Customer Journey Map · NAVA Mobile Banking

From first hearing about the app, through onboarding and daily use, to getting help when something goes wrong.

PERSONA (EXAMPLE)
PS
Pimchanok "Pim", 29
Marketing exec · Bangkok · 6+ hrs/day on mobile

Goals
Handle all banking from her phone without visiting a branch, and see where her money goes each month.

Frustrations
Fear of sending money to the wrong person; long identity checks that fail without explanation.

Expectations
Fast, simple and secure, with instant access to a real person when something goes wrong.

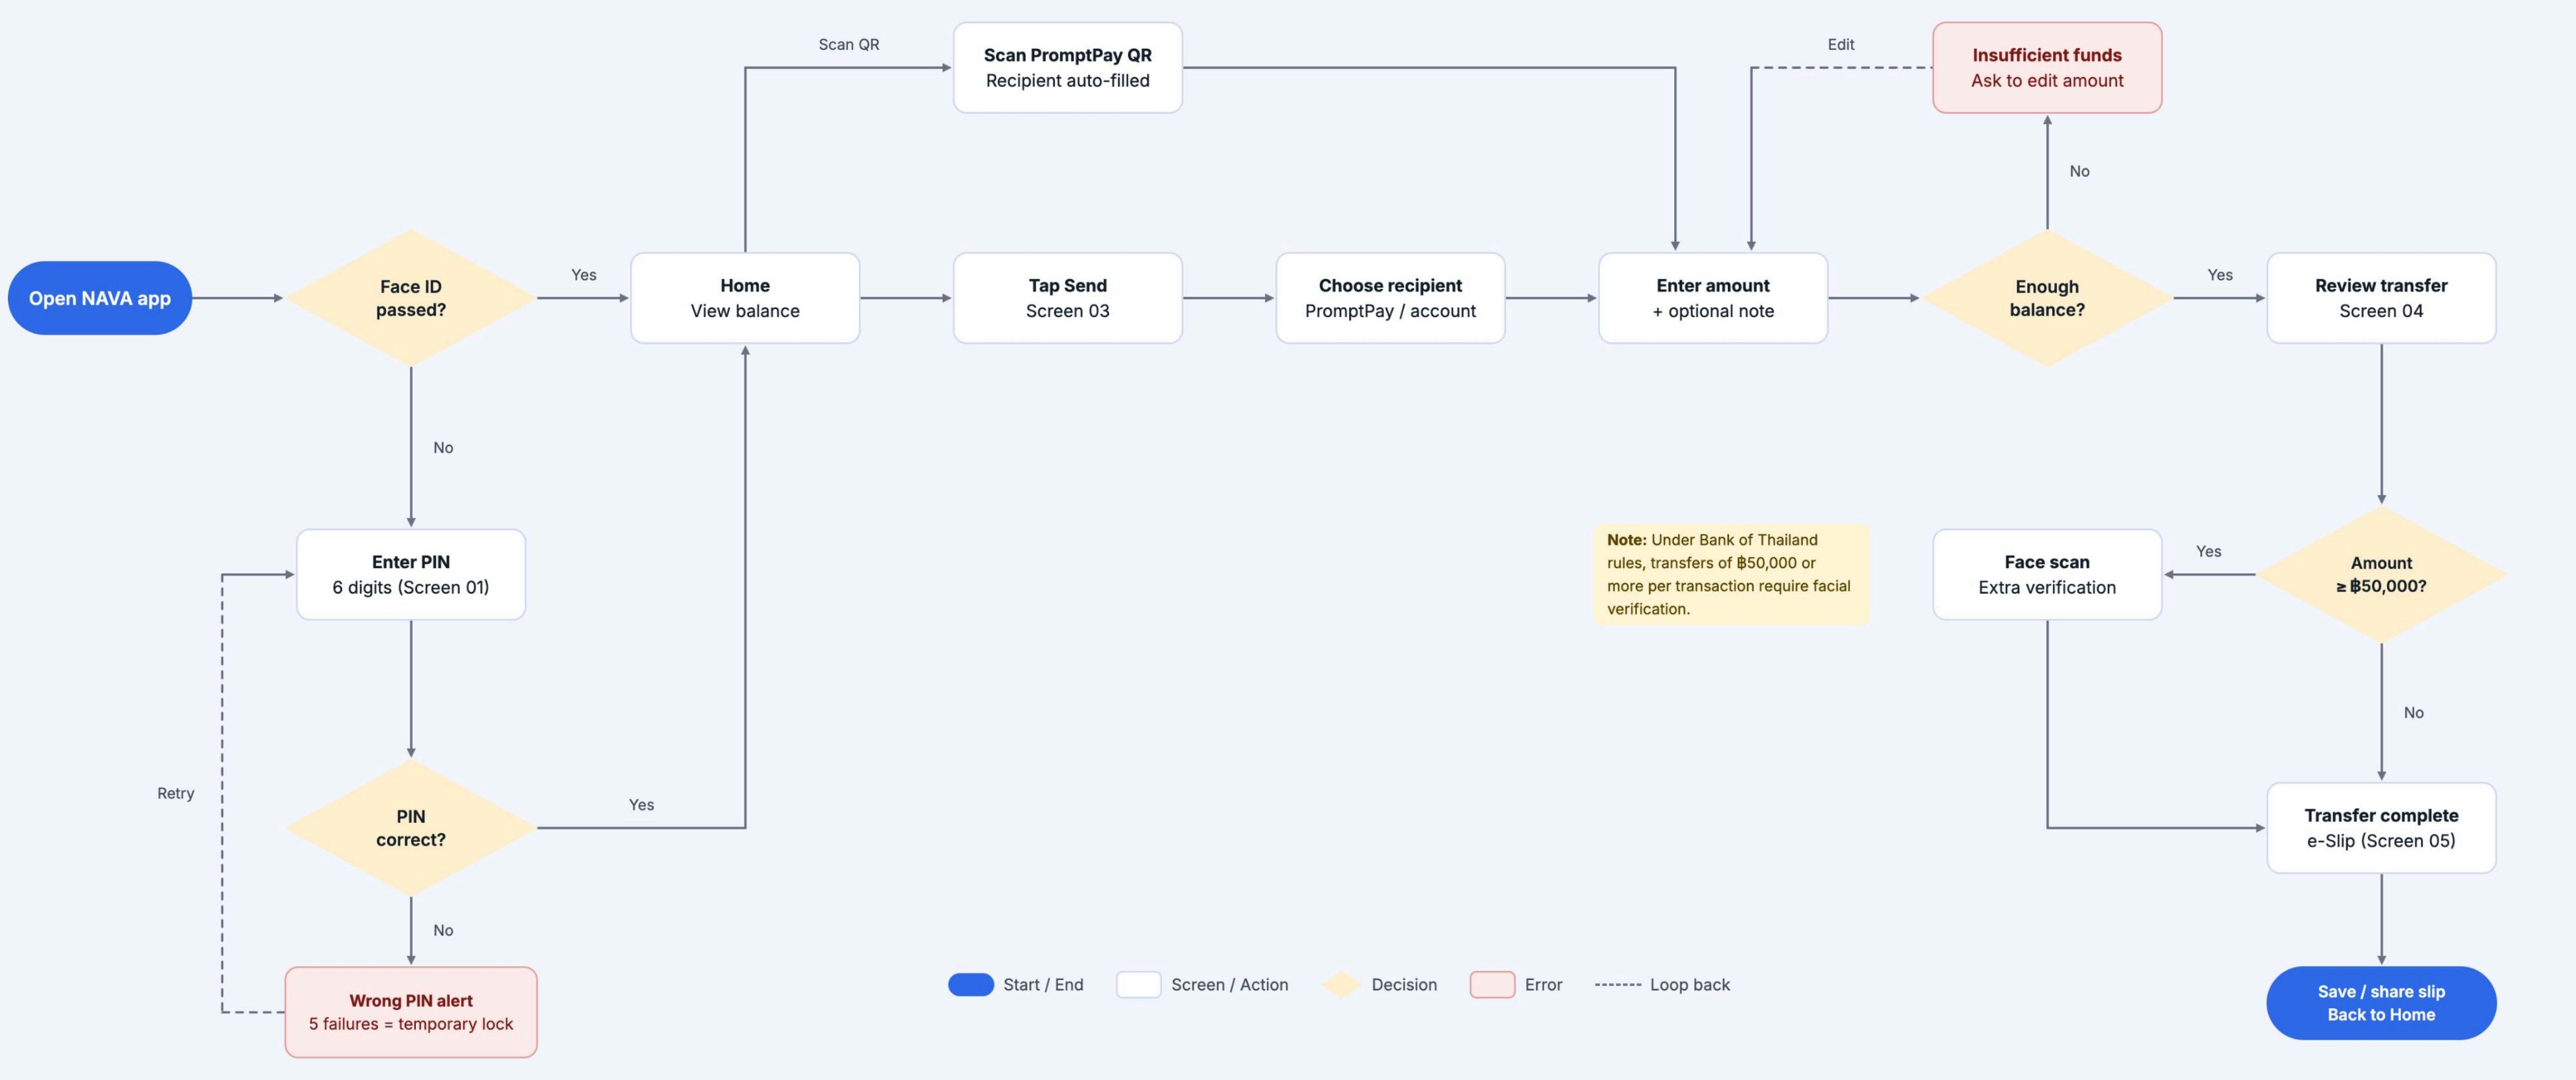
	Stage 1 **Discover** Ads, reviews, word of mouth	Stage 2 **Onboard** Download + e-KYC	Stage 3 **First Use** Set PIN + first transfer	Stage 4 **Everyday Banking** Scan to pay, bills, balance	Stage 5 **Support & Loyalty** Resolve issues, recommend
Actions What she does	Sees a social ad, reads reviews, compares fees with her current bank.	Downloads the app, photographs her ID card, completes a face scan and fills in personal details.	Sets a PIN and Face ID, tops up the account, sends money to a friend via PromptPay.	Scans QR codes at shops, pays electricity and phone bills, sets a savings goal.	Hits a pending or mistaken transfer, contacts in-app chat or the call center until it's fixed.
Touchpoints Where it happens	Social media Bank website Friends	App Store / Play Store e-KYC flow SMS OTP	NAVA app Push notifications e-Slip	NAVA app Merchant QR Home-screen widget	In-app chat Call center Branch
Thoughts What she's thinking	"Can I really open an account online without going to a branch?"	"The ID photo failed again, and it won't tell me why."	"Easier than I expected, but I'm still scared of sending it to the wrong person."	"Scan-to-pay is so quick. I use it every day."	"I've been on hold forever. Where is my case at?"

