00 · UX RESEARCH

What we need to learn before building Unicity Shop

Research plan, a heuristic review of the current Shop all page, and how each finding shaped the 35-screen app. Interview results are still to come: items marked “to validate” are team assumptions, not user data.

Done · Heuristic review Planned · Interviews & tests

RESEARCH GOALS

1. Understand how people choose between 29 Unicity products, and where they get stuck.
2. Learn what makes shoppers pick a subscription over a one-time purchase, and what makes them cancel.
3. Find out how referral codes are shared and entered today.

RESEARCH QUESTIONS

- How do first-time shoppers decide where to start?
- Do people understand “1 Time Purchase” vs “Subscription” at a glance?
- What information do they need before adding to cart?
- What do subscribers want to change on their own (date, items, pause)?
- When and how do friends receive and use a referral code?

WHO WE TALK TO

1 **New to Unicity**
Interested in wellness, has never ordered · [n] people

2 **Active subscribers**
Ordered Feel Great in the last 3 months · [n] people

3 **Members who refer**
Share a referral code with friends · [n] people

Markets: TH and AU · mix of ages and devices

Research methods

Timing is a proposal · dates [to confirm]

METHOD	WHO	WHAT WE LEARN	OUTPUT	STATUS
Heuristic review	Design team	Usability problems on the current Shop all page	6 findings (below)	Done
Stakeholder interviews	Product, support, member team	Business goals, top support questions, subscription rules	Goals & constraints list	Planned
User interviews (45 min)	All 3 segments	Motivations, buying habits, subscription and referral stories	Affinity map, validated personas	Planned
Competitive audit	Design team	How other subscription wellness apps handle skip, pause and add-ons	Pattern library	Planned
Analytics review	Current website data	Drop-off between product, cart and checkout; top searches	Funnel baseline	Planned
Usability test of prototype	5–8 people per round	Can people buy a subscription, skip a delivery and share a code?	Issues list, task success	Planned

Heuristic review · current Shop all page

Observed on the page provided · severity is the team’s rating

F1 · Findability — High
29 products sit in one long grid
Only a “Featured” sort. No categories or goals, so a first-time shopper has no way to narrow down.

F2 · Recognition — High
One-time and subscription packs look the same
Feel Great Unimate+ appears twice ($290 and $271) with the same photo. Only a small corner badge tells them apart.

F3 · Consistency — Medium
Badges mix offer and purchase type
“Limited offer”, “1 Time Purchase” and “Subscription” share one slot and style, and none explains what it means.

F4 · Flow — Medium
Referral code lives in the top bar
“Enter referral code” is in the site header, away from sign-up and checkout, where people expect to enter it.

F5 · Information — Medium
Cards show no benefit
Each card has name, pack size and price only. Shoppers must open every product to learn what it is for.

F6 · Trust — Low
Health disclaimer only in the footer
The FDA statement sits at the very bottom, far from the product claims it applies to.

From finding to design decision

FINDING	DESIGN DECISION	SCREENS
F1	Shop by goal, category chips, filter & sort, search and a 3-question quiz	08 · 09 · 10 · 11 · 12 · 13
F2	One product page with a Subscribe / One-time choice and a clear “Save $19” tag	14 · 16
F3	Separate badge colours: red for offers, green for subscription, neutral for one-time	12 · 18 · 22
F4	Referral field in Create account and Cart; sharing from Profile	05 · 18 · 32 · 34
F5	Quiz result explains why each pick fits; product page links to facts and how-to-use	10 · 14 · 15
F6	Disclaimer next to product details and supplement facts	14 · 15

How might we…

- help a first-time shopper find the right product in under a minute?
- make the subscription choice obvious, and easy to change later?
- let friends use a referral code without hunting for it?

Success measures

Task success: buy a Feel Great subscription	**[target %]**
Picks the intended purchase type	**[target %]**
Time from Home to order placed	**[target min]**
Subscription changes done in-app	**[target %]**
Orders with a referral code	**[baseline → target]**

WEEK 1
Discover
Stakeholders, analytics, competitive audit

WEEK 2
Interview
Sessions with all 3 segments

WEEK 3
Synthesise
Affinity map, update personas and journey

WEEK 4
Test
Usability test the prototype, iterate

00 · PERSONAS

Who Unicity Shop is for

Three proto-personas, one per research segment. Built from the heuristic review and team assumptions; validate and update them after the user interviews.

