friend's result or a social post	Compares clinics, doctors, prices and results	Video-calls a surgeon to talk through options	Picks a date and pays the deposit	Pre-op tests, then surgery day at the clinic	Follows the care plan at home	Shares results, comes back for skin care
THINKING	"Can I trust this clinic?"	"What will it really cost me?"	"Will it look natural on my face?"	"Can I fit this around work?"	"I'm nervous — what happens today?"	"Is this swelling normal?"	"Worth it. What's next?"
TOUCHPOINTS	Social · LINE · Splash & onboarding	Search · Centers · Before & after · Doctors	Video consult · Chat	Booking flow · PromptPay	Reminders · Booking detail · Clinic	Recovery plan · Chat · Call button	Offers · Saved · Notifications
PAIN POINTS	Too many look-alike promos	Prices hidden until you call	Hard to get real time with a doctor	Long forms, unclear deposit	Anxiety while waiting	Unsure what's normal at home	Nothing brings them back
OPPORTUNITIES	Clear brand story in 3 onboarding cards (02–04)	"From" prices and real results up front (11, 12, 15)	Bookable video consult with a named surgeon (19, 26)	4-step booking, 500 THB deposit, PromptPay (19–23)	Prep tips and day-of reminders (25, 29)	Daily care tasks and a red-flag call button (28)	Saved items and personal offers (16, 18)

Plastic Surgery Center
Facial contouring, nose, eyelid and chin procedures planned with board-certified plastic surgeons.
Jawline contouring · From 120,000 THB
Rhinoplasty · From 45,000 THB
Double eyelid surgery · From 35,000 THB
Chin augmentation · From 39,000 THB

Plastic Surgery Center
Jawline contouring
Reshapes the jaw angle and chin for a slimmer, more defined lower face. Your surgeon plans the contour from a facial assessment.
Duration: 2–3 hours
Anesthesia: General
Recovery: 2–4 weeks
Hospital stay: 1 night
What's included
- Consultation & facial assessment
- Pre-op lab tests
- Surgery & anesthesia
- Follow-up visits & aftercare kit

Starting from 120,000 THB

Skyla Care Team · Usually replies in a few minutes
Today 14:02
Hello! How can we help you today?
Hi, I'd like to know about recovery after jawline contouring.
Thanks for the photo. Recovery depends on the technique your surgeon recommends — they'll walk you through it during a consultation. Would you like to book one?

Recovery
DAY 5 of 14
HEALING WELL · Jawline contouring · AK Dr. Arthit Kittisak
Today's care · 2 of 4 done
☑ Take prescribed medication · 08:00 · As directed by your doctor
☑ Cold compress · 10:00 · 15 min on each side
○ Sleep with head raised · 22:00 · Use 2 pillows tonight
○ Upload progress photo · Any time · Front and side views
Severe pain, bleeding or fever? Contact the clinic right away.