Emotions
How she feels
— Today
---- Target after redesign

	Discover	Onboard	First Use	Everyday Banking	Support & Loyalty
Pain Points What goes wrong	Fees and benefits are scattered across pages, hard to compare.	ID photo and face scan fail with no reason given; leaving mid-way means starting over.	Unsure the recipient is correct; security setup has too many steps.	App slows down at month-end; too many notifications feel like spam.	No way to track a case; has to repeat the story every time she calls.
Opportunities How we improve	A clear fee-comparison page and a refer-a-friend link with rewards.	Live camera guidance ("move closer", "reduce glare") and saved progress to resume later.	Always show the recipient's name before confirming; favourites; 3-step onboarding.	Quick actions on the login screen, monthly spending summary, notification controls.	In-app case tracker, with context passed to agents automatically.

User Flow: Money Transfer in NAVA

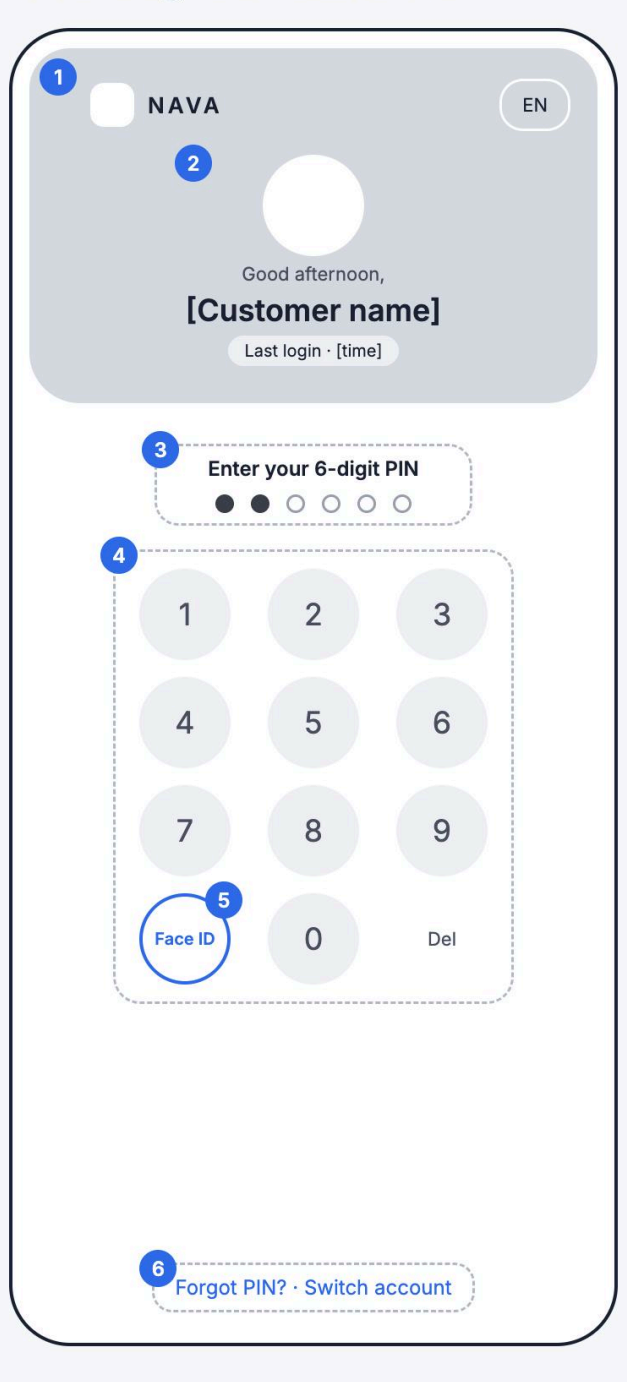
The main path from opening the app to receiving an e-Slip, with decision points and error cases