Maya is the persona in the Customer Journey Map. Alex is the signed-in member shown across the UI screens.

PRIMARY · NEW TO UNICITY

M

Maya

32 · Marketing coordinator · Bangkok, TH

“I want to feel better, but I don’t have time to research 29 products.”

Heard about Feel Great from a friend’s post and got a referral link. Shops on her phone during the commute and reads labels before she buys anything new.

GOALS

- A simple daily routine she can stick to
- Understand what each product is for
- Know the total cost and delivery date before paying

FRUSTRATIONS

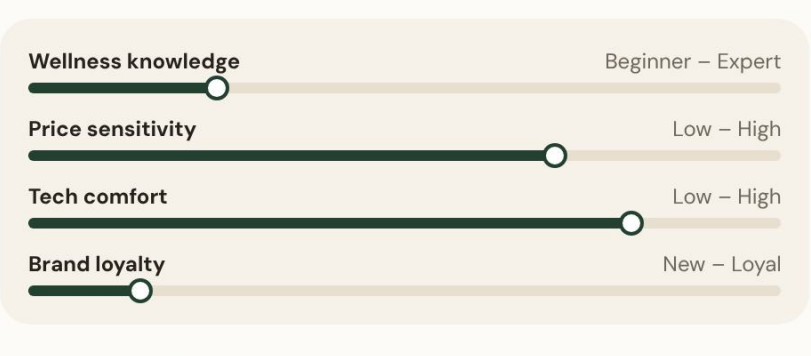
- Too many products and no clear place to start
- Can’t tell one-time and subscription packs apart
- Shipping cost only shows at the very end

BEHAVIOURS

- Discovers products through friends and social posts
- Compares prices and pack sizes before deciding
- Abandons checkout when costs are unclear

CHANNELS

Instagram · LINE · Mobile app



KEY SCREENS IN THE APP

02 Welcome · 09 Quiz · 12 Shop by goal · 14 Product · 18 Cart

SCENARIO

Opens the referral link, takes the Wellness Quiz, and subscribes to Feel Great Unimate+ after seeing the $19 saving.

SECONDARY · ACTIVE SUBSCRIBER

AM

Alex Morgan

38 · Project manager · Sydney, AU

“Just ship it every month, and let me skip when I’m travelling.”

Subscribed to Feel Great Unimate+ since Aug 2026. Travels for work a few times a quarter and wants to manage deliveries without contacting support.

GOALS

- Never run out of his daily products
- Move or skip a delivery in a few taps
- Add one-off items to the next box

FRUSTRATIONS

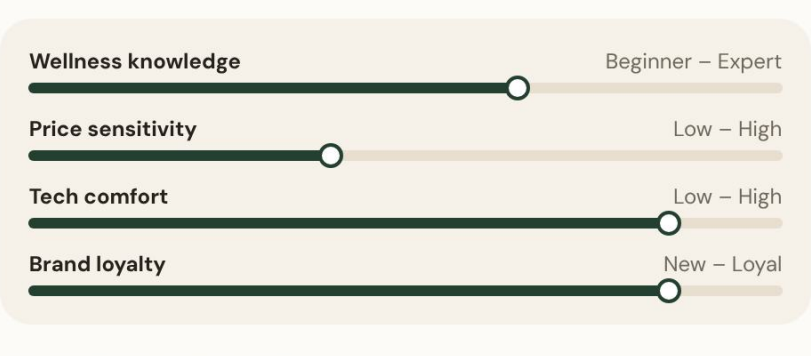
- Changing a subscription means using the website
- No reminder before the next charge
- Ordering extras means a separate order and shipping

BEHAVIOURS

- Checks the app around each delivery date
- Reorders the same products every month
- Uses saved address and card

CHANNELS

Mobile app · Email · Push



KEY SCREENS IN THE APP

24 Orders · 26 My subscription · 27 Reschedule · 28 Skip · 30 Add to next delivery

SCENARIO

Gets a reminder before 12 Nov, skips the delivery while away, then adds Bio-C to the December box.

SECONDARY · MEMBER WHO REFERS

N

Nok

45 · Small-business owner · Chiang Mai, TH

“Friends ask me what to buy. I need something easy to send them.”

A long-time Unicity member who recommends products to friends and family. Spends a lot of time in chat explaining products and reminding people to use her code.

GOALS

- Share her referral code in one tap
- Help friends pick the right products
- Keep track of her own orders

FRUSTRATIONS

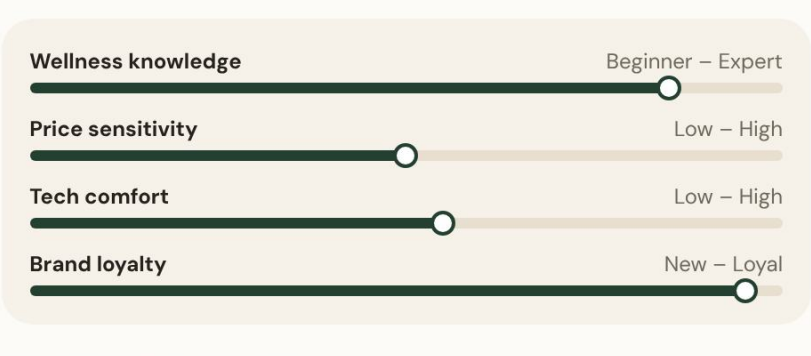
- Friends forget the referral code at checkout
- Explaining each product over chat takes time
- Hard to find her code when she needs it

BEHAVIOURS

- Shares links in LINE groups and on Facebook
- Sends friends to the quiz before they buy
- Orders for the household in one go

CHANNELS

LINE · Facebook · Mobile app



KEY SCREENS IN THE APP

32 Profile · 34 Share code · 05 Create account · 10 Quiz result

SCENARIO

Shares her code from Profile in a LINE group; a friend signs up with it and it is already filled in at checkout.

01 · CUSTOMER JOURNEY MAP

Buying wellness products in the Unicity Shop app

M **Persona: “Maya”, 32 · Office worker, Bangkok**
Health-minded but short on time. Wants an easy daily routine, deliveries that arrive on schedule, and clear product info before buying.

	STAGE 01 **Discover**	STAGE 02 **Research & compare**	STAGE 03 **Decide**	STAGE 04 **Checkout & delivery**	STAGE 05 **Use & reorder**
Goals Goals	Find out what’s new and which Limited Offers are worth it	Understand what each product is, its pack size, and whether it fits their lifestyle	Choose between one-time and subscription for the best value	Pay easily, add a referral code, know the delivery date	Never run out, and manage deliveries themselves
Actions Actions	Sees a Feel Great post on social Receives a referral link Downloads the app, opens Home	Searches “Unimate”, “Balance” Filters by category / goal Check pack sizes, e.g. 30 stick packs	Compare Feel Great Unimate+ one-time $290 vs subscription $271 Save to wishlist / add to cart	Reviews cart, adjusts quantities Enters referral code Picks address + pays	Track order Gets a reminder before the next delivery Skip, reschedule or add items
Touchpoints	Social · Referral link · App Store / Google Play · Home	Search · Categories · Product list · Product detail	Purchase options · Wishlist · Cart	Checkout · Referral code field · Payment · Confirmation email	Order tracking · Push · My subscriptions
Emotion Emotion curve					
Thoughts Thoughts	*“What is Feel Great, and what do I need to buy?”*	*“29 products. Where do I start?”*	*“Can I cancel or reschedule a subscription?”*	*“How much is shipping, and when will it arrive?”*	*“I’m running low. Remind me first.”*
Pain points	Promo info and pack names are scattered across channels and confusing	Catalog is one long grid with no grouping by need	1 Time Purchase and Subscription packs look almost identical, easy to pick the wrong one	Referral field is hard to find; shipping cost only shows at the end	Managing deliveries requires the website; no reminders
Opportunities Opportunities	Home tells the Feel Great story clearly + Limited Offer deal cards	Shop by goal (energy, gut, sleep…) + search with filters	Side-by-side purchase options showing how much you save	Streamlined checkout, referral field in the cart, full cost summary	My subscriptions screen: skip, reschedule or edit in-app + push reminders