Note: Under Bank of Thailand rules, transfers of ฿50,000 or more per transaction require facial verification.

W01 · Log in & Biometrics

MID-FI WIREFRAME → UI 01



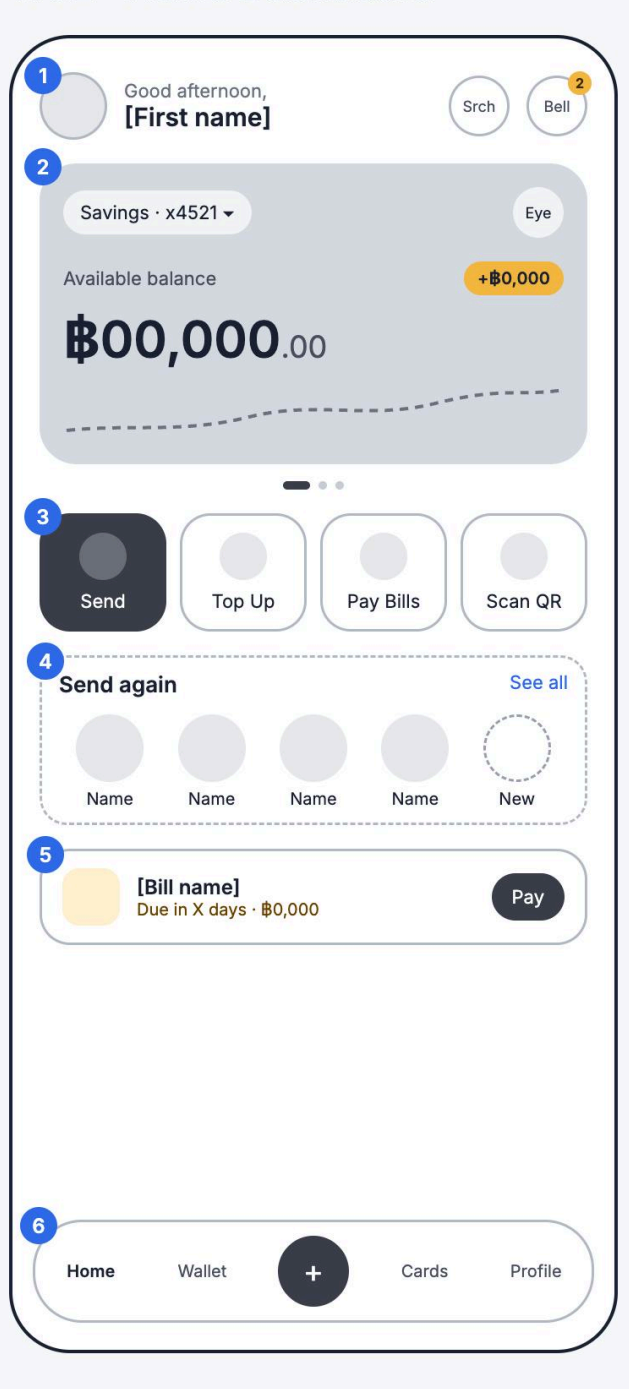
ANNOTATIONS

1. **Brand hero** Blue gradient panel with rounded bottom. Logo left, TH/EN toggle right.
2. **Returning user** Avatar, time-based greeting, name and a "Last login" chip so users can spot unusual access.
3. **PIN entry** 6 dots fill as digits are typed. A "Log in" button appears at 6 digits. Wrong PIN shakes the dots; 5 failures lock the account.
4. **In-app keypad** 66px round white keys with soft shadow. Screenshots blocked on this screen.
5. **Face ID key** Blue-tinted key in the keypad's bottom-left; also prompts automatically on launch.
6. **Recovery links** Forgot PIN (reset via OTP + face scan) and Switch account for shared devices.

STATES TO DESIGN
Default · 6 digits → Log in · Wrong PIN · Locked · Biometric prompt

W02 · Home Dashboard

MID-FI WIREFRAME → UI 02



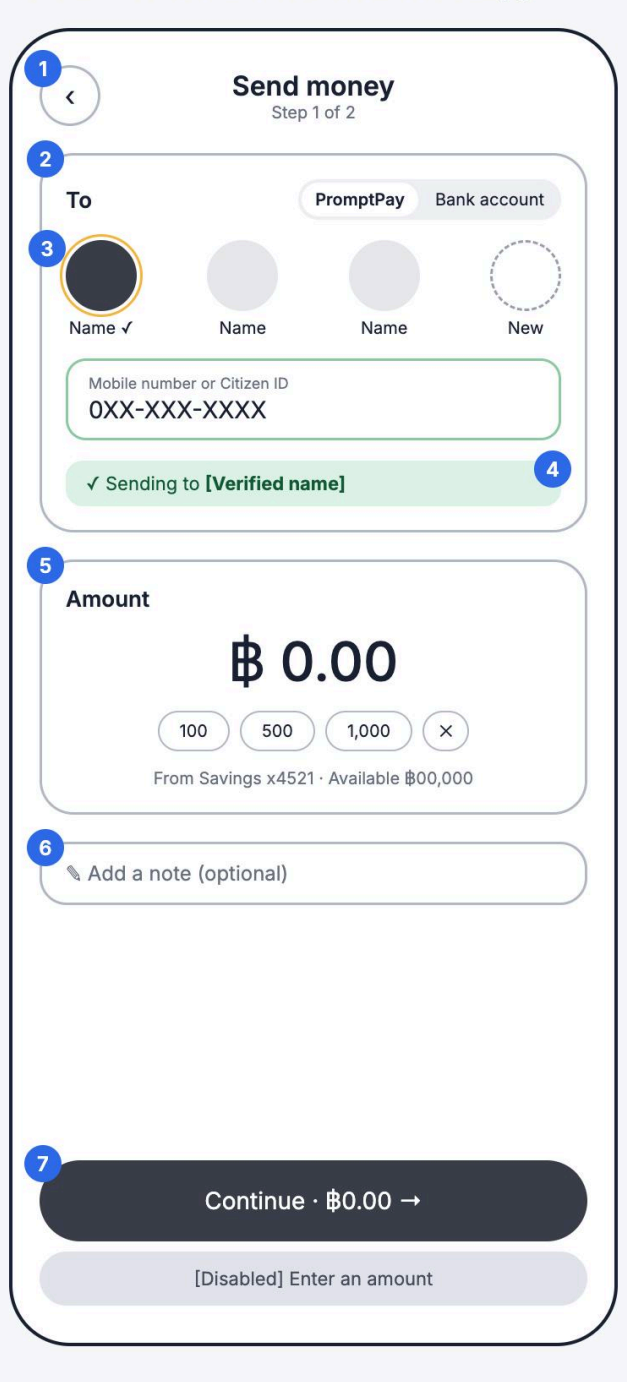
ANNOTATIONS

1. **Header** Avatar and greeting. Search and a bell with an amber count badge.
2. **Balance card (key)** Account switcher, hide/show eye, monthly change badge, amount with lighter decimals and a 30-day trend line. Swipe between accounts (dots below).
3. **Quick action tiles** 4 tiles. Send is filled (primary) because it's the most-used task.
4. **Send again (key)** Frequent recipients, each with its own tint. One tap opens Transfer with them pre-selected.
5. **Bill reminder** Shows the nearest due bill with an inline Pay button. Hidden when nothing is due.
6. **Floating tab bar** Home · Wallet (history) · + new transfer · Cards · Profile.

STATES TO DESIGN
Balance hidden · No bills due · New user (no recents) · Loading skeleton

W03 · Transfer (Send money)

MID-FI WIREFRAME → UI 03



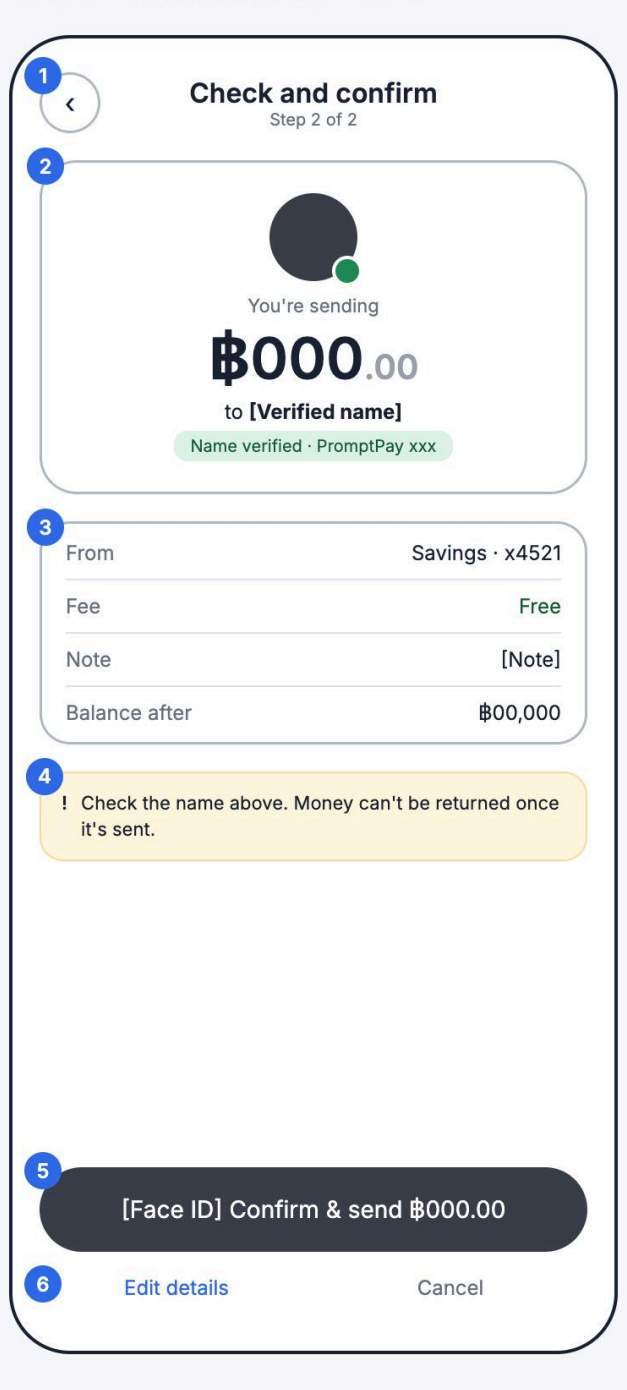
ANNOTATIONS

1. **Header with step** "Step 1 of 2" tells users exactly one check screen follows.
2. **"To" card** PromptPay / Bank account switch sits in the card header; the field below changes to match.
3. **Recent recipients (key)** Tap to select; the number is filled in and the avatar gets an amber check. "New" clears the field.
4. **Verified name (key)** Green banner "Sending to ..." with the field border turning green. Answers the fear of sending to the wrong person.
5. **Amount card** Big number, preset 100 / 500 / 1,000 and clear. Helper line shows source account and balance; turns red when over balance.
6. **Note** Optional; printed on the e-Slip.
7. **Smart CTA** Shows the amount ("Continue · ฿500.00"). When blocked, it greys out and says why.