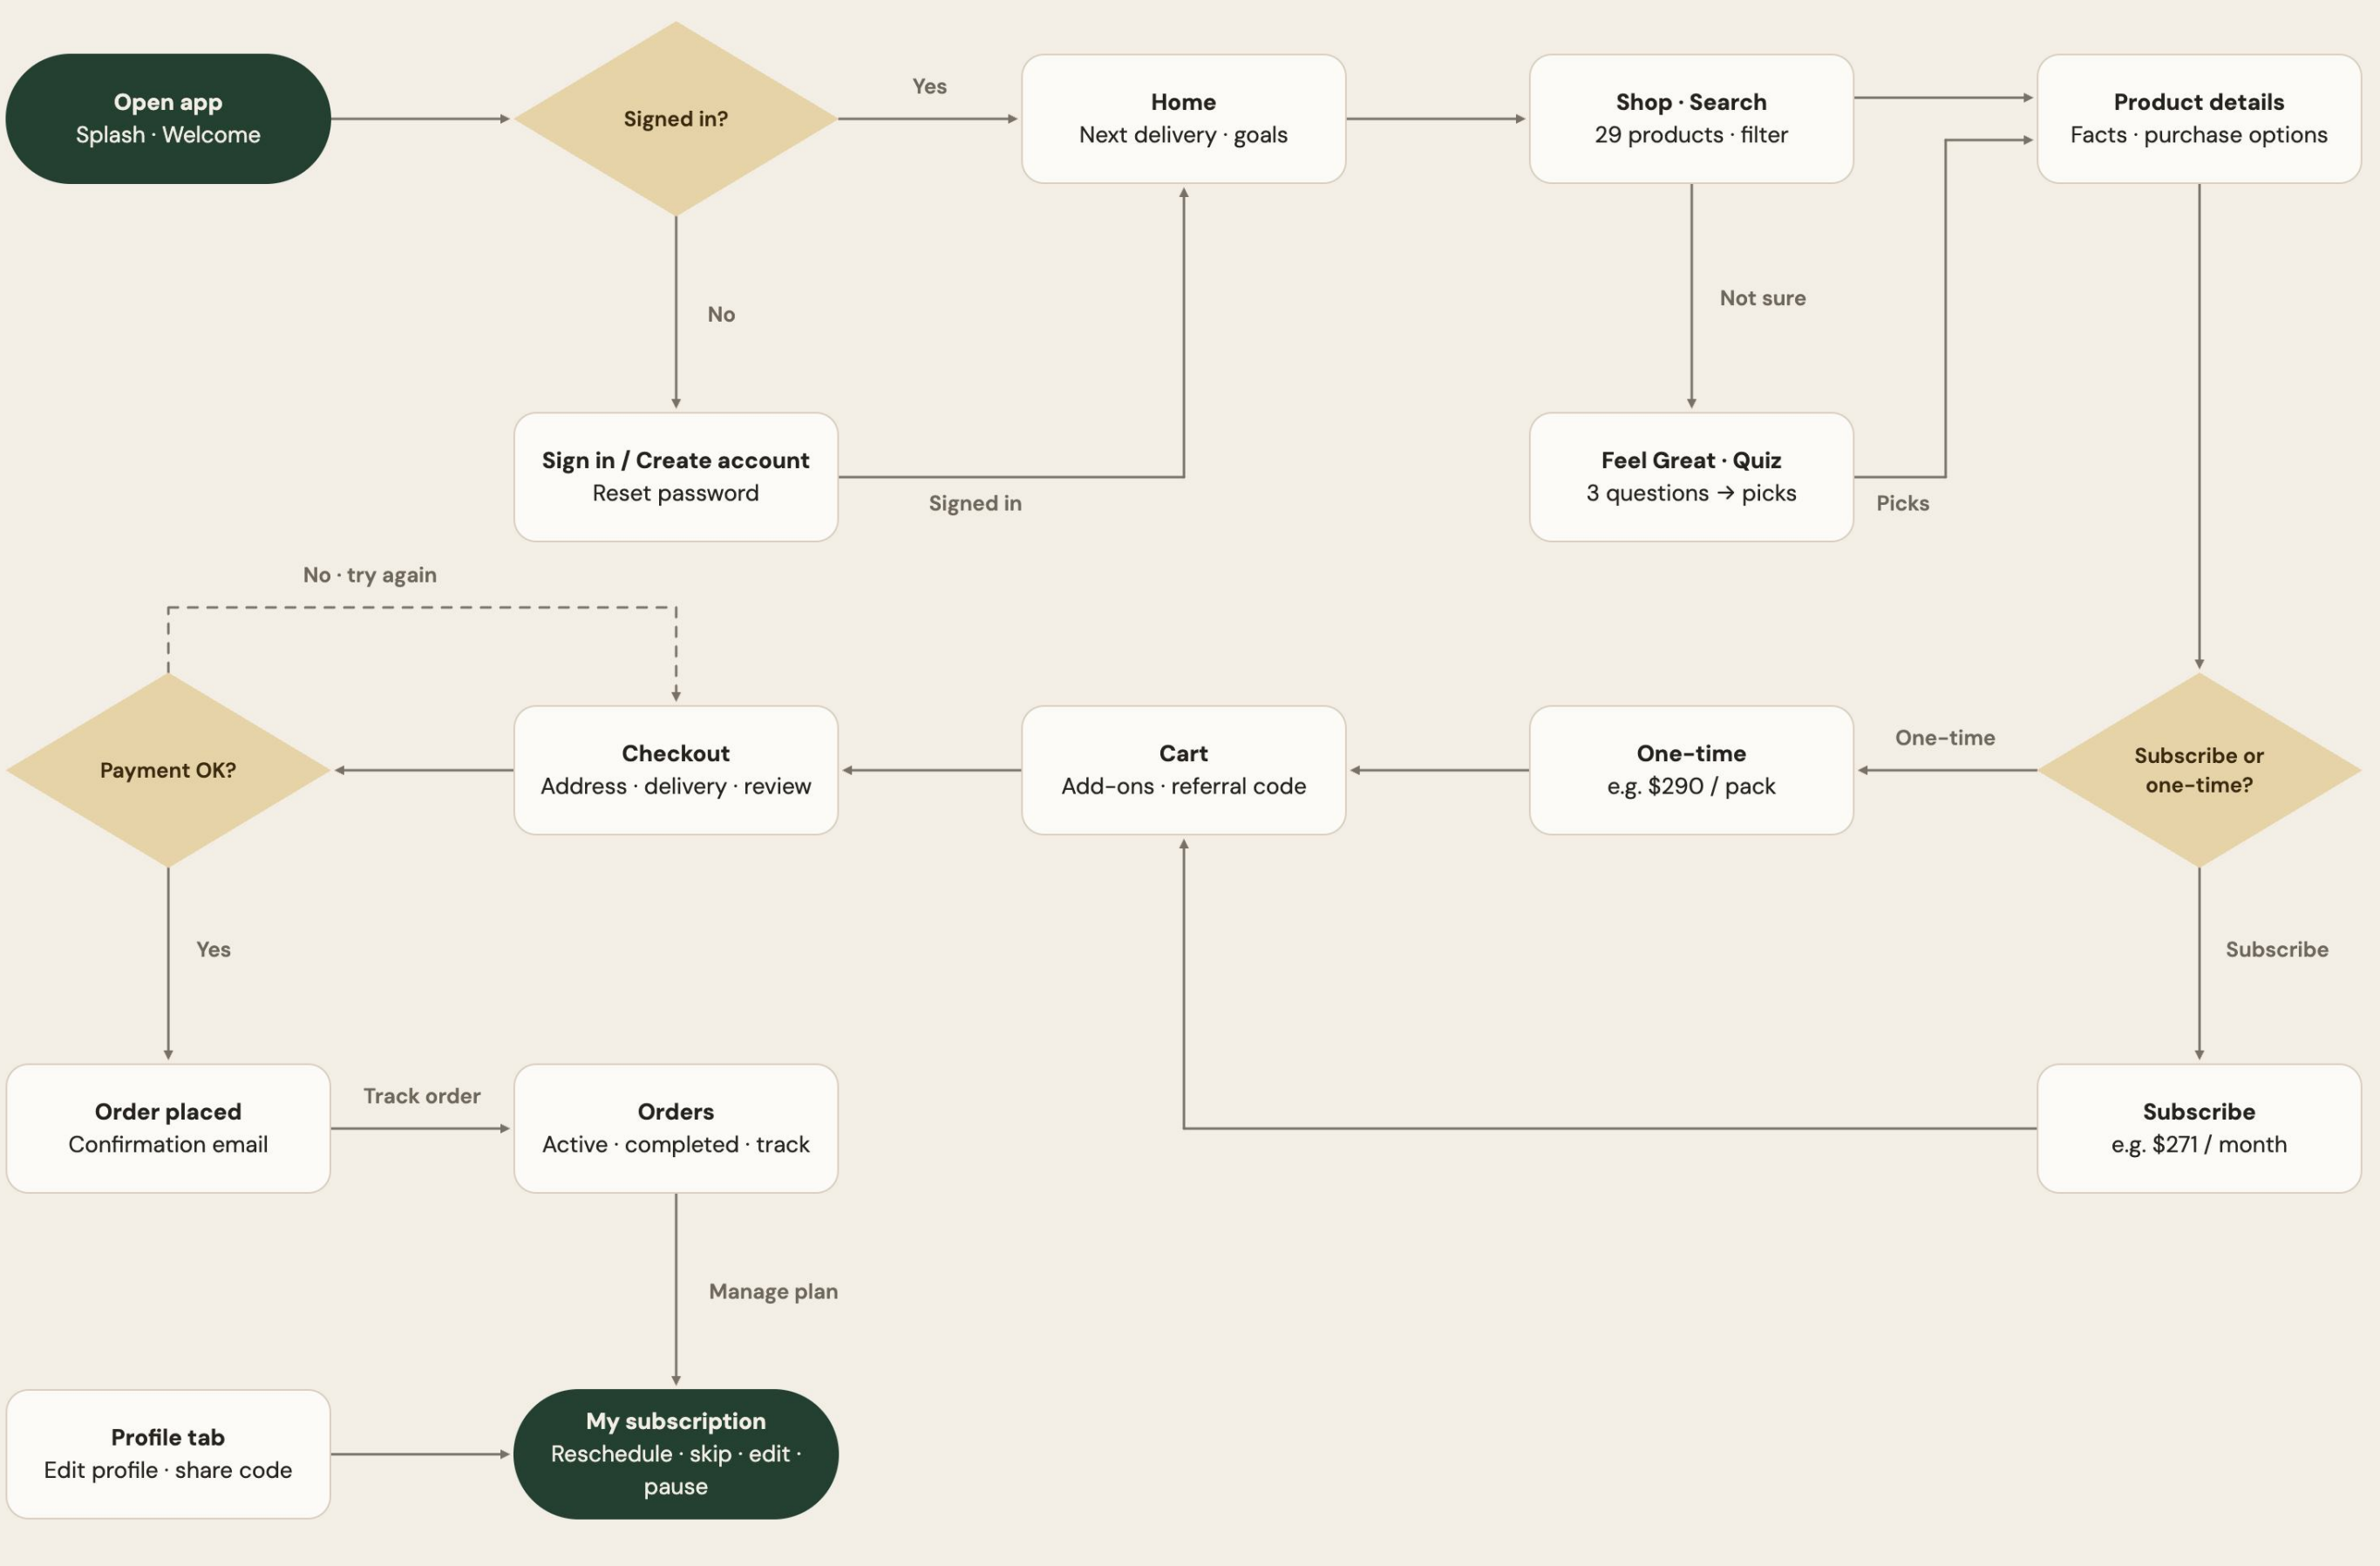
Curious
Hesitant · too much info
More confident
Worried about shipping cost/date
Satisfied · wants to continue

02 · USER FLOW

From app launch to a running subscription

Start / end · Screen · Decision

Happy path through the 35 UI screens, with branches for sign-in, the Feel Great quiz, subscribe vs one-time, payment retry, and managing the plan.



Wireframes

Low-fi wireframes for Unicity Shop: the same 35 screens and numbering as the UI design, grouped into 8 flows. Each arrow shows what a tap opens; dashed arrows go back.