STATES TO DESIGN
No recipient · Over balance · Bank tab · Ready

W04 · Check & Confirm

MID-FI WIREFRAME → UI 04



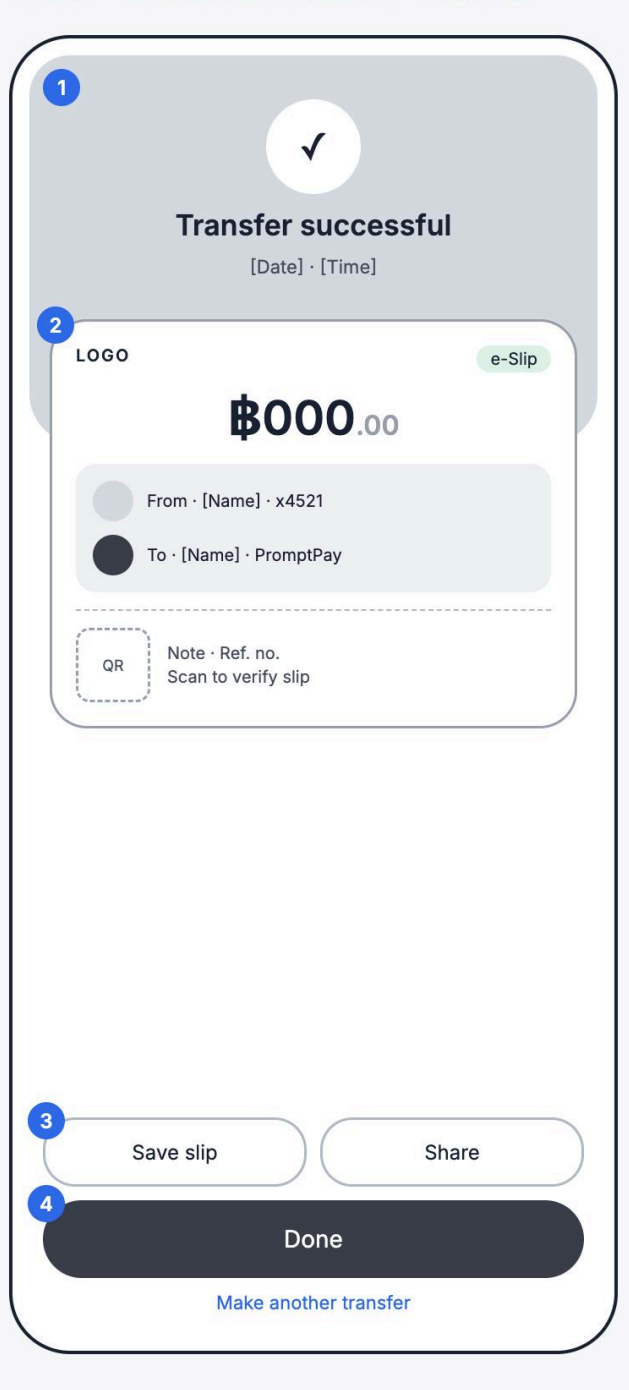
ANNOTATIONS

1. **Header with step** "Step 2 of 2": the last check before money moves. Back keeps every field.
2. **Recipient + amount hero (key)** Avatar with a green verified tick, the amount in large type and the recipient's verified name. Answers "who" and "how much" in one glance.
3. **Details** From, fee ("Free"), note and balance after the transfer.
4. **Warning** Amber note. Becomes a stronger scam warning for new recipients or unusual amounts.
5. **Confirm button (key)** Full-width, in thumb reach, states the exact amount and triggers Face ID. Amounts of ฿50,000 or more add a face scan.
6. **Edit / Cancel** Edit returns to W03 with data kept; Cancel goes Home.

STATES TO DESIGN
Face ID prompt · Face scan ≥ ฿50k · Scam warning · Processing

W05 · Success & Error States

MID-FI WIREFRAME → UI 05



ANNOTATIONS

1. **Success hero** Blue gradient panel, white check in a glowing ring, title and timestamp. Haptic on arrival.
2. **e-Slip card (key)** Overlaps the hero. Amount, From/To with avatars, note, reference and a verification QR.
3. **Save / Share** Save to Photos, or share the slip image through the system sheet.
4. **Done** Returns Home with the balance refreshed. Hardware back never re-opens the form.

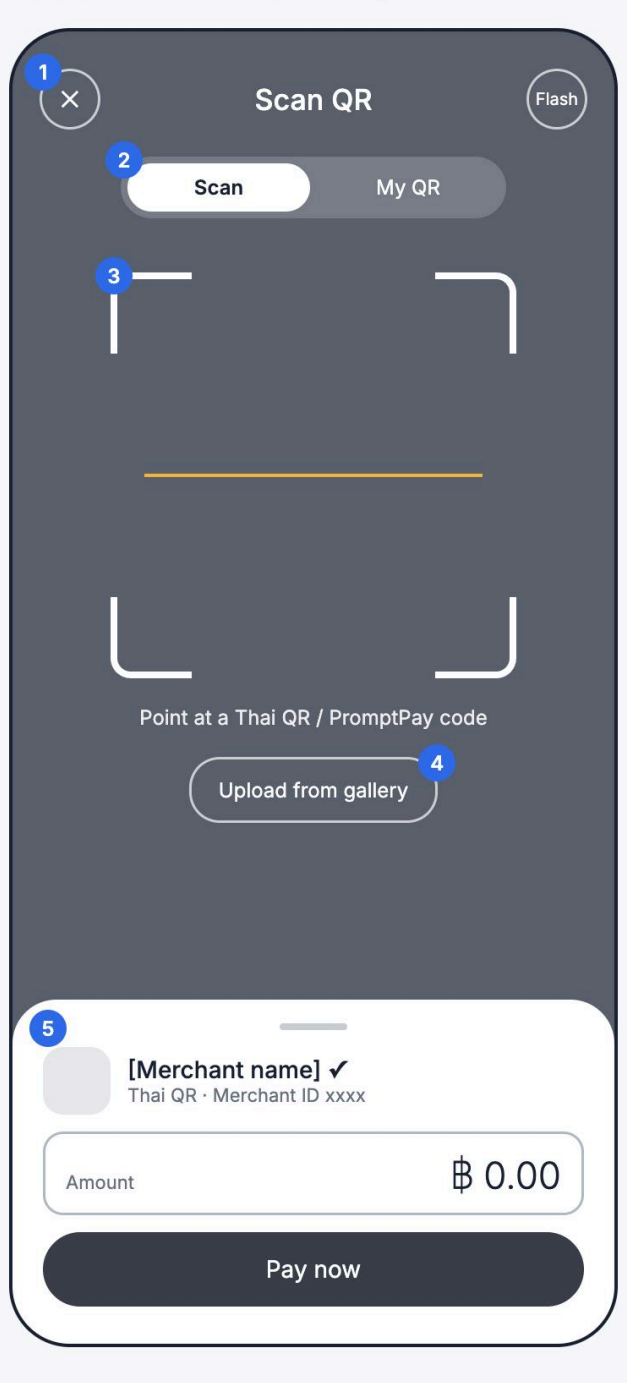
OTHER STATES

Transfer failed
Clear reason (e.g. recipient bank unavailable). No money was taken.
Try again
Contact support

Processing
Uncertain status. Don't retry; we'll notify you within minutes.
Track status
Back to Home

W06 · Scan QR to Pay

MID-FI WIREFRAME



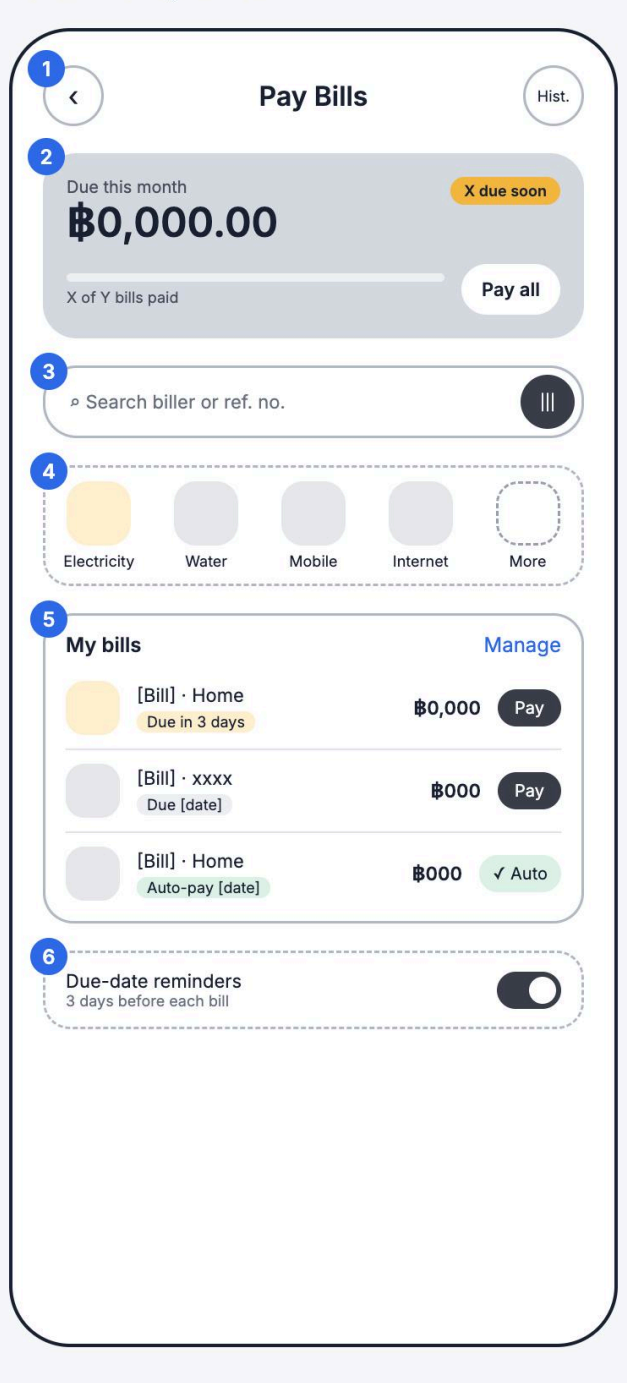
ANNOTATIONS

1. **Camera controls** Close returns to the previous tab. Torch toggle for dim shops. Asks for camera permission on first use.
2. **Scan / My QR** One screen to pay or receive. My QR can set a fixed amount and be saved as an image.
3. **Viewfinder (key)** Auto-detects Thai QR, PromptPay and bill-payment QR with no shutter button. Haptic on detection.
4. **Upload from gallery** Pay from a screenshot of a QR, which is common for online sellers.
5. **Payment sheet (key)** Slides up with the merchant's verified name. Amount is locked if the QR carries one, editable if not. Pay now → biometric → W05. Small payments skip the separate review step.

STATES TO DESIGN
Camera denied · Invalid / expired QR · Fixed vs. open amount · My QR view

W07 · Pay Bills

MID-FI WIREFRAME → UI 07



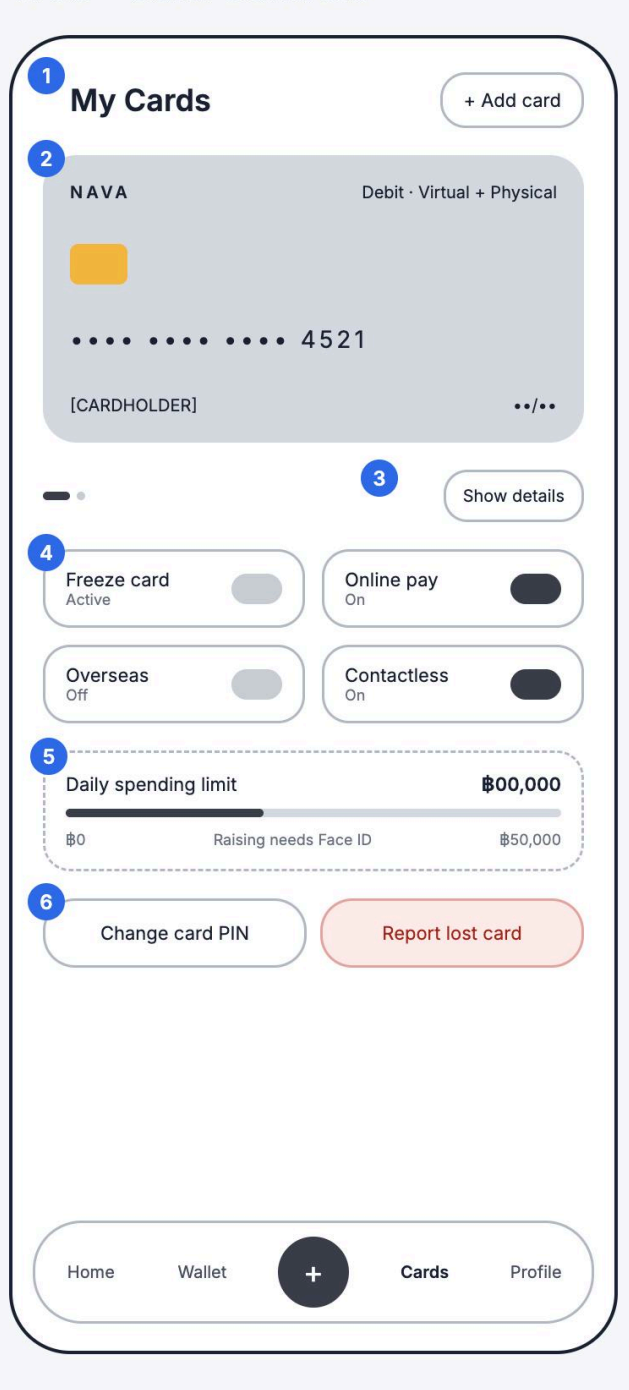
ANNOTATIONS

1. **Header** Back, title, and a history shortcut for past bill payments.
2. **Due summary (key)** Blue card with the total due this month, a due-soon badge, a paid-progress bar and "Pay all".
3. **Search + scan** Search by biller or reference. The round button at the end scans a paper bill's barcode (opens W06 camera).
4. **Categories** One row of 5 tinted tiles; "More" opens the full biller list.
5. **My bills (key)** Status chip under each name (due soon in amber, auto-pay in green). Amount and Pay on the right. A paid bill switches to "Paid" and updates the progress bar.
6. **Reminders** A push alert 3 days before each due date. On by default.

STATES TO DESIGN
All paid · Overdue · No saved bills · Auto-pay failed

W09 · Card Controls

MID-FI WIREFRAME → UI 09



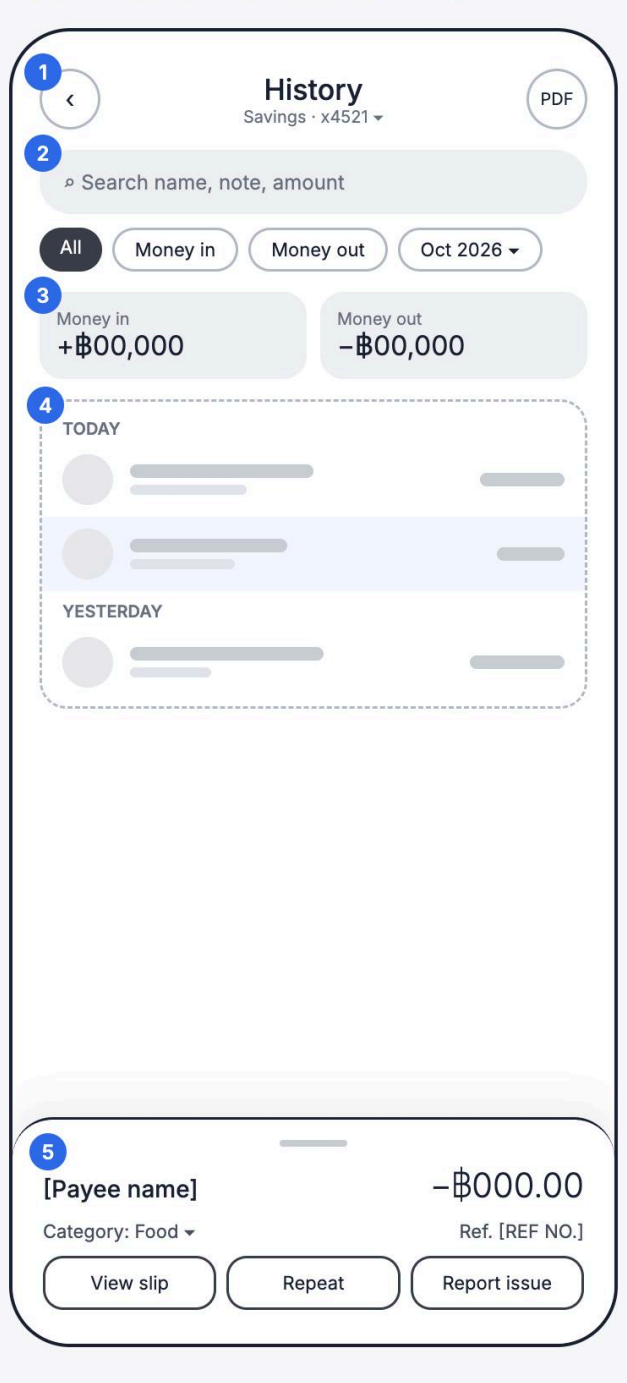
ANNOTATIONS

1. **Header** "My Cards" with an Add card shortcut (virtual card in seconds).
2. **Card visual** Blue gradient card with gold chip. Number masked by default; a "Card frozen" overlay appears when frozen.
3. **Show details** Requires Face ID, then shows the number, expiry and CVV until hidden. Dots switch cards.
4. **Instant controls (key)** 2×2 toggle tiles with a status line. Freeze is reversible and turns the tile amber.
5. **Spending limit** Slider in ฿1,000 steps. Lowering is instant; raising needs Face ID.
6. **Card services** Change PIN, and "Report lost card" in red, which blocks the card permanently and orders a replacement.

STATES TO DESIGN
Card frozen · Details shown · Blocked · No cards yet

W08 · Transaction History

MID-FI WIREFRAME → UI 08



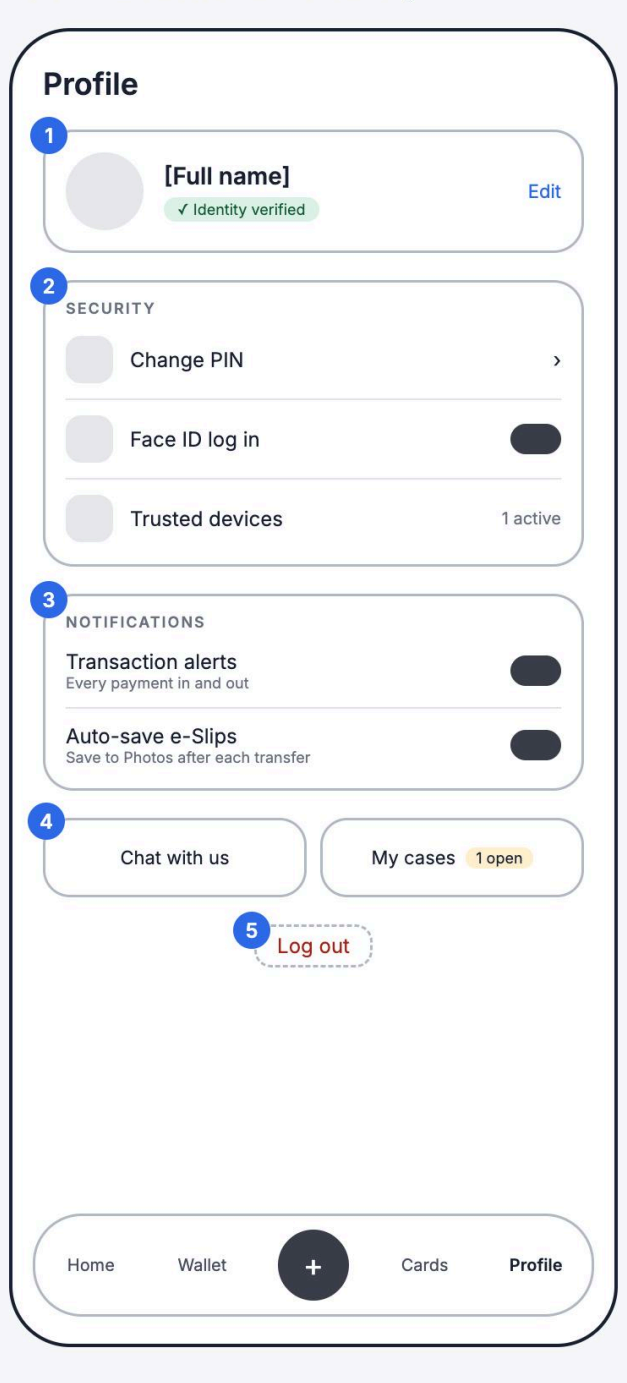
ANNOTATIONS

1. **Account & statement** Switch account from the title. PDF exports an official statement (choose months), password-protected.
2. **Search & filters (key)** Full-text search over names, notes and amounts. Filter chips for direction and month, combinable.
3. **Period summary** Totals update with the filters, giving a quick picture of cash flow.
4. **Grouped list** Sticky date headers, infinite scroll and pull-to-refresh. Pending items are labelled.
5. **Detail sheet (key)** Tapping a row opens this sheet. Re-categorise, view the e-Slip, repeat the payment, or "Report issue", which opens a support case with the transaction attached. This fixes the journey's Stage 5 pain point.

STATES TO DESIGN
Loading more · No results · Pending item · Case opened

W10 · Profile & Security

MID-FI WIREFRAME → UI 10



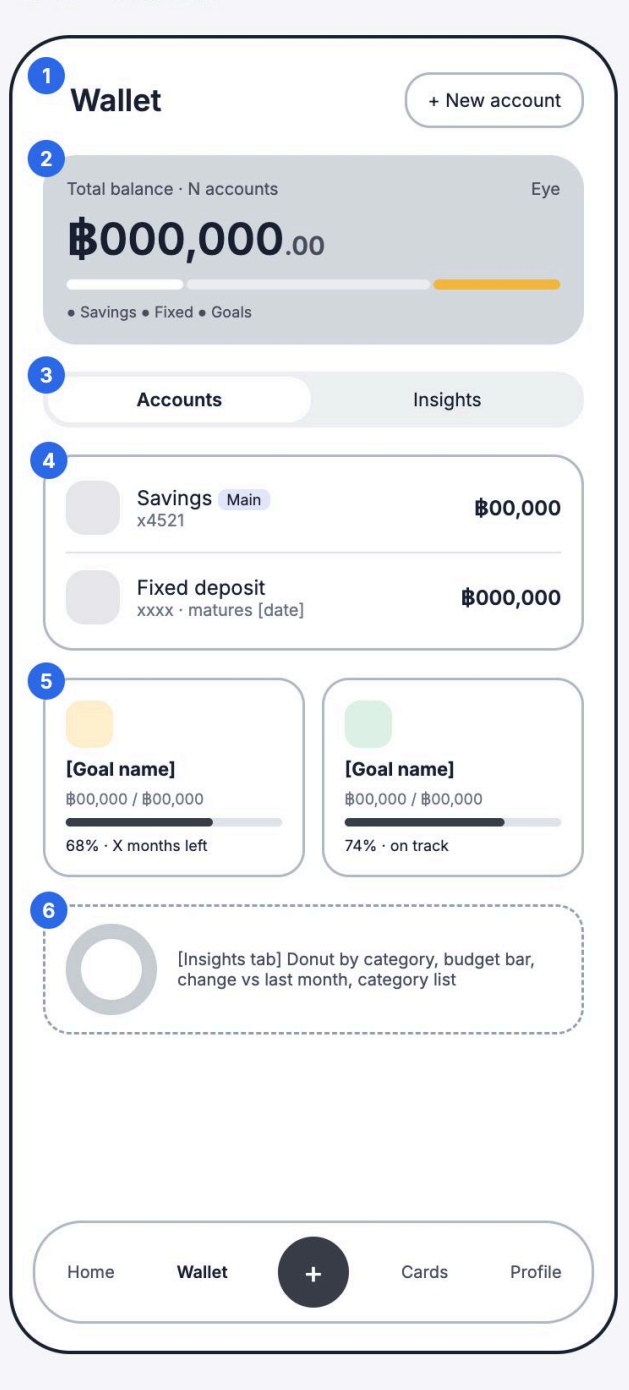
ANNOTATIONS

1. **Profile card** Name with a green "Identity verified" chip. Editing phone or email needs OTP and Face ID.
2. **Security (key)** Change PIN, Face ID toggle, and trusted devices with remote sign-out for a lost phone. Transfer limits live in W09 Cards.
3. **Notifications** Just two clear switches, each with a one-line explanation. Answers the "too many notifications" pain point.
4. **Help & case tracker (key)** Chat, and "My cases" with an open-count badge and status timeline, so nobody repeats their story (journey Stage 5).
5. **Log out** Red text link with a confirmation. The session also expires after 5 minutes idle.

STATES TO DESIGN
New device alert · Case timeline · Log out confirm · Unverified profile

W11 · Wallet

MID-FI WIREFRAME → UI 11



ANNOTATIONS

1. **Header** "Wallet" tab title with a New account shortcut (savings, fixed deposit or goal).
2. **Total balance (key)** Blue card summing every account, with a split bar (savings / fixed / goals) and a hide toggle that masks every amount on the page.
3. **Accounts / Insights** Segmented switch between what you have and how you spend.
4. **Accounts list** Each account with its type icon, number and balance; the main account is tagged. Tap a row to open its history.
5. **Savings goals (key)** Goal tiles with saved / target, a progress bar and a plain-language status ("on track", "4 months left").
6. **Insights tab** Monthly spending donut, budget left, change vs last month and a per-category list. Covers the journey goal "see where my money goes".

STATES TO DESIGN
Balances hidden · No goals yet · Goal reached · Over budget
